

# Car park Sharing application

## The Ultimate Parking Sharing App for Drivers

Student: Noah Seah Kaixian

Supervisor: Dr Smitha Kavallur Pisharath Gopi

### Project Objectives:

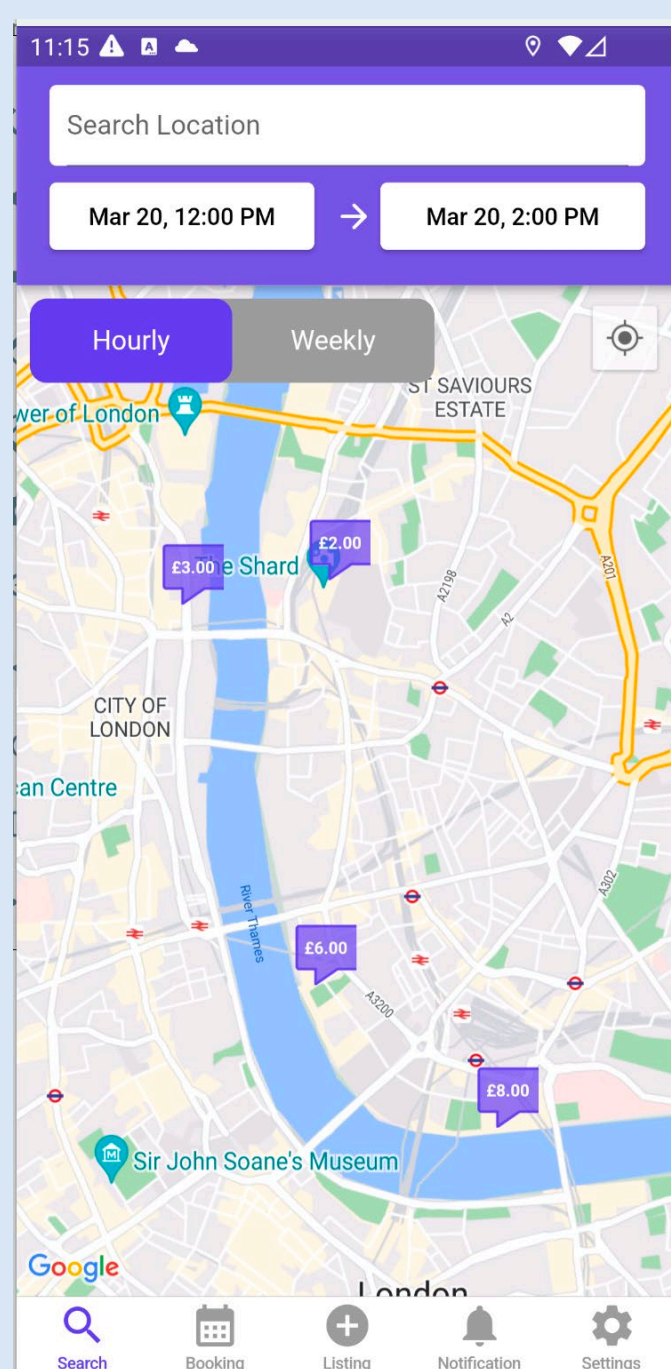

GoParking aims to connect car park providers and motorists to tackle the high cost and the low availability of parking in the UK. GoParking will allow car park providers to list their available parking spaces for rent and enable motorists to search and rent available parking spaces based on location and desired duration. By increasing the supply of parking spaces, GoParking aims to make parking more affordable and accessible.

### Features for Motorists:

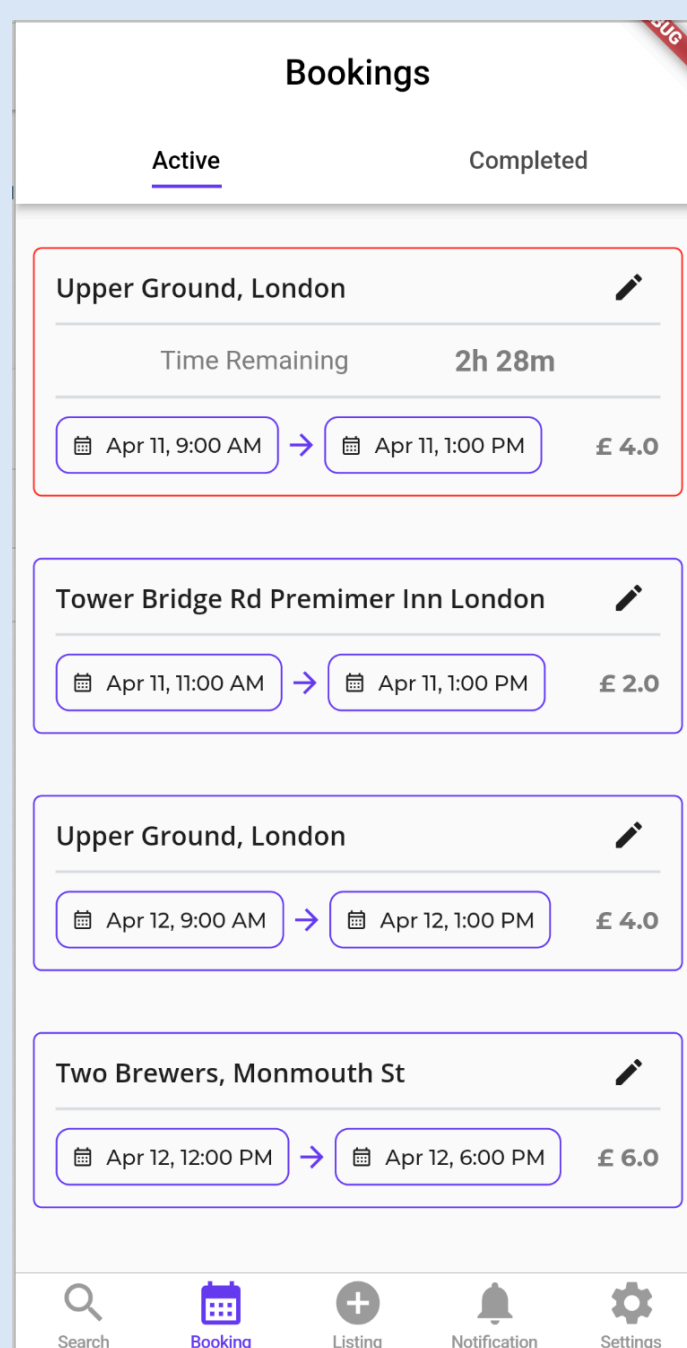

1. Search car park by time and location
2. Book car park
3. Extend, shorten or cancel booking
4. User reviews

### Features for Owners:

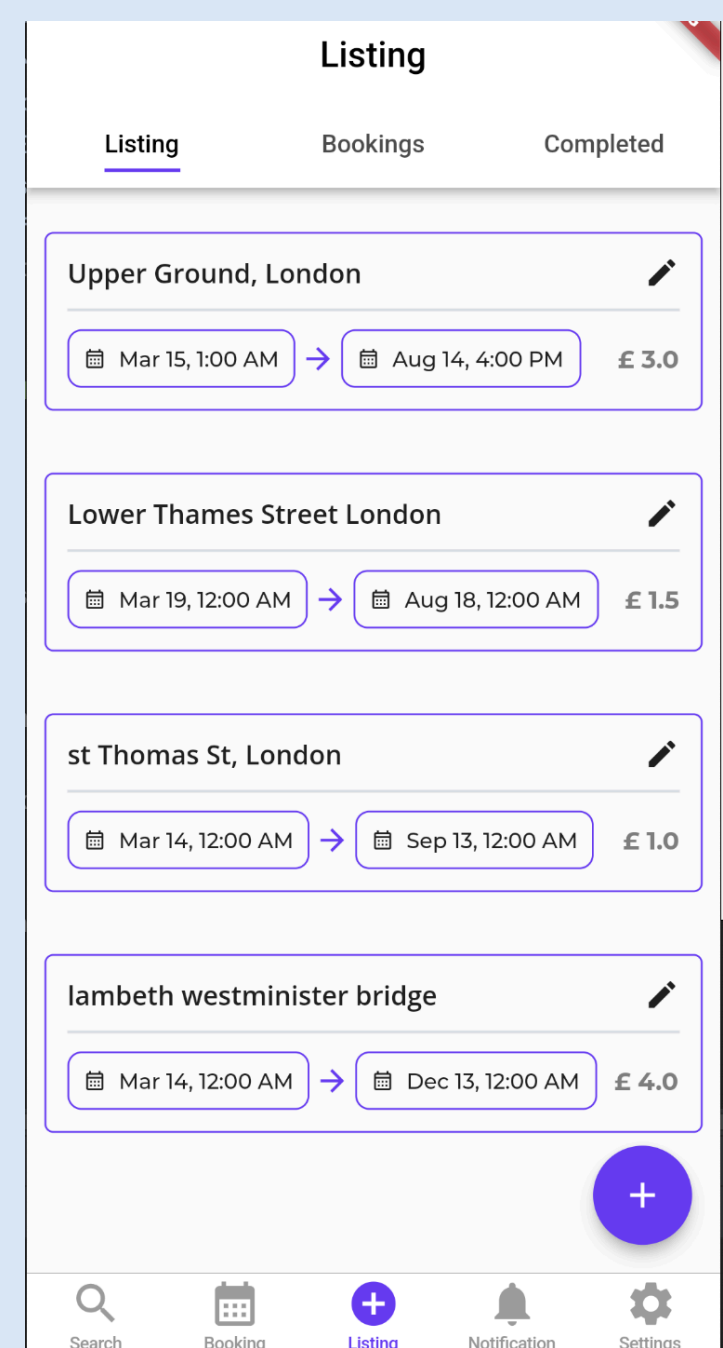

1. List car park space
2. Cancel bookings and edit listing
3. Notifications
4. View booking history
