## An Editor's Perspective to Publishing at Nature Journals

*Dr Amos Matsiko*  
Senior Editor  
Nature Materials

### Abstract

---

In this presentation entitled 'An Editor's Perspective to Publishing at Nature Journals', Dr Amos Matsiko will give an overview of the journals within the Nature family and highlight the differences between them. He will talk about some editorial policies, steps in the peer-review process in the Nature journals as well as provide a summary of some important points to consider when preparing manuscripts for submission. Amos will also be available after the seminar to meet with researchers on a one-to-one basis to discuss about particular manuscripts or on-going projects which may be relevant for Nature journals.

### Biography

---

Dr Amos Matsiko is a Senior Editor at Nature Materials which is part of the Nature Publishing Group. He completed his PhD and post-doctoral research at the Royal College of Surgeons in Ireland in the field of biomedical engineering in a range of musculoskeletal and soft tissue applications. He has also carried out research in industry with Integra LifeSciences before starting his career in publishing at Nature Communications. Dr Matsiko then moved to Nature Materials where he is responsible for the broad field of bioengineering, encompassing mechanobiology, biomaterials development, drug delivery, biomarker sensors, tissue engineering and regenerative medicine. Dr Matsiko is based in London, UK.
