

## **Getting Started**

Here is a list of what an NTU Faculty Member needs to do to get started to use TurningPoint.

### **1. Get TurningPoint Instructor's Account**

As a Faculty Member, you will need a Turningpoint's Instructor Account in order to log into TurningPoint software. The account has been pre-created for majority of the NTU Faculty members.

**Note:** You are **not supposed** to create your own TurningPoint account.

Click [here](#) for more information about the TurningPoint Account.

### **2. Install TurningPoint software**

You will need to install the TurningPoint software on your computer. The software is available for both Mac and Windows, and works with Microsoft Powerpoint.

Click [here](#) for the download page, and get to know the latest supported version of TurningPoint in NTU.

### **3. Start creating polls in TurningPoint.**

Once you have your Instructor's Account and TurningPoint software, you can start creating polls. Click [HERE](#) for more information with regard to using TurningPoint software.

### **4. Prepare your students before the start of class**

Inform your students that you intend to use TurningPoint for your class. Students will need download the TurningPoint App on their Mobile Phones, and prepare their account details.

You can refer your students on how to get started via [this page](#)

### **5. Downloading of Class Participants List from NTULearn**

When your students are enrolled in their course sites in NTULearn, you can download your class's participant list. The class participant list will enable you to tag your student's poll responses to their names.

Click [HERE](#) for more information about your Class Participant's List.
