

**Discussion session with Lord Martin Rees, Professor of Cosmology & Astrophysics
(August 2009)**

The author of more than 500 research papers and the President of the Royal Society, Lord Martin Rees, met our very own scholars during a visit to NTU. A discussion session was held with him in which ideas were exchanged freely. Scholars who attended the session felt that they gained much from Lord Martin. Such meetings and discussions with world-renowned academics are but one of the benefits of being in the CN Yang Scholars Programme.
