MASTER OF SCIENCE IN

Applied Gerontology

Asia is rapidly ageing, with a projected 1.3 billion older people by 2050. This growing proportion of older people within the Asian population calls for innovative and integrated approaches to tackle the multifaceted challenges of population ageing and capitalise on emerging opportunities.

OUR PROGRAMME

The Master of Science in Applied Gerontology is uniquely designed to prepare you to address the challenges and opportunities arising from profound demographic changes in Asia. Upon graduation, you will possess in-depth knowledge, skills, and practical experience to work with older individuals, develop leadership abilities, design policies, and enhance care services for an ageing population.

Our interdisciplinary and comprehensive curriculum includes **four** core courses focusing on foundational competencies in gerontology, **two** courses in your chosen specialisation to deepen your expertise, and **four** elective courses, including an optional practicum to provide a broader perspective on gerontology and its practical applications.

Our innovative courses are developed and taught by faculty members from diverse fields, including medicine, business, social sciences, communication, arts and humanities, and biological sciences. Additionally, they feature insights from researchers at NTU and industry practitioners.

APPLY NOW

We are committed to forming a diverse and inclusive cohort of students with various academic and professional backgrounds and life experiences.

If you have a passion for learning and a desire to work on ageing-related issues, we welcome your application.

We offer one intake every August, and the application period is open from November to February.

CAREER PROSPECTS

Graduates of our programme can look forward to careers in healthcare, government agencies, social services, and voluntary welfare organisations.

ABOUT NTU

A research-intensive public university, Nanyang Technological University, Singapore (NTU Singapore) has 33,000 undergraduate and postgraduate students in the Engineering, Business, Science, Medicine, Humanities, Arts, & Social Sciences, and Graduate colleges.

NTU is ranked among the best young universities under 50 years old and within the top 50 universities overall. Many of its programmes are in the top 10 globally.

KEY PROGRAMME FEATURES

Tailored to career goals and interests, you can choose between two concentrations: Leadership and Policy Engagement, or Clinical Practice and Care Management.

Interdisciplinary and innovative courses with a unique Asian focus that are taught by distinguished faculty from various disciplines.

Engage in applied and experiential learning, which includes site visits and practicum opportunities.

Leverage the perspectives, experiences and network of a diverse cohort of students.

Benefit from strong engagement with NTU's thriving ageing research community and our partnerships with clinical, social services, and industry partners.

Embrace the flexibility of our programme, designed to accommodate the needs of working adults. You can study full-time (12 months) or part-time (minimum 18 months).
