

Schedule Planner and Course Evaluation (SPACE) System

Student: Png Qun Jia

Supervisor: Assoc Prof Hui Siu Cheung

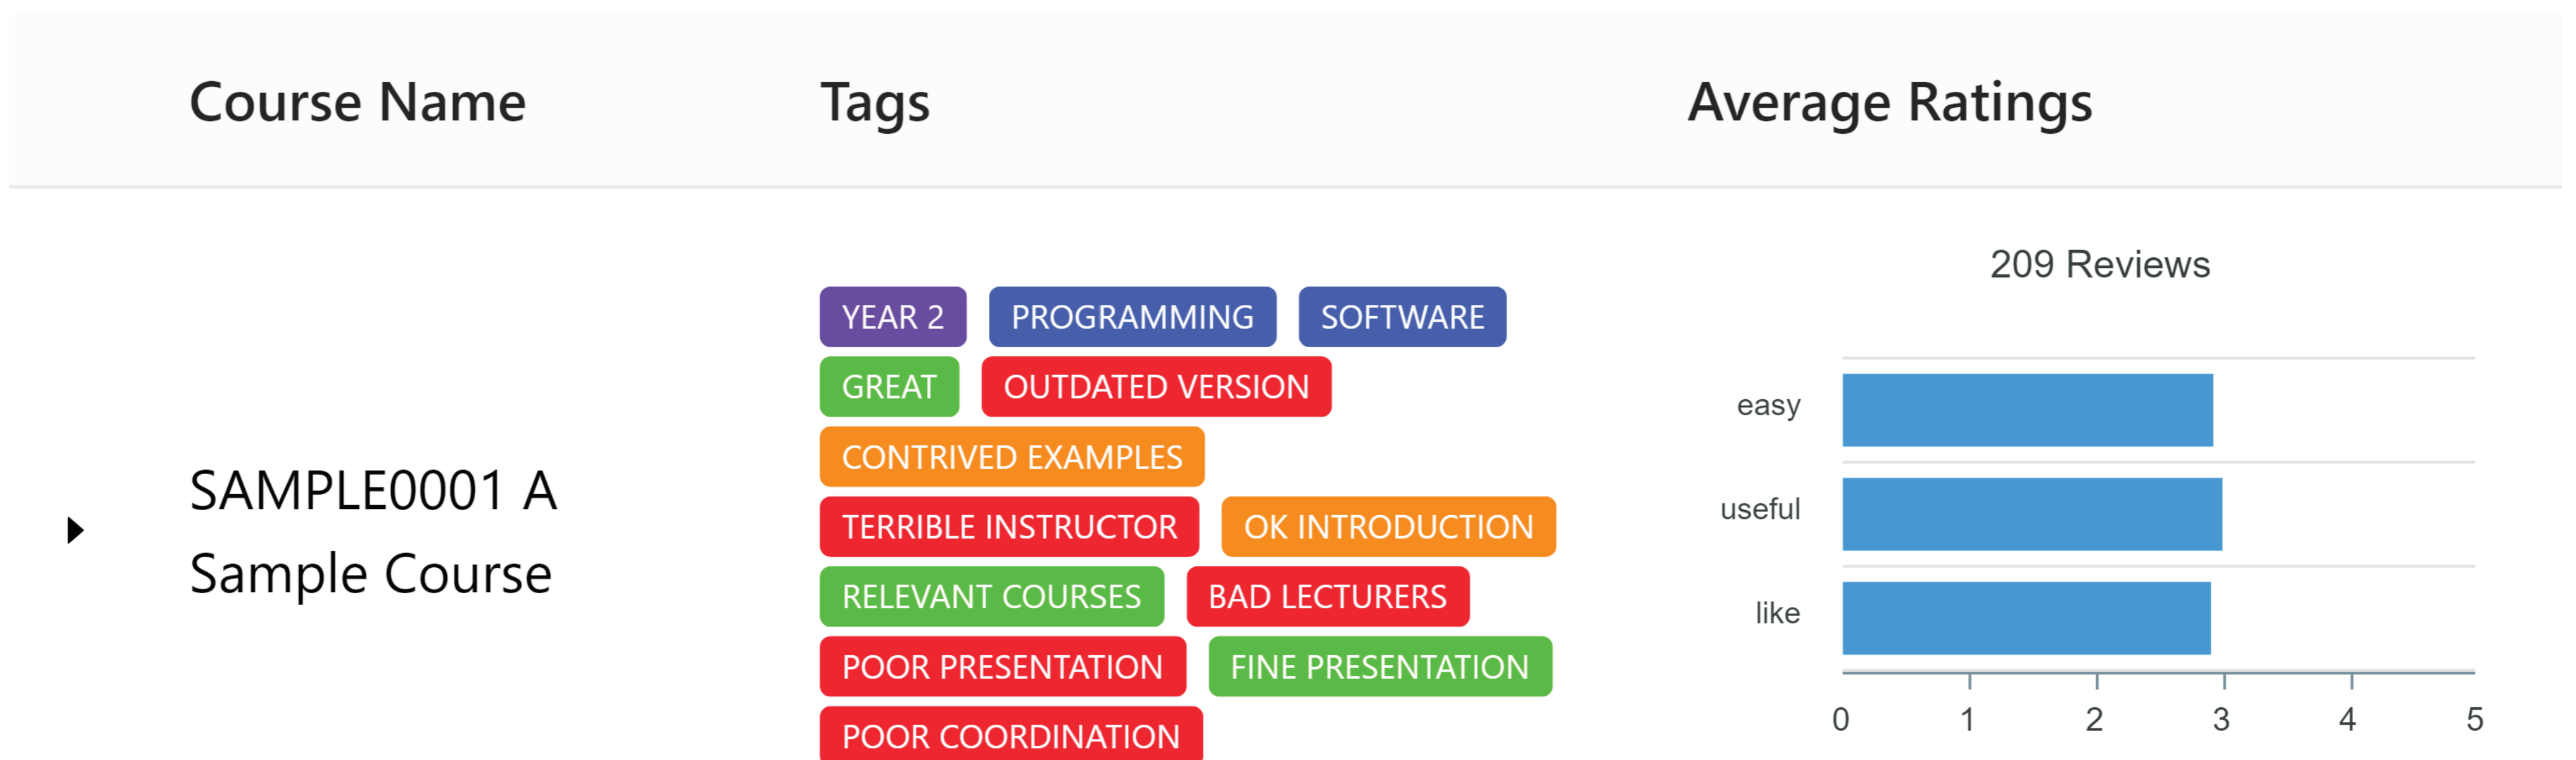

Scheduler Planner

Course Evaluation

This project aims to create a web-based interface for NTU students to manage, plans, and review courses. Several text mining techniques were employed to extract meaningful information from reviews, allowing students to get a brief overview of a course quickly and thereby make a better decision during course planning.

Course Ratings and Adjective-Noun Pairs Extracted from Reviews
