

# Carpark Adviser (Mobile App)

Student: Michael Seet Boon Hock

Supervisor: Mr. Oh Hong Lye

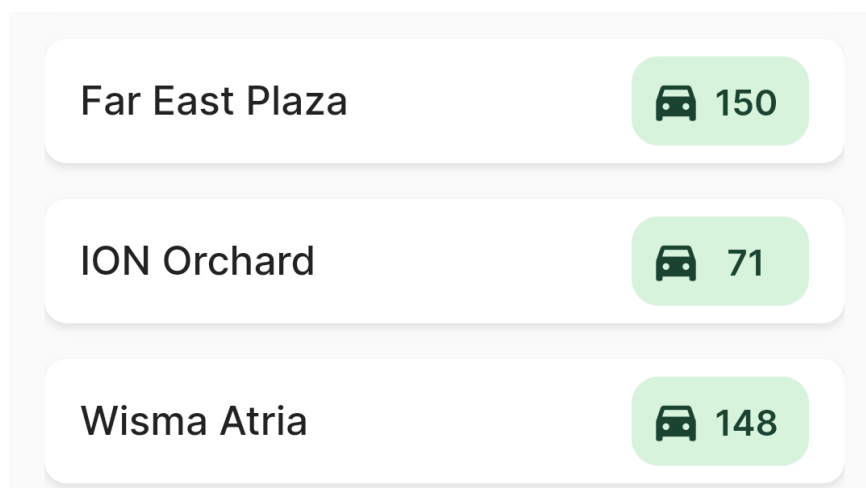

## Project Objectives

The Carpark Adviser is a mobile application that allows drivers to search for suitable car parks near their destination using criteria such as cost, proximity, and available lots, helping them narrow down their search based on the factors that are important to them. Through this application, drivers will hopefully have a better experience finding a car park of their choosing.

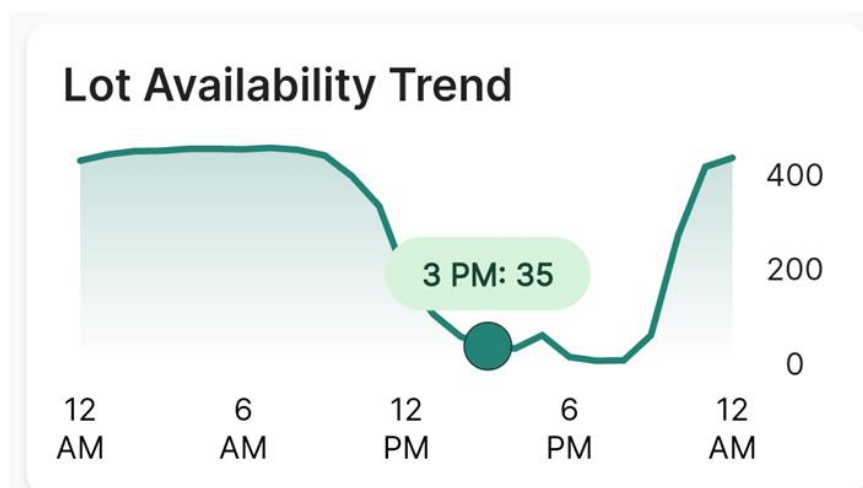

## Application Features

- Search Car Parks
- View Car Park Details
- Favourite Car Parks
- Navigation to Car Park

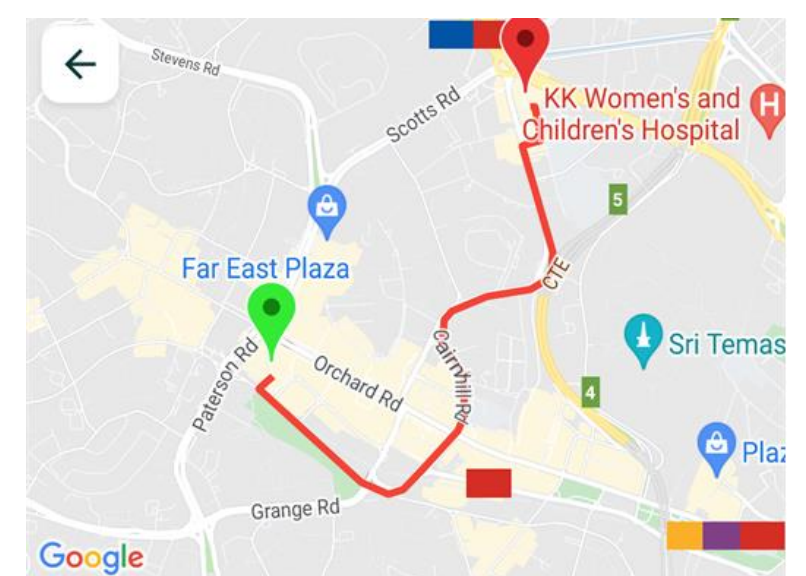

## Implemented With

Real-Time Lot Availability

Historical Lot Availability

Navigating To  
**ION Orchard**

Newton Food Centre

Distance to Car Park: **2.4 km**

Estimated Travel Time: **8 mins**
