FlexiMasters

Towards Mastery of Skills

GO FURTHER, FASTER

Nanyang Technological University, Singapore (NTU) has launched FlexiMasters to provide flexible learning pathway to support the endeavours of individuals to build their micro-credentials through Continuing Education and Training (CET).

WHY FLEXIMASTERS

FlexiMasters seek to provide working professionals and our alumni alternate and flexible pathways to upskill, boost their employability or pursue their intellectual enrichment through a selected range of academic accredited CET courses that can be stacked towards a FlexiMasters certificate awarded from an acclaimed University.

You will be able to choose from a wide spectrum of multi-disciplinary areas offered by NTU's colleges and schools, institutes and centres to expand your knowledge and skills at your own time and pace, and at the same time remain competitive and improve career-prospect in this fast-growing industry.

The involvement of industry practitioners, where applicable, in designing the FlexiMasters curricula and providing their valuable industry-relevant expertise in the course content (together with the various NTU colleges and schools, institutes and centres) and mode of delivery, thereby bringing in industry/market perspectives to the learners, is a key component of the FlexiMasters.

FLEXIMASTERS PATHWAY

While formal recognition of postgraduate education in the form of a Master's or PhD degree may appeal to some, the majority of working professionals may prefer learning through standalone courses. These courses can be taken from NTU Postgraduate (PG) Degree Programmes. Upon successful completion of each course, learners will earn a Statement of Accomplishment, which can be used to stack towards a Graduate Certificate and an NTU FlexiMasters.
