**COURSE DESCRIPTION**

This course provides students with an overview of how to design and conduct a simple research project on a selected topic in the areas of information services, systems, and knowledge management. In this respect, a group of 3 students (**No less or no more than 3 students per group**) are mentored by a supervisor in a research project leading to a critical inquiry report and research outputs.

**COURSE OBJECTIVES**

- At the end of the course, students are expected to:
- Understand how to design and conduct a research project in the area of information study, information system, or knowledge management, and
  - Acquire in-depth knowledge in a selected research topic area.

**PREREQUISITES**

- **Full-time** students should take this course in the second semester,
- **Part-time** students should take this course in the second year (starting from the third semester), and
- Students must have completed at least 4 courses before registering for critical inquiry

## COURSE WEBSITE

Materials for the course will be accessible from the following URLs:

- <https://ntulearn.ntu.edu.sg/>  
(Students will only have access to the NTULearn course folder after registering for IN6299/IS6799/KM6399 during the active course registration period)
- <https://www.ntu.edu.sg/wkwsci/admissions/useful-links/graduate/critical-inquiry>

If you are looking for teammates, please use the Discussion Board in the course website (NTULearn) to post your interest and contact information. Note that you need to register for the course (IN6299/IS6799/KM6399) during the course registration period in order to use the Discussion Board.

## ASSESSMENT

**Proposal and final report constitute 20% and 80% of the overall grade respectively.**

There is **NO** final exam and/or presentation involved for CI. For a full explanation of the assignments, refer to the course website. Proposal will be marked by your supervisor, while final report will be marked by your supervisor and an independent marker. The proposal and final report submitted after the deadline will be marked down by 10% per day.

The University has set up the Institutional Review Board (IRB) to promote ethical research to protect human subjects involved in research projects as well as to support researchers. **All student research projects (i.e. Critical Inquiry Projects) involving studies with human subjects should apply for clearance on ethical issues by the School-IRB or the NTU-IRB before conducting the studies.**

Research Integrity and Ethics Office (RIEO) has made it **mandatory for supervisors of student teams supervising research projects with human subjects' research to have a valid CITI certificate** as supervisors are responsible for the ethical and legal conduct of student research. Thus, the CI group members as well as the supervisor must have completed the CITI training when submitting the IRB application for approval. Each CITI certificate is valid for three years.

The review and approval process will take around **2 weeks to 2 months**. Please consult with your supervisor on the best time to submit your IRB application for approval. You are advised to submit your application **by Week 6**.

**If you conduct a survey in the classes, you should obtain permission from the instructors of the classes in which you carry out your data collection. You should also document your sources of data clearly in the final report.**

## **POLICIES**

### **Academic Honesty & Plagiarism**

The assignments that you submit for assessment in this course must be your own work. The University's policies on academic honesty and plagiarism apply to this course. It is your responsibility to familiarise yourself with these principles and policies.

Plagiarism is a serious form of academic dishonesty involving:

- Paying someone else to do the work but submit the work in your name
- Copying someone else's work and passing it off as yours (even if you do it with the other person's knowledge and permission)
- Turning in a paper that you have submitted or are submitting for another course without the approval from the professors
- Using or creating fabricated or fictitious data
- Making use of other people's ideas without proper attribution and citation
- Direct quoting without quotation marks, even though the source is cited (You must provide proper citation of articles, according to APA standards, in your assignments)
- Excessive use of other people's work/ideas
- For more information on NTU Academic Integrity policy, please refer to this website: <https://www.ntu.edu.sg/wkwsci/admissions/useful-links/undergraduate/academic-integrity>
- For more information on plagiarism, self-plagiarism and exceptions, please refer to this website: <https://apastyle.apa.org/style-grammar-guidelines/citations/plagiarism>

Disciplinary actions against academic dishonesty range from failing a course to expulsion. If you are not sure what constitutes academic dishonesty, please consult your Programme Director.
