

## School of Mechanical & Aerospace Engineering

### MSc Project Management

#### Overview

There is a growing need for competent, qualified project managers in the sophisticated industries of the 21st century. The MSc in Project Management aims to educate project professionals to conceptualise, plan, develop, implement, and deliver successful projects. This generic project management programme offers a modular blended learning platform which encompasses face-to-face classes and self-paced learning with course contents aligned with Project Management Institute (PMI) and Industry 4.0. It is designed to support professional career development in the management of projects and to improve competence profiles of both students and their organisations.

#### Who should apply

The programme caters mainly to working professional who are seeking to advance their career in project management related roles. The programme is also open to full-time study on the condition that applicants have relevant working experience in project management.

Graduates from the programme are expected to find jobs and advance their careers in both private and public sectors that include: *Building and Construction, Manufacturing, Public Transportation, Aerospace, Healthcare, Defence, Offshore Marine, Oil and Gas, Hospitality, Travel, Information Technology.*

# QUOTE

“

I have enjoyed the campus life at NTU throughout my master degree. It is not just about knowledge learning but also on social life with new classmates and professors.

”

Chan Siew Mei

“

Being able to relate what was taught, against what was practiced in my company deepened my understanding on why certain decisions were made and procedures were implemented within my organisation.

”

Liew Bao Han Chester
