

# Python Learning Platform

## Programming for everyone

**Student:** Wee Bing Chuan

**Supervisor:** Dr Li Fang

00:49:54 End Quiz

Question 1 / 2

Reverse the order of a given array. Your function will accept an array and return a new array.

1

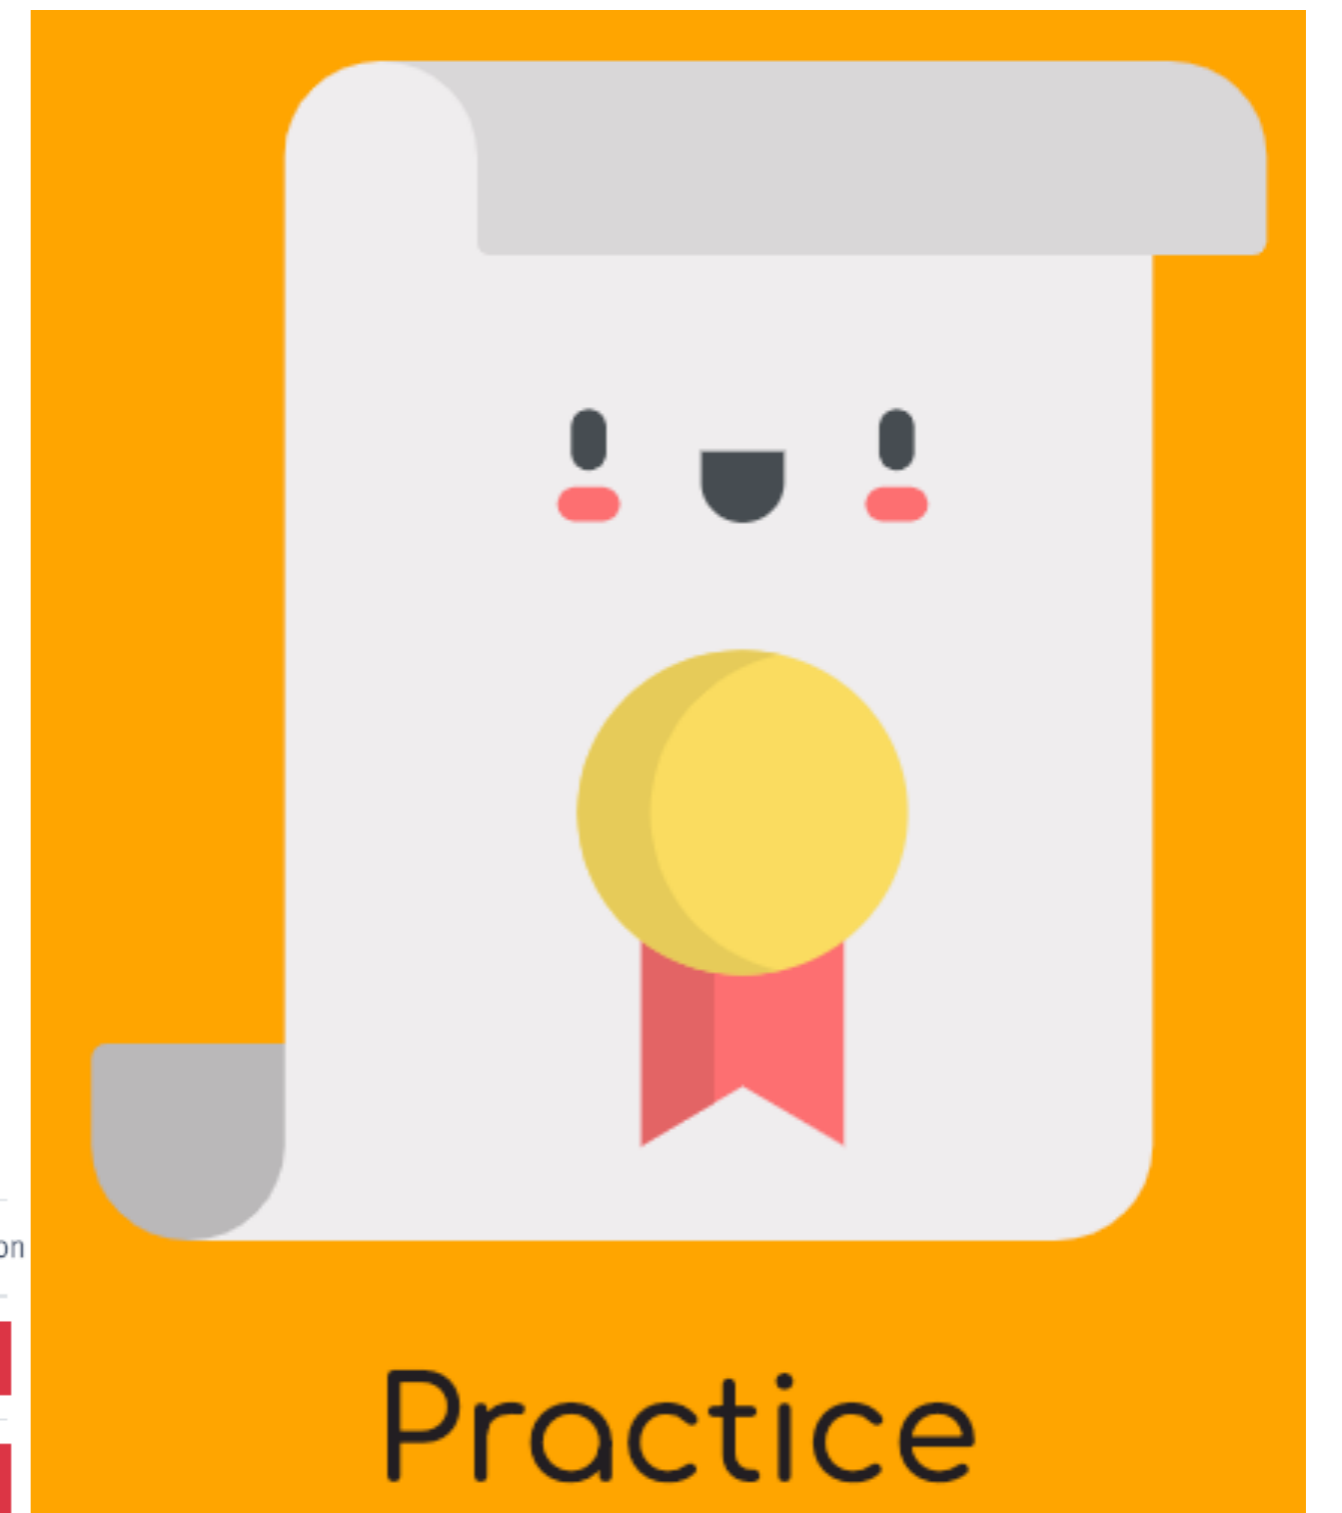

Type: Coding

Content: Reverse the order of a given array. Your function will accept an array and

Marks Per Correct Test Case: 1

Answers

No.	Test Case	Answer	Action
1	["a","b","c"]	["c","b","a"]	✖
2	[1,2,3]	[3,2,1]	✖

### Project Objectives:

An increase tech giants entering Singapore market looking to expand their companies has started to catch the attention of some students. While programming gain popularity, we need a more efficient method to help student learn and evaluate their progress. This is where Python Learning Platform fits right in. A simple to use platform that does quiz the right way.
