Adding Printer for Mac Book

Step 1
Choose System Preferences from Apple menu (figure below):

Step 2
Select "Print & Fax" from the Dock menu.
Step 3
Click the **+ (plus)** icon to add a printer

Step 4
Right-click on the empty space next to ![printer icon] and a pop-up will appear, click on “Customize Toolbar...” .
Step 5

A pop-up will appear, click and drag on the “Advanced” icon, next to the empty space on the icon, then click on “Done” button.

Step 6

Click on the Advanced icon, Enter the details as shown below:

Type: Windows printer via spooler (please select from drop down menu)
Device: Another Device
URL: smb://usntu/A4wireless-BW (To enter text here)

Name: A4wireless-BW (To enter text here)
Use: Generic PostScript Printer

Click “Add” button once the details are filled.
Step 7

Check the box for Duplex Printing Unit and click “OK” button below.

Step 8

After Setting up the print queue, the job is always at the “on hold” status, open up the print queue and click on resume. Key in your Network ID and password to continue.

Note: kindly use “NTUSECURE” wireless network when you perform the above set up and printing.
