During the second half of the twentieth century George Orwell's *Nineteen Eighty-Four* became a staple (if not a cliché) of political, cultural and sociological comment. Heavily promoted by state actors after the Second World War for propaganda purposes, it took on a counter cultural life of its own during the late 1960s and 1970s. Interest in the book was reinvigorated in the 1980s thanks to the arrival of new computer, media and military technologies. In 2017 sales of the novel reached a new peak. Orwell's novel only seems to have gained in momentum and relevance; its depictions of "Big Brother," of telescreens, and of the "forever war" have been uncannily prescient. This course examines in detail the long cultural tail of Orwell's canonical text from a multidisciplinary perspective.

The course work includes an extended, intensive study of a literary text in conversation with the methods, concepts, and practices of contemporary history. Due to its interdisciplinary nature, this course features deliberation on and assessment of different disciplinary methods, and the assignments challenge you to express your knowledge in new modes and to different audiences.
