

Undergraduate Part-Time Programme

Final Year Project

The final year project (FYP) is an integral and important part of the degree programme. It is equivalent to 8 academic units (AUs), and the award of honours is dependent upon the student's performance in the FYP.

In accordance with the Table of Curriculum, students are scheduled to commence FYP in Year 3 Semester 2. It is to be completed over three semesters and one special term. No extension of this period is allowed.

However, to qualify for commencement of the FYP, students must have:

- Gained Waiver of MA2079 Engineering Innovation & Design (EID) and MA3079 Professional Internship (PI) **and**
- Accumulated at least 56 AUs

All students who have met the above requirements are to embark on the FYP immediately at the beginning of the next semester. No delay in the commencement of the FYP is allowed.

If a student has successfully obtained waiver of EID/PI but is unable to accumulate the required number of AUs after completing his third year of study, he will be permitted to commence his FYP only after he has accumulated the required number of AUs following another semester of study.

All FYP students are strongly advised to see their project supervisors on a regular basis as such meetings are very necessary and important to the students' progress and performance in the projects. All FYP students are required to submit FYP reports and undergo oral presentations for their FYP at the end of the project. The oral presentations are scheduled immediately after the examination period.

FYP students who have to go for in-camp training or overseas business assignment on the scheduled date of the oral presentation are required to submit supporting documents to the FYP coordinator as soon as it is known so that an alternative (earlier) date can be arranged for their oral presentation.

If the student's progress is unsatisfactory, the supervisor may recommend an extension of the project beyond the three (3) semesters and one (1) special term duration. Such extension, if approved by the School, will come with a serious penalty on the student's grade for the FYP.

If a student fails his/her FYP, he/she has to do a new FYP with a different supervisor for another three (3) semesters and one (1) special term period.

The School will notify students by email when they become eligible to start FYP.
