

Ultramicroscopic world Shaping the future

JEOL Ltd. Japan, which started as a development and manufacturing company for electron microscopes in 1949, is highly regarded today as a global manufacturer of scientific and analytical instruments. JEOL products, indispensable to engineers and scientists including Nobel laureates, are used in universities, research institutes and industries in more than 130 countries around the world. JEOL has 70 years of expertise in the field of electron microscopy, more than 60 years in mass spectrometry and NMR spectrometry, and more than 50 years of e-beam lithography leadership.

Multi-function electron microscope *JEM-F200*

A field emission transmission electron microscope developed with the concept of energy saving and reducing carbon emission, with a smart appearance and interfaces that is easy to use for beginners and appreciated by experts.
