

ADM INTER DISCIPLINARY COURSES

DM2007

Interactive II

Eligibility: ADM (DA Majors) / IEM

Pre-requisite: DM2000

(can be waived subject to approval)

Louis-Philippe Demers (Associate Professor)

Tuesdays, 09:30- 12:20 at ART-01-11A + Truss Room

Renee, Einethan, Jarren, ZiHao

22

You will further explore modes of interaction, their computational methods and their systemic relationships: making sense of the environment (input), processing this information and acting in the environment (output via diverse media). The class will promote interdisciplinary problem-solving via experimental art and speculative design for this rapidly expanding and transforming field.

Notions of responsiveness and real-time, digital transformations and readability will be addressed in the interactive scenarios found in: experimental interface design, physical computing, information visualization, realtime audiovisuals, mobile media, vision based interactions, augmented reality, simulation, robotic art and other situations.
