

COURSE CONTENT

Academic Year	2022-2023	Semester	1
Course Coordinator	Dr Lim Tuti Mariana		
Course Code	EN4001		
Course Title	Environmental Impact Assessment & Monitoring		
Pre-requisites	Year 4 Standing		
No of AUs	3		
Contact Hours	Lecture: 39 hrs; Tutorial: 0 hr; Lab: 0 hr		
Proposal Date	17 January 2022		

Course Aims

This course aims to provide you with an understanding of the basic principles of an environmental impact assessment (EIA), the causes of impacts and the use of a formal EIA. You will be exposed to EIA concepts and methodologies relating to social, engineering, and economic issues. You will also learn to understand the purpose of monitoring and developing follow-up procedures as well as options for designing these procedures. After successfully attending the course, you should be able to prepare a simplified version of an Environmental Impact Statement or EIS.

Intended Learning Outcomes (ILO)

By the end of this course, you (as a student) would be able to:

1. Explain the role of EIA in environmental management for sustainable development.
2. Identify the strengths and limitations of EIA.
3. Familiarise with various impact identification and analysis methods.
4. Undertake and prepare EIA studies and reports including monitoring and follow-up procedures.
5. Evaluate the technical and social economic impacts on the quality of the EIA reports.

Course Content

Environment systems; benefit and constraint of EIA, basic information on types and characteristics of impacts; EIA legislation, trends and application, EIA process including screening, scoping, preparation of EIA report, EIA review and follow-up, impact assessment and analysis; planning tools; assessment methodologies and indices; water, air, noise, social and economic impacts; management of impacts.

No	Topic	Lecture Hrs	Tutorial Hrs
1.	Background and introduction to Environmental Systems and the EIA process	3	
2.	EIA Legislation, Policy & Regulatory framework	2	
3.	Public Involvement	1	
4.	EIA Procedure: Screening & Scoping	3	
5.	EIA Methodologies & Impact Analysis	6	

6.	EIA Procedure: Mitigation & Impact Management including Monitoring & Auditing	4	
7.	EIA Procedure: Reporting & Review	2	
8.	EIA Procedure: Decision making, Implementation and Follow-up	2	
9.	Project Management	1	
10.	Introduction to Impact Assessment on environment component such as air, water and noise	10	
11.	Group Project Presentation: A simple attempt at an EIA project	5	
	Total	39	

Assessment (includes both continuous and summative assessment)

Component	Course LO Tested	Related Programme LO or Graduate Attributes	Weighting	Team/ Individual	Assessment rubrics
1. Final Examination	1, 2, 3, 4, 5	EAB SLOs A, C, F, G, K	50%	Individual	
2. Continuous Assessment 1 (CA1): Quiz	1, 2, 3, 4, 5	EAB SLOs A, C, F, G, K	20%	Individual	
3. CA2: Group Project Presentation	1, 2, 3, 4, 5	EAB SLOs E, F, G, H, I, J, K, L	30%*GF*MF	Team & Individual	Appendix 1, 2 & 3
Total			100%		

*Notes *: The group project assessment for this course is also reliant on you working closely as a team to complete the project. Besides, it also aims to train you to review the quality of others' group projects and to encourage active group participation. Hence, Group Rating Factor (GF) and Modification Factor (MF) will be applied to account for both the group and individual contributions to the group project work. The GF is derived from group evaluation submission while MF is derived from panel judges' feedback, weekly discussion session and peer assessment. For more details on the GF and MF calculations, please see Appendix 2 and 3, respectively.*

*SLOs = Student Learning Outcomes for Environmental Engineering Programme (per BEng Environmental Engineering Accreditation)

Related Programme LO or Graduate Attributes

- A. Engineering knowledge:** Apply the knowledge of mathematics, natural science, engineering fundamentals, and an engineering specialisation to the solution of complex engineering problems;
- B. Problem Analysis:** Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences;

- C. Design/development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- D. Investigation:** Conduct investigations of complex problems using research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions
- E. Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- F. The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- G. Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for the sustainable development.
- H. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- I. Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.
- J. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- K. Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and economic decision-making, and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- L. Life-long Learning:** Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Formative feedback

The quiz questions will be discussed, and you will be able to view your quiz grade individually through Blackboard Grade Centre.

Comment on each group presentation will be given and each group will also submit comment with respect to other groups' presentations to the course instructor by email. The group presentation grade will be released through Blackboard Grade Centre.

Learning and Teaching approach

Approach	How does this approach support students in achieving the learning outcomes?
Lecture	Formal lectures on topics with in-class discussions
Group Presentation	This helps to achieve one or more of the outcomes as they need to do self-study and research as well as promote team works.

Course Policies and Student Responsibilities

(1) General

Students are expected to take all scheduled assignments and tests by due dates. Students are expected to take responsibility to follow up with course notes, assignments and course related announcements. Students are expected to participate in all group project discussions and activities.

(2) Absenteeism

Group work requires each member to contribute to team-work. Valid reasons include falling sick supported by a medical certificate and participation in NTU's approved activities supported by an excuse letter from the relevant bodies. There will be no make-up opportunities for in-class activities.

Academic Integrity

Good academic work depends on honesty and ethical behaviour. The quality of your work as a student relies on adhering to the principles of academic integrity and to the NTU Honour Code, a set of values shared by the whole university community. Truth, Trust and Justice are at the core of NTU's shared values.

As a student, it is important that you recognize your responsibilities in understanding and applying the principles of academic integrity in all the work you do at NTU. Not knowing what is involved in maintaining academic integrity does not excuse academic dishonesty. You need to actively equip yourself with strategies to avoid all forms of academic dishonesty, including plagiarism, academic fraud, collusion and cheating. If you are uncertain of the definitions of any of these terms, you should go to the [academic integrity website](#) for more information. Consult your instructor(s) if you need any clarification about the requirements of academic integrity in the course

Planned Weekly Schedule

Week	Topic	Course LO	Readings/ Activities
Week 1	Background and introduction to Environmental systems and the EIA process.	1 & 2	Lecture
Week 2	EIA Legislation, Policy & Regulatory framework. Public Involvement.	1, 2, 4 and 5	Lecture
Week 3 - 8	EIA Procedure: Screening & Scoping; EIA Methodologies & Impact Analysis; Mitigation & Impact Management; Reporting & Review; Decision making, implementation and follow-up.	1, 2, 3, 4 & 5	Lecture
Week 9-11	Project Management. Introduction to EIA on water, air and noise environment.	2, 3, 4 & 5	Lecture
Week 12-13.	Group Project Presentation: A simple attempt at an EIA project	1, 2, 3, 4 & 5	Group Project Presentations

Appendix 1: Assessment Criteria for Group Project and Presentation

The assessment of the group project presentation will be based on assessment by the tutor, group peer evaluation and peer review evaluation.

Assessment Rubric by Tutor (weightage = 30%)

Criteria	Good (8-10)	Ave (6-7)	Fair (4-5)	Poor (1-3)	Remarks
Introduction/Project Background (20%)					Well defined project; clear background and objectives.
Impact Analysis (25%)					Selection and application of impact Identification methods
Mitigation Measures (25%)					Application of impact mitigation measures (avoid, minimize and compensate)
Presentation format and layout (10%)					Clear and concise; good grammar and spelling with appropriate Tables/graphs/Figures;
Clarity of expression / Style of presentation (10%)					Slides are presented well with logical sequence
Ability to answer questions (10%)					Able to defend ideas or rebut criticism
TOTAL					

Appendix 2: Assessment Rubric for Group Evaluation

Each group will evaluate the presentation of the rest of the groups and rate them in numerical order with one (1) being the best presentation. For example, if there are 8 groups in total, then each group will rate the rest of the 7 groups from 1 to 7. The group members are encouraged to discuss among themselves first before deciding to rank the rest of the 7 groups. The purpose of this group evaluation is to encourage participation and team-work and review training i.e. training to review the quality of project presentations.

The criteria used to evaluate the group presentation are:

1. Content of the presentation: background and objective, impact analysis and management.
2. Presentation format & Skills: clear and concise presentation; captivating, lively and engaging; smooth delivery within the time allocated as well as the ability to answer questions.

Average Group Assessment Score	GF
1	1.050
2	1.035
3	1.020
4	1.005
5	0.990
6	0.975
7	0.960
8	0.945

Note: GF will drop by 0.015 (1.5%) with decreasing group rating score.

Group evaluation assessment exercise will be done after the group presentation and it will be submitted by end of the semester by each group, hence the score will be applied to all members within the group.

In addition to group evaluation assessment, GF might be moderated by course coordinator.

Appendix 3: Criteria for Peer Assessment

Criteria	Outstanding: 4	Good: 3	Average, meet expectation: 2	Below expectations: 1
<i>Collaborative behaviour</i>	Cooperative and always delivered assigned tasks on time. Take initiative to help other to ensure success of team project.	Cooperative and always delivered assigned tasks on time. Willing to assist others upon request.	Stop short at delivering assigned tasks, sometimes after reminder(s).	Uncooperative, non-committed, always miss deadlines.
<i>Quality of works</i>	Quality of works higher than overall group quality, or go extra miles to assist teammate to enhance the quality of group works.	Good quality of deliverables under individual responsibility.	Acceptable quality of deliverables under individual responsibility.	Quality of works not acceptable.
<i>Ideas & participations</i>	Active participation and initiatives, good ideas & suggestions in enhancing the quality of group works.	Contributed suggestions and ideas to enhance the quality of group works.	Somewhat contributed in enhancing the quality of group works.	Did not participate in group works.

Average Peer Assessment Score	MF
3.51 to 4.00	1.05*
3.01 to 3.50	1.00
2.51 to 3.00	0.95
2.00 – 2.50	0.9
Below 2.0	Separate Assessment

Note: * - to cap the max moderated score at 100%

Peer assessment exercise will be anonymous and done towards the end of the semester.

For student who has average peer assessment score below 2.0, Course coordinator might contact/call up the student as well as the other team member(s) to further assess the appropriate MF.

In addition to peer assessment, MF might be moderated by course coordinator and panel judges from the interaction during consultation, feedbacks from the team members.
