HASS Graduate Programme

College of Humanities, Arts, & Social Sciences (HASS)

Nanyang Technological University, Singapore (NTU Singapore) has 33,000 undergraduate and graduate students in the colleges of Engineering, Business, Science, Humanities, Arts, & Social Sciences, and its Interdisciplinary Graduate School. It also has a joint medical school, the Lee Kong Chian School of Medicine, set up with Imperial College London. Ranked on par with top universities in the world, we have a dynamic team of research leaders to mentor inquisitive minds. The College is home to 400 PhD and Masters Research students and 600 Masters by Coursework students. Graduates of the College are all pursuing dynamic careers in both public and private sectors.

Foreword by the Dean

PROFESSOR ALAN K.L. CHAN
Dean, College of Humanities,
Arts, and Social Sciences

Thank you for your interest in our postgraduate programmes!

Whether you are looking for a Master's degree programme by coursework or research, or a PhD programme in a specific discipline or an interdisciplinary field, or perhaps still deciding if you should pursue postgraduate studies, I trust you will find something of interest in these pages.

The College of Humanities, Arts, and Social Sciences (HASS) at NTU, Singapore, is a growing academic community, now home to about 5,000 undergraduate and postgraduate students. Ranked among Asia's finest, we have a strong team of faculty members who are dedicated to achieving excellence in both research and education. We are a diverse community, with students and faculty from well over 30 countries. This diversity enriches our pursuit of knowledge and understanding, and enhances our effort in addressing the pressing issues and concerns that confront the world today.

At HASS, we seek to prepare our students for a fast-changing globalised knowledge economy, and for those interested in teaching and research, to become future leaders in their academic fields. A full range of programmes await those who are willing to traverse the challenging and yet wondrous journey of discovery with us. Whether in design and media art, communication and information studies, economics, English literature, history, Chinese studies, international relations, linguistics, psychology, philosophy, public policy, sociology, Asia research, or thematic areas such as ageing and health, migration and population, digital humanities, urban complexities, or science, technology and society, that cross disciplinary boundaries, our students work alongside top scholars not only from the College but also the other Schools and Colleges at NTU, and have opportunities to collaborate with other researchers and postgraduate students from our many overseas partner universities.

While disciplinary expertise remains critical, the College encourages interdisciplinary explorations that promise to break new ground and expand our intellectual horizons. Engagement with society is closely aligned with research in HASS. We pride ourselves in being able to provide a safe, intellectually vibrant and respectful environment that is conducive to personal development and the flourishing of ideas. With ample support for research, our students are well positioned to make their mark on the global scene, whether in academia, government or industry.

I invite you to visit our campus, meet our faculty and postgraduate students, and join us as a member of our knowledge enterprise. You will find HASS and NTU at large a welcoming place for students and researchers. Many visitors are struck by the beauty of our spacious garden campus, too. We are proud of our postgraduate students and programmes at HASS and I am pleased to invite you to learn more about them.

The College offers MA by research and PhD in the following disciplines. While these constitute the core disciplinary areas, the list is not exhaustive; potential research students are encouraged to explore emerging and interdisciplinary areas that are relevant to their research interests.

About HASS

Candidature Period

For all higher degrees by research, candidates may be admitted as part-time or full-time students. All graduate programmes by research offered in our 4 schools follow the same candidature period as follows:

Full-Time / Part-Time

Programmes	Minimum	Maximum	Minimum	Maximum
Master of Arts (Research)	1 Year	3 Years	1 Year	4 Years
Doctor of Philosophy	2 Years	5 Years	3 Years	7 Years

Academic Calendar and Application Period

NTU's academic year commences in August each year, and ends in July of the following year. Application deadlines for our graduate programmes by research are as shown below*:

Intake	Programmes	Application Period
August	All programmes	Between 1st October to 15th November
January	For WKWSCl Masters (Research) Programme only	Between 1st June to 31st July

*Note: Coursework programmes may adopt a different admission and academic calendar, please contact the programme to find out about application procedures and programme structure.

For enquiries on our graduate programmes and other graduate matters, please write in to **AD-HASS-ACAD@ntu.edu.sg**.

Professor Vibeke Sorensen
Professor & Chair,
School of Art, Design and Media

Art, Design and Media are ways that we explore, contemplate, and improve the world around us—a process which demands imagination, innovation, research, and critical thinking. Related technologies therefore play a huge role in the dialogue between cultures, as well as in transforming the way of life of people around the world is also an important consideration. Here, in this young school located in Singapore in the heart of South East Asia—a major international port city that for hundreds of years has been the gateway between the East and West—new relationships between traditional and contemporary media, and local and world cultures are constantly being pioneered. We consider ADM a living laboratory, a model of the global community where diversity and issues of sustainability are key. In this regard, our green building and our garden city and campus are an inspiration to us all, a reminder of our ultimate goal of living in harmony with nature and the universe. We welcome those from all countries of South East Asia, Asia, and the larger international environment and encourage them to bring their special experience, knowledge and insights to their studies. Whether your interests are in art, design, media, or the related histories, or new and emerging areas at their intersection, ADM is committed to fostering your voice by providing you with the educational and research support necessary for advanced work and new professional opportunities. Come become part of an exciting new wave of dazzling talent that is already transforming Singapore into a major creative research centre in South East Asia.

School of Art, Design & Media (ADM)

Graduate Programmes by Research

- 1 **Doctor of Philosophy**
- 2 **Master of Arts**

Both the PhD and MA programmes provide creative research opportunities in a wide spectrum of academic areas. Students are expected and encouraged to develop innovative ways of thinking, and to experiment and create in a range of media. This programme also acts as an incubator for the development and realization of original artistic and professional productions, including design, interactive media, film, animation and new art forms.

Graduate Programmes by Coursework

- 1 **Master of Arts in Museum Studies and Curatorial Practices**

The programme prepares graduates for leadership roles in the interpretation, management, and development of arts and museum collections. It has been crafted specifically to nurture vision, knowledge and skills, which will serve, strengthen and transform the museum and gallery sector, as well government agencies such as NAC in Singapore and beyond.

The School of Art, Design and Media is well positioned to be the region's leading platform for education, research and outreach in the arts. It is Singapore's first professional art school to offer the complete suite of Bachelor, Master and PhD programmes. Through the incorporation of creative practices and research, ADM's graduate programmes are an incubator for the development of creative ideas spanning across disciplines, priming our graduates to transform the field. Our international faculty possesses research expertise in four core areas, namely: Media Art, Design Art, Art Culture and Heritage, Foundation Studies.

For more information on graduate programmes in ADM or to view our faculty profiles, do visit our website at www.adm.ntu.edu.sg

You can also write in to us at ADM_GraduateProg@ntu.edu.sg

1 Nan Triveni Achnas
PhD student

Studying at ADM-NTU opens one up to a plethora of knowledge due to the availability world-class seminars, talks by distinguished professors, innovative and cutting-edge projects by researchers as well as the high-end facilities in the school. Added to this is the availability of the resources throughout the other schools and faculties at NTU which allows a student to conduct a multidisciplinary education. I was also drawn by the diverse and eclectic environment of the school that is constantly on the cusp of new technologies and research.

2 Zu Orzu
MA (Research) student

ADM has allowed me to pursue a path that is relevant to my research interests. It has been a wonderful

experiential learning process in terms of both theoretical and practical components of doing research. As a practitioner, I am able to supplement my creative development with a more theoretical understanding, and vice versa.

The opportunity to work with ADM faculty has definitely encouraged me to be more critical. At the same time, I am heartened by the chance to experiment and open up to new ideas and future studies.

Sharing a space with other graduate students has also given me deeper insight about other art and design disciplines. Although being a graduate student can be rather isolating at times, I find myself constantly inspired and bolstered by the research efforts that my peers have undertaken. No doubt, this has been a worthwhile and most memorable academic experience for me.

3 Mohammad Javad Khajavi
PhD student

I remember very well my first day at NTU. I had just arrived in Singapore and I went directly to the School of Art, Design & Media where I was going to start my graduate studies. As I was looking at ADM's building with its marvelous architecture for the first time, I was filled with excitement, joy and hope. Now, four years have passed, and still every night that I go home I look at the building and feel the same excitement, joy and hope. But this time it is different. I am excited and joyful of all the life lessons that NTU taught me, and I am hopeful of all the windows of opportunity that studying at NTU has opened up for me.

Professor KK Luke
Chair, School of Humanities

Welcome to postgraduate studies at the School of Humanities! Here in SoH, you can pursue your interest in a variety of academic subjects, be it history, philosophy, literature, or linguistics. We are also very interested in interdisciplinary work that cuts across traditional boundaries. In the School of Humanities where faculty and graduate students work closely together, you will be given mentoring and feedback tailored to your own needs.

You are most welcome to browse through this brochure and our website to find out what's on offer, and contact us if you want to know more.

School of Humanities (SOH)

Graduate Programmes by Research

- 1 Doctor of Philosophy
- 2 Master of Arts

Both the PhD and MA programmes are offered in most of the disciplines: Chinese, English, Linguistics & Multilingual Studies, History, and Philosophy. The School offers Graduate Research Degrees in all of these disciplines.

Graduate Programmes by Coursework

- 1 Master of Arts in Translation and Interpretation

The Master of Arts in Translation and Interpretation (MTI) Programme focuses on English to Chinese and Chinese to English translation. It serves not only to bridge the gap between different disciplines in academia and industry, but also adds to the intellectual breadth of NTU as a comprehensive university.

A photograph of four students, three women and one man, gathered around a laptop. They are all smiling and looking at the screen. The man is in the background, wearing a light blue shirt. The woman next to him is wearing a black and white patterned top. The woman in the foreground is wearing a brown hijab. The woman on the left is wearing a floral top. The laptop is a silver Apple MacBook.

The School of Humanities provides a rigorous and holistic education to develop students into well-rounded individuals who are able to think out of the box and articulate their ideas clearly and confidently. The School offers undergraduate and graduate programmes in Chinese, English, History, Linguistics & Multilingual Studies, and Philosophy. Currently, we have about 250 students pursuing graduate studies with us.

For more information on the Graduate Programmes (Research), please visit our website at www.soh.ntu.edu.sg/Programmes/Graduate/Pages/Home.aspx

For more information on the Graduate Programmes (Coursework), please visit our website at <http://www.soh.ntu.edu.sg/Programmes/Pages/Programmes.aspx>

You can also write in to us at soh_pg@ntu.edu.sg

1 Ms Darlene Espena
Graduating PhD student in
History and previous Chair
of HSS Graduate Student
Committee

Through the school's support to provide the necessary resources to ensure optimal academic and social experience, I was able to attend an exchange program in Japan, a summer school in China, an international conference in the United Kingdom as well as represent NTU twice at the St. Gallen Symposium in Switzerland – a global gathering of today's political and economic leaders and highly selective representatives from the youth. Through these events, I was able to expand my network, discuss relevant issues and debates with people from different backgrounds, and learn from diverse perspectives and cultures. Simply put, HSS has afforded me the opportunity to expand my horizon and accumulate varied learning experiences in Singapore and across the globe.

2 Ms Zhang Hai Jie
PhD Graduate in Chinese

The journey to my PhD goes beyond mere academic milestone. While my knowledge has been enriched, the biggest gain for me has been the change in attitude in all areas of my life. The diligence required in pursuing my research has instilled in me the need to establish facts, and to remain objective in approaching any matter. This has a direct bearing in my handling of news, which is my job.

On another level, the pursuit of my degree has also impressed on me the need to have an open mind, and to see things beyond the surface. Research work has taught me that there are many layers and dimensions to many aspects of our lives. Most importantly, the perspective of an issue can vary greatly depending on one's position. That awareness has reinforced the need to be less judgemental, and to be more analytical and understanding.

In sum, I would say the pursuit of higher studies goes beyond the academic milestone. It has become a way of life.

3 Mr Wong Wen Pu
Graduating MA student
in English

Life as a graduate student in HSS has been immensely fulfilling. Within an academic year, I have had the opportunity to present in two overseas conferences and symposiums, in the United Kingdom in 2015 and Japan in 2016. Through HSS, I got to interact with scholars from different intellectual backgrounds, explore new countries, gain new cultural perspectives. I also collaborated with two other HSS student editors on a book, "This is how you walk on the moon" – an anthology of experimental fiction that taps on both emerging and experienced voices from people all around Singapore and overseas which was published in 2016.

3

Professor Liu Hong
Tan Kah Kee Endowed
Chair, School of Social Sciences

It is my great pleasure to welcome you to Graduate Studies in the School of Social Sciences at NTU. We have well-established Ph.D. programmes in Economics, Public Policy and Global Affairs (PPGA), Psychology, and Sociology, as well as M.A. by research in the latter two disciplines. In addition, the School offers the Master of Science in Applied Economics and in Applied Gerontology as coursework programmes. We provide a supportive and intellectually stimulating environment for young and aspiring researchers who are keen to push boundaries and discover new knowledge and solutions to pressing issues confronting the world. As a student in our School, you will be mentored by dedicated and internationally renowned faculty members who are at the forefront of cutting-edge interdisciplinary research. I welcome you to explore the enriching learning and research programmes offered by our School and look forward to future opportunities of interacting with you.

School of Social Sciences (SSS)

Graduate Programmes by Research

- 1 **Doctor of Philosophy**
- 2 **Master of Arts**

Both the PhD and MA programmes are offered in most of the disciplines: Economics, Psychology, Public Policy & Global Affairs, and Sociology. The School offers Graduate Research Degrees in all of these disciplines.

Graduate Programmes by Coursework

- 1 **Master of Science in Applied Economics**
- 2 **Master of Science in Applied Gerontology**

The Master of Science in Applied Economics equips students with the necessary skills to excel in economic policy analysis by utilizing techniques such as econometrics, financial applied econometrics, cost-benefit analysis, project evaluation, and financial modelling, etc. Such skills are very useful for economic analysis of social policy, investment, and portfolio management.

The Master of Science in Applied Gerontology offers a holistic and interdisciplinary education, integrating important bodies of knowledge from social and behavioral sciences, health and medicine, business and public policy, as well as design and engineering to form a comprehensive curriculum for ageing. While the core syllabus focuses on the foundations of gerontology shared by multiple disciplines, the concentration courses and electives allow students to pursue active learning and practical experiences that complement their individual and professional interests.

A photograph of three people (two men and one woman) in a modern, multi-story building with large windows and balconies. They are standing on a balcony or walkway, looking at each other and smiling. The man in the center is wearing a blue striped shirt and glasses, and is gesturing with his hands. The woman on the left is wearing a grey cardigan over a black top. The man on the right is wearing a white shirt and glasses. The background shows the building's architecture with grey panels and large windows.

The School of Social Sciences prepares students for a global future by providing them with a nurturing environment to develop into critical, analytical and creative thinkers. The School offers undergraduate and graduate programmes in Economics, Psychology, Public Policy & Global Affairs and Sociology, as well as interdisciplinary subjects such as Environmental & Urban Studies and Global Asia.

For more information on the Graduate Programmes (Research), please visit our website at <http://www.sss.ntu.edu.sg/Programmes/Graduate/Pages/Home.aspx>

For more information on the Graduate Programmes (Coursework), please visit our website at <http://www.sss.ntu.edu.sg/Programmes/Pages/default.aspx>

1 Oei Chie Ming, Adam
PhD Graduate in Psychology

I graduated from NTU with a PhD in Psychology in 2015. Looking back, the time spent at HSS helped develop me as an independent researcher. My advisor was very encouraging and helped me to think beyond my research interests. Moreover, the grad level courses that I took were rigorous and looking back definitely helped prepare me for my current work. My fondest memories, however, were the relationships with my peers which allowed us to share our journey and milestones in our studies. Fond memories indeed!

2 Liu Hengshuang
PhD Graduate in Psychology

In the last 5 years, what I always appreciate is that the school will never leave any student unattended. Whenever I met any problem, there was

always someone (Lydia, Lela, Siti, Ivy, Christina) there ready to lend me a warm hand... As an oversea student, I can literally feel what the school has done to make me feel more at home... There are so many earnest moments that I will definitely store them in my deepest heart forever no matter where I will be in the future.

3 Edward Halim
PhD graduate in Economics

I am deeply grateful for the immense opportunities provided by HSS while pursuing a PhD degree in Economics. The school is well-equipped with advanced laboratories and academic resources critical for implementing complex experimental asset market projects for my dissertation. I have greatly benefited from intellectual discussions and knowledge sharing from dedicated professors and fellow students in the freshmen coursework, the brownbag seminars and the EGC series. The school has allowed me to develop stronger

teaching skills while serving as a tutor, in three different undergraduate modules with more than 300 hours of lesson.

Through the school's funding and support, I have presented papers in both local and international conferences such as the 4th International Workshop (Xiamen), SERC 2015, EF 2015 (Nijmegen) and ESA 2016 (Jerusalem, Tucson). I have also attained invaluable organizational experiences while serving in the 2013 HSS Graduate Student Committee.

I am particularly grateful to my supervisor, Prof. Yohanes Eko Riyanto, whom has provided unwavering support, tremendous help and guidance, and abundant opportunities to learn while working together with all the co-authors of the three papers. Thank you once again NTU HSS!

Professor Charles T. Salmon
Chair, Wee Kim Wee School of
Communication and Information

In the Wee Kim Wee School, skills that you learn will open many doors and create many opportunities for fulfilling jobs and meaningful social impact. You can also participate in shaping the future of communication and information industries by working side-by-side with internationally acclaimed experts in corporate communications, data analytics, data visualisation, digital storytelling, e-games, mobile communication, public relationship, and virtual reality.

Our School prides itself on its strong industry alignment and partnerships, cutting-edge facilities and excellent faculty. We work hard, we enjoy what we do, and we share a passion for making a difference. The results speak for themselves: our alumni are award-winning media professionals and leaders of media industries throughout the world. Join us and help shape the future of communication and information industries in Singapore and beyond.

Wee Kim Wee School of Communication & Information (WKWSCI)

Graduate Programmes by Research

- 1 **Doctor of Philosophy**
- 2 **Master of Communication Studies**

Graduates will be prepared for a research-oriented career in academia or in communication and information industry. The programmes will equip graduates with research skills and mental tenacity to cope with future challenges in research and teaching.

Graduate Programmes by Coursework

- 1 **Master of Mass Communication**
- 2 **Master of Science in Information Studies**
- 3 **Master of Science in Information Systems**
- 4 **Master of Science in Knowledge Management**

These programmes blend theory and practice and they are designed to educate and transform the graduates from various backgrounds into a new generation of professionals. They are continually revised to keep pace with emerging trends and latest industry developments.

Wee Kim Wee School of Communication and Information (WKWSCI) is reputed as one of Asia's best communication schools. It is an institution that generates empirical and humanistic analyses of communication and information topics and policy issues important to Singapore and the region.

For more information on graduate programmes do visit our website at <http://www.wkwsci.ntu.edu.sg/programmes/ProspectiveStudents/Graduate/Pages/Home.aspx> or view our faculty profiles <http://www.wkwsci.ntu.edu.sg/aboutus/OurPeople/Faculty/Pages/Home.aspx>.

You can also write in to us at WKWSCI_Admissions@ntu.edu.sg or WKWSCI_GradResearch@ntu.edu.sg

1 **Dr Shi Jingyuan**
PhD graduate from WKWSCI

The doctoral programme at WKWSCI offers me an interdisciplinary perspective for doing communication and information research with a multiplicity of methods. It has been a privilege to work with many extraordinary scholars here. Such collaborations have afforded me opportunities for presenting award-winning paper at international conferences and publishing articles in top communication journals.

2 **Mr Sukumar Warriar Vinay**
Master of Science graduate in
Information Studies

The MSc Information Studies programme at WKWSCI in NTU is what one would call the new generation higher education mix.

I joined this programme with a desire to find a cornerstone to explore data analytics and communication research. The first semester exposed me to various fundamentals of data science and information management such that I could already build on it. The projects I did in my first semester gave me confidence to inquire into a variety of problems assuredly.

I love the syllabus and the flexibility, and have chosen to pursue a dissertation in machine learning and text analytics. I must say the Graduate Legacy Fund Scholarship has been an immense confidence booster and encourages me to explore the world with my newly equipped knowledge.

3 **Ms Tan Xiu Ye**
Master of Mass Communication
graduate

The Master of Mass Communication offered by WKWSCI is a good complement to my first degree in Environmental Engineering. It has provided me with insights on communication issues and practices.

With carefully selected texts and engaging group discussions, we explored meaningful exchange of ideas. Perhaps the most valuable part of the programme is being taught by leading experts in the communication field. Besides developing IT knowledge, for example the use of SPSS and R programming, the programme also equipped me with soft skills which I believe will prepare me for my future appointments.

The College of Humanities, Arts, and Social Sciences takes a special interest in examining the rise and relevance of Asia from the perspective of an interconnected global context. Working together with the Interdisciplinary Graduate School (IGS) on one of the Peaks—Global Asia, the research will adopt an interdisciplinary perspective to explore global and local issues such as social change, economic development, ethnic and cultural identity, and multilingualism.

Interdisciplinary Graduate School (IGS) PhD Programme

Global Asia

The Global Asia Peak brings a new focus and understanding to Asia's rapid transformation and its connection to the rest of the world, integrating a broad spectrum of research strengths across the University including business studies, social sciences, the humanities, engineering and the natural sciences. The Peak takes advantage of Singapore's geographical position at the heart of Asia and NTU's competitive advantage in business studies, international policies and the arts as well as strong roots and links to China, Japan, Korea, India and the surrounding parts of Southeast Asia. Asia accounts for 60% of the world's population, one third of its GDP, and is now recognised as the supply chain

and manufacturing hub of the planet. Understanding the new Global Asia and its continuing growth is of particular relevance to Singapore. Researchers in Global Asia will contribute to the national development of Singapore in the Asian context, and offer academic leadership in this dynamic field by focusing on three key areas - Business Asia, Cultural Asia and Transformational Asia.

There are three key foci in this Peak:

- 1 **Cultural Asia - culture, language and communications**
- 2 **Transformational Asia - social transformation and resilience**
- 3 **Business Asia - business and economic growth**

The programme will bring a new focus and understanding to the rapid transformation of Asia and its linkages to the rest of the world. It will integrate a broad spectrum of research strengths across the University including business studies, social sciences, the humanities and the natural sciences.

For enquires on Global Asia Programme, please e-mail **Associate Dean (Graduate Education) - HASS**.

For more information on graduate programmes do visit our website at <http://cohass.ntu.edu.sg/Programmes/Graduate-Programmes/IGS/Pages/Home.aspx>

You can also write in to us at **AD-HASS-ACAD@ntu.edu.sg**

Nanyang Centre for Public Administration (NCPA) at NTU is a leading institution in Asia that provides public governance and administration training programmes for regional and international organisations. It promotes good governance and public services, facilitates knowledge exchanges, and strengthens cooperation between governments across the world. NCPA offers four Master's degree programmes, including what used to be commonly known as "Mayors' Class", as well as Executive Training Education Programmes covering topics such as public administration and governance, urban planning, social management, and management of higher learning institutions. Concurrently, NCPA conducts and facilitates interdisciplinary fellowship and research programmes. NCPA has over 15,000 alumni across China and Southeast Asia, and many of them are holding decision-making positions in the government, including ministerial-level leaders, mayors, and heads of organisations.

Nanyang Centre for Public Administration (NCPA) programmes

Programmes offered are:

- 1 **Master of Arts in Contemporary China**
- 2 **Master of Public Administration
(English or Chinese)**
- 3 **Master of Science in Managerial
Economics (Chinese)**

For more information on the Graduate
Programmes, please visit our website at
<http://www.ncpa.ntu.edu.sg>

You can also write in to Ms Yew Siew Peng
at NCPA-DP@ntu.edu.sg.

Student Life

The educational offerings available here at NTU are complemented by the world-class facilities available. After a hard day's work of studying at The Hive, graduate students may enjoy on-campus shopping and dining opportunities at the North Spine Plaza or work up a sweat at our new eco-friendly sports hall, The Wave.

On campus, academic life is complemented by Student Life – learning beyond the curriculum. It entails a willingness to try something new – to develop new skills, discover new interests and make new friends. HASS students are valued members of the NTU community. Each and every student is a co-owner, co-creator and co-driver of the NTU Student Experience. In NTU, graduate students lead the student population and they work together with faculty members and their peers to shape the philosophy of life on campus. Through the Campus Community Approach to Student Health and Wellbeing, students will get the support and advice they need in diverse areas such as health, time management, relationships and financial and living arrangements.

1 Lau Fun

PhD Student
Secretary, HSS Graduate Students
Committee (AY 2016/17)

“As a postgraduate research student at HSS, I have been given ample freedom to pursue my research interests, such that I could embark on a research project that I was truly passionate about. My supervisor has been very supportive throughout, and was always there for my labmates and me both on a professional and on a personal level.

The school regularly organizes talks and seminars that cater to the wide-ranging interests of HSS graduate students, providing us with the opportunity to engage in fruitful dialogues with top researchers in their respective fields.

In addition, the school also provides generous support for graduate students to enrich our

academic portfolio through the means of overseas research attachment and conference allowances.

Outside of academic life, there are various social events organized by the HSS graduate students committee, providing us with a platform to get to know other graduate students in HSS. Overall, the HSS graduate experience is no doubt challenging, but definitely rewarding.”

- 1 Interact, socialise, and cross-pollinate ideas at our campus study space, The Hive.
- 2 Feast and shop at the North Spine Plaza.
- 3 Work up a sweat, and then enjoy the natural cool air at our innovatively engineered new Sports Hall, The Wave.

3

The university offers attractive scholarship schemes for promising students who wish to pursue their PhD and Masters with NTU:

The **Nanyang President's Graduate Scholarship (NPGS)** is a competitive and prestigious scholarship scheme designed to encourage outstanding graduates or final-year students to take their first step towards a leading research career by studying for a PhD at NTU. Open to students of all nationalities, the bond-free scheme offers a high monthly stipend, conference and IT allowance, etc.

The **NTU Research Scholarship** is another highly sought after scholarship scheme available to students who are keen to pursue a PhD/Masters and embark on research with NTU.

The College and our Schools also award full scholarships to bright students gearing towards the Masters route with CoHASS.

For more information on the various scholarship and financial assistance schemes that are available, please visit

www.admissions.ntu.edu.sg/graduate/scholarships/Pages/default.aspx
