Annex C3 (Hall Allocation for Cat C)

Hall Allocation for Category C

Students based on the total points as shown in the Overview. The points for Campus Life Activities are not accumulative. Only the highest level of Campus Life Activities will be considered to be admitted to a Hall. The following is an example on how the total points are computed:

Example:
Campus Life Level 3 = 5 points
Campus Life Level 4 = 3 points
Total points = 5 points.

Admission to Hall
To be admitted to a Hall, student’s must meet the minimum Campus Life Involvement (students must have at least 1 verifiable Campus Life activities listed in the Annex B for Campus Life Involvement) and his/her total points must meet the General Cut-off Point (GCP). GCP is also known as GCW.

The GCP which is determined by demand and limited supply of hall places defines the total points above which applicants are admitted to a Hall or below which the applicants are put on the waiting list. It is the minimum total point a student must have in order to qualify for Hall Admission. It is not pre-determined but is derived as a result of the number of hall places available against number of applications for that year. There will be 2 GCPs: one for male and one for female.

Individual applicants might wish to consider to apply for single rooms as there are more single rooms available.

Applicants are ranked individually in descending order of total points and must qualify for admission to a Hall. If two students wish to apply together as roommate, both of them must first qualify for admission to Hall. Admission to the preferred Hall is based on quota set for senior students in each Hall and not on the applicant’s total points. Applicant applied under Category B due to the quota set in each Hall, will not pair up with his/her roommate if the roommate is assigned to a different Hall.

When demand for accommodation far exceeds the number of places set aside for senior students in the application year
Applicants who meet the minimum campus life involvement criterion and are not successful in their applications will be placed on the general waiting list ranked in descending order of total points for subsequent rounds of computer balloting when vacancies are available.

Applicants who do not meet the minimum campus life involvement criterion will be placed on the same general waiting list with unsuccessful applicants with total points and will be processed after all these unsuccessful applicants with total points are assigned a Hall. Computer balloting will be carried out to determine the successful applicants in this category for subsequent rounds of computer balloting when vacancies are available. Due to the uncertain waiting time, applicants on the general waiting list are advised to look for off-campus accommodation.
Unsuccessful applicant will not be paired with their successful roommate when they are subsequently offered a place.

The chart below summarise the hall allocation process for Category C’s applicants.

number of places set aside for senior students) | same total points have an equal opportunity of being assigned to a hall. Only successful applicants will be notified.

Applicants who do not meet the campus life involvement criterion will be placed on the same general waiting list with the unsuccessful applicants with total points and will be processed after all the unsuccessful applicants are assigned a hall. Due to the uncertain waiting time, this category of applicants are advised to look for off-campus accommodation.

Allocation of hall and type of room is random. Request for change of Hall/room is not permissible.
