

# 7<sup>TH</sup> ASIAN SPECTROSCOPY CONFERENCE (ASC 2020)

8 – 10 December 2020, Zoom (Singapore)

## Programme Booklet

Jointly Organised by

Institute of Advanced Studies

Sponsored by

**ThermoFisher**  
SCIENTIFIC

**mks**  
Spectra-Physics®  
Newport™  
Ophir®

## **Chairs' Message**

The Asian Spectroscopy Conference (ASC) has a relatively long history. It was initiated by Asian Raman spectroscopists and was held in odd numbered years, while the International Conference on Raman spectroscopy (ICORS) was held in the even numbered years. The last ASC, sixth in its series, was held in Taiwan in 2017, chaired by I-Chia Chen. Prior to that, ASC had been held in 2007 (India), 2009 (South Korea), 2011 (China), 2013 (Singapore) and 2015 (Australia).

Due to the unfortunate COVID-19 pandemic, the 7th ASC 2019, Hong Kong (Chair: David Phillips) could not be held as a face-to-face meeting and has been postponed to be the 9th ASC, 2023, Hong Kong (Chair: David Phillips). To fill the vacuum between the 6th and the 8th ASC, the International Steering Committee has kindly consented to holding the 7th ASC 2020, through Singapore (Chair: Edwin Yeow; Co-Chair: Soo-Ying Lee), as an online conference. It convenes on 8 - 10 December 2020, and is organised by the Institute of Advanced Studies (IAS), Nanyang Technological University (NTU), Singapore.

The scientific programme of 7<sup>th</sup> ASC 2020 consists of 50 oral presentations (15 esteemed plenary lectures, 30 invited and 5 contributed talks), covering a wide range of topics including ultrafast spectroscopies, time-resolved spectroscopies, surface-enhanced and tip-enhanced Raman spectroscopy, microwave spectroscopy, infrared spectroscopy and microscopy; on top of the traditional topic of Raman spectroscopy. 27 abstracts for the 3-minute video poster presentations, an innovative format of poster presentation that replaces the traditional one for this online conference, have also been received.

We are grateful to the conference sponsors of 7<sup>th</sup> ASC – *EINST Technology Pte Ltd, Laser 21 Pte Ltd, Newport Opto-Electronics Technologies (Singapore) Pte Ltd and Thermo Fisher Scientific Pte Ltd* for their generous contributions towards the poster awards. Appreciation also goes to Singapore National Institute of Chemistry (SNIC) and IAS, NTU (particularly the Secretariat, Ms Eileen So) for the co-organising support. Finally, and most importantly, we thank all members of the Local Organising Committee and International Steering Committee for seeking conference sponsors and much helpful conference organisational advice.

We hope all of you enjoy this special ASC 2020!

**Edwin Yeow**

Chair, ASC 2020

Nanyang Technological University (NTU), Singapore

**Soo-Ying Lee**

Co-Chair, ASC 2020

Nanyang Technological University (NTU), Singapore

## **Organising Committee**

### **Conference Chair**

YEOW Edwin, Nanyang Technological University, Singapore

### **Conference Co-Chair**

LEE Soo Ying, Nanyang Technological University, Singapore

### **Local Organising Committee**

LING Xing Yi, Nanyang Technological University, Singapore

LOH Zhi Heng, Nanyang Technological University, Singapore

TAN Howe Siang, Nanyang Technological University, Singapore

XU Qing-Hua, National University of Singapore, Singapore

### **International Organising Committee**

ARUNAN Elangannan, Indian Institute of Science, India

CHEN I-Chia, National Tsing Hua University, Taiwan

HAMAGUCHI Hiro-o, National Chiao Tung University, Taiwan

IWATA Koichi, Gakushuin University, Japan

KIM Dongho, Yonsei University, South Korea

KIM Sang Kyu, KAIST, South Korea

KIM Seong Keun, Seoul National University, South Korea

KWOK Wai Ming, The Hong Kong Polytechnic University, Hong Kong

LIN Jim Jr-Min, Academia Sinica, Taiwan

LEE Yuan-Pern, National Chiao Tung University, Taiwan

MCNAUGHTON Donald, Monash University, Australia

OHTA Nobuhiro, National Chiao Tung University, Taiwan

OZAKI Yukihiro, Kwansai Gakuin University, Japan

PHILLIPS, David Lee, The University of Hong Kong, Hong Kong

PURANIK Mrinalini, IISER Pune, India

REN Bin, Xiamen University, China

ROBERTSON Evan, La Trobe University, Australia

TAHARA Tahei, RIKEN, Japan

TIAN Zhong-Qun, Xiamen University, China

UMPATHY Siva, Indian Institute of Science, India

WATEGAONKAR Sanjay, Tata Institute of Fundamental Research, India

WOOD Bayden, Monash University, Australia

ZHENG Hairong, Shaanxi Normal University, China

## Sponsors

The organisation of ASC 2020 and all Poster Awards are brought to you generously by the following sponsors:

**ThermoFisher**  
S C I E N T I F I C

# WHEN MICROSCOPY MEETS SPECTROSCOPY

## UV-VIS-NIR Microspectroscopy System

### uSight™-2100

The **uSight™-2100** Microspectroscopy system enables the user to carry out UV-VIS-NIR measurement at the microscopic level. With the 100X objective, the collection spot diameter can go as small as 1µm. This is ideal for investigating optical transmittance, reflectance or absorbance properties of samples with micron-sized structures. In addition to UV-VIS-NIR Microspectroscopy, users can also perform additional imaging modalities such as Fluorescence, Raman, Darkfield, Phase Contrast, Brightfield, Polarization and DIC imaging.

## Empower Your Microscope for Microspectroscopy

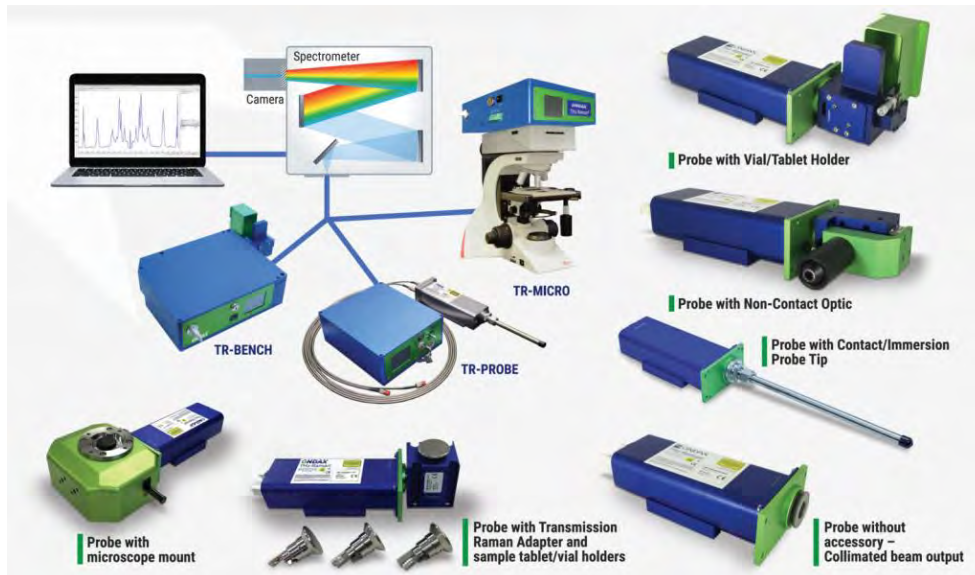

### uRaman™

The **uRaman™-Ci** is a complete Raman Microscopy System that consists of the uRaman module being integrated with the Nikon Ci-L research grade upright microscope. It enables microscopic level Raman signal collection down to collection spot size as small as 1µm. The uRaman-Ci is capable of performing transmitted Brightfield Imaging with other add on such as Reflected Brightfield, Darkfield, DIC and Fluorescence imaging modes available.

We also have a full range of Nikon Objective Lens and accessories such as cuvette holder for measuring the liquid samples directly from the microscope.

In addition, uRaman-Ci can also equip with a XY Motorized Stage and uSoft Map Software for Raman Chemical Mapping.

## COHERENT INC- THZ-Raman Spectroscopy for Advanced Materials Characterization

Clear real-time differentiation of structural attributes of the material enables clear identification and analysis of polymorphs, raw material sources, defects and contamination, crystal formation, phase monitoring, and synthesis methods. Real-time, simultaneous measurement of both composition and structural analysis eliminates the need for multiple samples and instruments, lowering capital, training, and maintenance costs.

The THZ-Raman spectral region covers both Stokes and anti-Stokes signals from  $\pm 5 \text{ cm}^{-1}$  to  $200 \text{ cm}^{-1}$ , (or 150 GHz to 6 THz), which contain important structural information about the molecule or crystal lattice. This region reveals a new "structural fingerprint" to complement the traditional chemical fingerprint of Raman, enabling simultaneous analysis of both molecular structure and chemical composition in one instrument for advanced materials characterization.

## NKT Photonics -ONEFIVE ORIGAMI XP HIGH ENERGY FEMTOSECOND LASER

The ORIGAMI XP is the first all-in-one, single-box, microjoule femtosecond laser on the market. The laser head, controller, and air-cooling system are all integrated into one small and robust package, with a footprint so small it even fits into a hand-luggage!

The system is based on a compact monolithic chirped pulse amplification platform capable of delivering up to  $70 \mu\text{J}$  pulse energy at 1030 nm, 5 W average power, and a pulse duration below 400 fs. With options of attachable second-harmonic module (SHG) & third-harmonic generation (THG).

**PROGRAMME SCHEDULE**  
**8 Dec 2020 (Day 1)**

\*Please click on presentation titles to access the abstracts

Time (GMT+8)	Day 1 (8 December 2020, Tuesday)	Zoom Links
10:00 - 10:05	Welcome Address by Conference Co-Chair, Prof Soo-Ying LEE	
	<b>Session 1a</b> Chair: Soo-Ying LEE (Nanyang Technological University, Singapore)	
10:05 - 10:30	<b>Plenary Talk 1:</b> <a href="#">Water Liquid Structure as Studied by Raman and Hyper Raman Spectroscopy</a> Hiro-o HAMAGUCHI (National Chiao Tung University, Taiwan)	<a href="https://ntu-sg.zoom.us/j/99518892428">https://ntu-sg.zoom.us/j/99518892428</a> (Passcode: ASC2020)
10:30 - 10:55	<b>Plenary Talk 2:</b> <a href="#">Time-Resolved Spectroscopy Studies of Selected Photoredox Reactions</a> David Lee PHILLIPS (The University of Hong Kong, Hong Kong)	
10:55 - 11:00	Group Photo (Screenshot) & Short Break	
	<b>Session 1b</b> Chair: Qing-Hua XU (National University of Singapore, Singapore)	
11:00 - 11:20	<b>Invited Talk 1:</b> <a href="#">Interplay of MLCT and ILCT states in rhenium(I) complexes</a> Keith GORDON (University of Otago, New Zealand)	
11:20 - 11:40	<b>Invited Talk 2:</b> <a href="#">Properties of lipid biayer membranes examined with time-resolved fluorescence and Raman spectroscopies</a> Koichi IWATA (Gakushuin University, Japan)	
11:40 - 12:00	<b>Invited Talk 3:</b> <a href="#">Unique Structure of the Retinal Chromophore Enabling Sodium Ion Transport in the Sodium Ion-Pumping Protein KR2</a> Yasuhisa MIZUTANI (Osaka University, Japan)	<a href="https://ntu-sg.zoom.us/j/99518892428">https://ntu-sg.zoom.us/j/99518892428</a> (Passcode: ASC2020)
12:00 - 12:20	<b>Invited Talk 4:</b> <a href="#">Capturing Transient Species in Ionized Liquid Water and Aqueous Solutions</a> Zhi Heng LOH (Nanyang Technological University, Singapore)	
12:20 - 12:40	<b>Invited Talk 5:</b> <a href="#">Insight into Two-Dimensional MoS<sub>2</sub> by Raman and DFT Study</a> Mark R. WATERLAND (Massey University, New Zealand)	
12:40 - 12:55	<b>Contributed Talk 1:</b> <a href="#">Mining Large Raman Spectroscopic Data Beyond the Shot Noise Limit</a> Rintaro SHIMADA (University of Tokyo, Japan)	
12:55 - 14:00	Break / International Steering Committee Meeting Day 1 (By Invitation)	
	<b>Session 1c</b> Chair: Edwin YEOW (Nanyang Technological University, Singapore)	
14:00 - 14:25	<b>Plenary Talk 3:</b> <a href="#">Photocatalytic Activation of Inert Bonds and Their Functionalization via Hydrogen-Evolution Cross-Couplings</a> Chen-Ho TUNG (Chinese Academy of Sciences, China)	
14:25 - 14:50	<b>Plenary Talk 4:</b> <a href="#">Ultrafast Structural Dynamics in Various <math>\pi</math>-Conjugated Molecular Systems Probed by Time-resolved Electronic and Vibrational Spectroscopy</a> Dongho KIM (Yonsei University, South Korea)	<a href="https://ntu-sg.zoom.us/j/92191033166">https://ntu-sg.zoom.us/j/92191033166</a> (Passcode: ASC2020)
14:50 - 15:15	<b>Plenary Talk 5:</b> <a href="#">Charge Transfer and Charge Separation Dynamics in Efficient Non-fullerene Solar Cells</a> Kam Sing WONG (Hong Kong University of Science and Technology, Hong Kong)	
15:15 - 15:35	<b>Invited Talk 6:</b> <a href="#">Reaction Dynamics by Time-Resolved Wave Packet Spectroscopies &amp; Molecular Dynamics Simulation</a> Taiha JOO (Pohang University of Science and Technology (POSTECH), South Korea)	
15:35 - 15:45	Short Break	
	<b>Session 1d</b> Chair: Elangannan ARUNAN (Indian Institute of Science Bangalore, India)	
15:45 - 16:05	<b>Invited Talk 7:</b> <a href="#">Raman Spectroscopy Applications for Bacterial Detection: Potential &amp; Challenges towards Development of Field Deployable System</a> Sanchita SIL (Defence Bioengineering and Electromedical Laboratory, India)	
16:05 - 16:25	<b>Invited Talk 8:</b> <a href="#">Ultrafast Time-resolved Fluorescence Study on Formation and Excitation Dynamics of Human Telomeric and Homo-oligomeric i-Motifs at Neutral pH</a> Chensheng MA (Shenzhen University, China)	<a href="https://ntusg.zoom.us/j/94085010129">https://ntusg.zoom.us/j/94085010129</a> (Passcode: ASC2020)
16:25 - 16:45	<b>Invited Talk 9:</b> <a href="#">Transient Raman Snapshots of the Twisted Intramolecular Charge Transfer State</a> Jyotishman DASGUPTA (Tata Institute of Fundamental Research, India)	
16:45 - 17:05	<b>Invited Talk 10:</b> <a href="#">Investigation on Photodeprotection Mechanisms of Selected Photolabile Protecting Groups</a> Jiani MA (Northwest University, China)	
17:05 - 17:20	<b>Contributed Talk 2:</b> <a href="#">Mitochondria specific Raman microspectroscopy of fission yeast cells with simultaneous Raman/GFP observation</a> Nungnit Wattanavichean (National Chiao Tung University, Taiwan)	
17:20	Conclusion for Day 1	

**PROGRAMME SCHEDULE**  
**9 Dec 2020 (Day 2)**

\*Please click on presentation titles to access the abstracts

Time (GMT+8)	Day 2 (9 December 2020, Wednesday)	Zoom Links
<b>Session 2a</b> Chair: Zhi Heng LOH (Nanyang Technological University, Singapore)		
10:00 - 10:25	<b>Plenary Talk 6:</b> <a href="#">Spectroscopy, Kinetics, and Dynamics of Criegee Intermediates</a> Yuan-Pern LEE (National Chiao Tung University, Taiwan)	<a href="https://ntu-sg.zoom.us/j/93266723869">https://ntu-sg.zoom.us/j/93266723869</a> (Passcode: ASC2020)
10:25 - 10:55	<b>Plenary Talk 7:</b> <a href="#">Tracking Ultrafast Chemical Reactions at the Aqueous Interface with Femtosecond Time-Resolved HD-VSFG Spectroscopy</a> / <b>Announcement of ASC 2021</b> Tahei TAHARA (RIKEN, Japan)	
10:55 - 11:20	<b>Plenary Talk 8:</b> <a href="#">Continuous Tunable Lasing Characteristics of Blended Polymer System</a> Kok-Wai CHEAH (Hong Kong Baptist University, Hong Kong)	
11:20 - 11:25	<b>Short Break</b>	
<b>Session 2b</b> Chair: Howe-Siang TAN (Nanyang Technological University, Singapore)		
11:25 - 11:45	<b>Invited Talk 11:</b> <a href="#">Laser spectroscopy of nicotine and related analogues - perturbations and puckering in pyridine and pyrrolidine rings</a> Evan G. ROBERTSON (La Trobe University, Australia)	<a href="https://ntu-sg.zoom.us/j/93266723869">https://ntu-sg.zoom.us/j/93266723869</a> (Passcode: ASC2020)
11:45 - 12:05	<b>Invited Talk 12:</b> <a href="#">Mechanism and Application of Oxygen-Independent Photocleavage of Blebbistatin as a Blue or Near-Infrared Light-Gated Hydroxyl Radical Photocage</a> Ming-De LI (Shantou University, China)	
12:05 - 12:25	<b>Invited Talk 13:</b> <a href="#">Excited State (?) Proton Transfer in Benzimidazole Homodimer – An Experimental and Ab-Initio Study</a> Sanjay WATEGAONKAR (Tata Institute of Fundamental Research, India)	
12:25 - 12:45	<b>Invited Talk 14:</b> <a href="#">Steady-State Spectroscopy and Ultrafast Dynamics of Flavylum Derivatives in the Red and Near-Infrared Spectral Region</a> Muhammad Faisal bin KHYASUDEEN (University of Malaya, Malaysia)	
12:45 - 13:00	<b>Contributed Talk 3:</b> <a href="#">Synchrotron Macro ATR-FTIR Microspectroscopy for High-Resolution Chemical Mapping of Single Cells</a> Jitraporn (Pimm) VONGSVIVUT (ANSTO - Australian Synchrotron, Australia)	
13:00 - 14:00	<b>Break /</b> <b>International Steering Committee Meeting Day 2, if Necessary (By Invitation)</b>	
<b>Session 2c</b> Chair: Kam Sing WONG (Hong Kong University of Science and Technology, Hong Kong)		
14:00 - 14:25	<b>Plenary Talk 9:</b> <a href="#">Scanning Raman Microscopy: a new technique that can visually determine the chemical structure of a single molecule</a> Yi LUO (University of Science and Technology of China, China)	<a href="https://ntu-sg.zoom.us/j/99959665694">https://ntu-sg.zoom.us/j/99959665694</a> (Passcode: ASC2020)
14:25 - 14:50	<b>Plenary Talk 10:</b> <a href="#">THz Molecular Science in Condensed Phases</a> Keisuke TOMINAGA (Kobe University, Japan)	
14:50 - 15:10	<b>Invited Talk 15:</b> <a href="#">Autofluorescence Lifetime Microscopy in Normal and Cancer Cells and Nanosecond Pulsed Electric Field Effects</a> Nobuhiro OHTA (National Chiao Tung University, Taiwan)	
15:10 - 15:30	<b>Invited Talk 16:</b> <a href="#">Single-Particle Tracking of the Formation of a Pseudo-Equilibrium State Prior to Interfacial Charged Microgel Cluster Formation</a> Edwin YEOW (Nanyang Technological University, Singapore)	
15:30 - 15:40	<b>Short Break</b>	
<b>Session 2d</b> Chair: Donald MCNAUGHTON (Monash University, Australia)		
15:40 - 16:00	<b>Invited Talk 17:</b> <a href="#">Domain Structures and Photoinduced Dynamics of Electronic Ferroelectrics Investigated by Terahertz-Emission Microscopy</a> Hirotake ITOH (Tohoku University, Japan)	<a href="https://ntu-sg.zoom.us/j/94170169699">https://ntu-sg.zoom.us/j/94170169699</a> (Passcode: ASC2020)
16:00 - 16:20	<b>Invited Talk 18:</b> <a href="#">Multispectral Manifestation of Redox Dynamics and Pathological Progression Based on Integrated NIR Fluorescent Paradigms</a> Bengang XING (Nanyang Technological University, Singapore)	
16:20 - 16:40	<b>Invited Talk 19:</b> <a href="#">Single Particle Spectroscopy Studies on Plasmon Coupling Enhanced Two-photon Photoluminescence and Photo-thermal Responses</a> Qing-Hua XU (National University of Singapore, Singapore)	
16:40 - 17:00	<b>Invited Talk 20:</b> <a href="#">Super-Resolution Fluorescence Microscopy Reveals Nanoscale Catalytic Heterogeneity on Single Copper Nanowires</a> Zhengyang ZHANG (Nanyang Technological University, Singapore)	
17:00 - 17:15	<b>Contributed Talk 4:</b> <a href="#">Accurate wavenumber and intensity calibration for standardization of Raman Spectroscopy</a> Ankit RAJ (National Chiao Tung University, Taiwan)	
17:15	<b>Conclusion for Day 2</b>	

**PROGRAMME SCHEDULE**  
**10 Dec 2020 (Day 3)**

\*Please click on presentation titles to access the abstracts

Time (GMT+8)	Day 3 (10 December 2020, Thursday)	Zoom Links
<b>Session 3a</b> Chair: Bin REN (Xiamen University, China)		
10:00 - 10:25	<b>Plenary Talk 11:</b> <a href="#"><u>Rotationally Resolved Spectroscopy for Interstellar Chemistry and Precise Molecular Structure Determination</u></a> Donald MCNAUGHTON (Monash University, Australia)	<a href="https://ntu-sg.zoom.us/j/94902679434">https://ntu-sg.zoom.us/j/94902679434</a> (Passcode: ASC2020)
10:25 - 10:50	<b>Plenary Talk 12:</b> <a href="#"><u>Spectroscopy and Dynamics of the Bond, Inter- and Intra- Molecular!</u></a> Elangannan ARUNAN (Indian Institute of Science, India)	
10:50 - 11:15	<b>Plenary Talk 13:</b> <a href="#"><u>Designing SERS Platforms Beyond Hotspot Engineering: The Cases of Analyte Manipulations for Analytical and Medical Applications</u></a> Xing Yi LING (Nanyang Technological University, Singapore)	
11:15 - 11:25	<b>Short Break</b>	
<b>Session 3b</b> Chair: David Lee PHILLIPS (University of Hong Kong, Hong Kong)		
11:25 - 11:45	<b>Invited Talk 21:</b> <a href="#"><u>Singlet Pathway to the Ground State of Ultracold Polar Molecules</u></a> Kai DIECKMANN (National University of Singapore, Singapore)	<a href="https://ntu-sg.zoom.us/j/94902679434">https://ntu-sg.zoom.us/j/94902679434</a> (Passcode: ASC2020)
11:45 - 12:05	<b>Invited Talk 22:</b> <a href="#"><u>Time-Resolved Reaction Dynamics in Photo-dissociation and Photo-detachment</u></a> Sang Kyu KIM (KAIST, South Korea)	
12:05 - 12:25	<b>Invited Talk 23:</b> <a href="#"><u>Spectroscopic Study on Luminescent Mechanochromic Transition Metal Complexes</u></a> Vincent KO (City University of Hong Kong, Hong Kong)	
12:25 - 12:45	<b>Invited Talk 24:</b> <a href="#"><u>Direct Observation of Resonant Energy Transfer in Lanthanide Complexes from Multidisciplinary Perspectives</u></a> Xuebo CHEN (Beijing Normal University, China)	
12:45 - 13:00	<b>Contributed Talk 5:</b> <a href="#"><u>Time-Resolved Spectroscopy Studies to Understand Aggregation Induced Emission Properties and Phenomena</u></a> Lili DU (The University of Hong Kong, Hong Kong)	
13:00 - 14:00	<b>Break</b>	
<b>Session 3c</b> Chair: Xing Yi LING (Nanyang Technological University, Singapore)		
14:00 - 14:25	<b>Plenary Talk 14:</b> <a href="#"><u>Core-Shell Nanoparticle-Based Plasmon-Enhanced Molecule Spectroscopies: from methodology to theory</u></a> Zhong-Qun TIAN (Xiamen University, China)	<a href="https://ntu-sg.zoom.us/j/98557435757">https://ntu-sg.zoom.us/j/98557435757</a> (Passcode: ASC2020)
14:25 - 14:45	<b>Invited Talk 25:</b> <a href="#"><u>Applying Nanoparticle@MOF Interface to Activate and Monitor Chemical Reactions at Ambient Conditions</u></a> Hiang Kwee LEE (Nanyang Technological University, Singapore)	
14:45 - 15:05	<b>Invited Talk 26:</b> <a href="#"><u>Electrochemical Tip-enhanced Raman Spectroscopy for in situ Characterization of Materials and Reactions</u></a> Bin REN (Xiamen University, China)	
15:05 - 15:25	<b>Invited Talk 27:</b> <a href="#"><u>DNA-Pt Complex Interactions Investigated by Single-Molecule Force Spectroscopy and Surface-enhanced Raman Spectroscopy</u></a> Jinqing HUANG (The Hong Kong University of Science and Technology, Hong Kong)	
15:25 - 15:35	<b>Short Break</b>	
<b>Session 3d</b> Chair: Edwin YEOW (Nanyang Technological University, Singapore)		
15:35 - 15:55	<b>Invited Talk 28:</b> <a href="#"><u>Studying Ultrafast Spectral Diffusion and Correlation Dynamics using Two-Dimensional Electronic Spectroscopy</u></a> Howe-Siang TAN (Nanyang Technological University, Singapore)	<a href="https://ntu-sg.zoom.us/j/96148306473">https://ntu-sg.zoom.us/j/96148306473</a> (Passcode: ASC2020)
15:55 - 16:15	<b>Invited Talk 29:</b> <a href="#"><u>Resonant Vibrational-Electronic Coupling between Photosynthetic Excitons is Inadequately Described by Reduced Basis Sets</u></a> Vivek TIWARI (Indian Institute of Science Bengaluru, India)	
16:15 - 16:35	<b>Invited Talk 30:</b> <a href="#"><u>Fifth-Order Impulsive Stimulated Raman Spectroscopy for Visualizing Vibrational Coupling in Reactive Excited States</u></a> Hikaru KURAMOCHI (Institute for Molecular Science, Myodaiji, Japan)	
16:35 - 17:00	<b>Plenary Talk 15:</b> <a href="#"><u>Chiral discrimination by TERS</u></a> Yukihiro OZAKI (Kwansei Gakuin University, Japan)	
17:00 - 17:10	<b>Announcement of Poster Award Winners and Closing</b>	
17:10	<b>End of ASC 2020</b>	

**3-MINUTE  
POSTER PRESENTATIONS**

## List of 3-minute Poster Presentations

\*Please click on hyperlinks to access abstracts / pre-recorded poster presentations

Presentation ID	Title	Theme	Abstract / Video Presentation	Presenter
ASC20-P-01	2D Electronic Spectroscopy study of TIPS - Pentacene	2D Electronic Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Duc Viet Le
ASC20-P-02	Modelling Excitonic Energy Transfers in Bryopsis corticulans using 2D Electronic Spectroscopy	2D Electronic Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Hoang Long Nguyen
ASC20-P-03	Hydrogen Bond Dynamics of 9-Fluorenone Derivatives in Water Studied by Two-Dimensional Infrared Spectroscopy	2D IR Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Yuki Fujii
ASC20-P-04	Application of two-dimensional optical spectroscopy: From ultrafast spectral diffusion to Lewis basicity	2D Optical Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Thanh Nhut Do
ASC20-P-05	LIK B <sup>1</sup> Π potential: combining short and long-range data	High Resolution Molecular Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Sofia Botsi
ASC20-P-06	Singlet Pathway to the Ground State of Ultracold Polar Molecules	Molecular Spectroscopy of Ultracold Molecules	<a href="#">Abstract</a>   <a href="#">Video</a>	Anbang Yang
ASC20-P-08	Proof of Concept study for the detection and quantification of low molecular weight human serum proteomes using a miniature near-infrared spectrometer	NIR spectroscopy; Biospectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Thulya C.P
ASC20-P-09	Real-Time Autodetachment Dynamics of Vibrational Feshbach Resonances in Multipole-Bound States	Photoelectron Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Do Hyung Kang

Presentation ID	Title	Theme	Abstract / Video Presentation	Presenter
ASC20-P-10	Cryogenic Anion Photoelectron Spectroscopy Apparatus with Filament ionizer using Velocity Map Imaging	Photoelectron Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Dabin Kim
ASC20-P-11	Real-time visualization of energy- and momentum-resolved carrier dynamics of spatially heterogeneous materials	Photoemission electron microscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Kyung Chul Woo
ASC20-P-12	Ultrafast Vibrational Dynamics induced by the Photodetachment of Aqueous Phenylalanine Anion	Pump-Probe spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Ningchen Yang
ASC20-P-13	Time-resolved Experiment of IR-Induced Anion Reaction Dynamics	Pump-Probe spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Sejun An
ASC20-P-14	Data fusion strategy for quantitative analysis of n-3 fatty acids in commercial krill oil	Raman and IR spectroscopy; Chemometrics	<a href="#">Abstract</a>   <a href="#">Video</a>	Fatema Ahmmed
ASC20-P-15	Vibrational spectroscopic applications for detecting of consolidated harakeke fibres in conservation	Raman and IR spectroscopy; Chemometrics	<a href="#">Abstract</a>   <a href="#">Video</a>	P.Samanali Garagoda Arachchige
ASC20-P-16	How Much Plastic Have You Drunk Today?	Raman Spectroscopy (CARS); Environmental Chemistry	<a href="#">Abstract</a>   <a href="#">Video</a>	Tom Grayson
ASC20-P-17	Ultrafast Dynamics in Dimeric Hemoglobin Probed by Time-Resolved Resonance Raman Spectroscopy	Resonance Raman Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Xiang Gao

Presentation ID	Title	Theme	Abstract / Video Presentation	Presenter
ASC20-P-18	Chromophore structure in a long-lived intermediate of heliorhodopsins: switching of a hydrogen bonding partner of protonated Schiff base	Resonance Raman Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Taito Urui
ASC20-P-19	The influence of changing from fluorenone to fluorenyl-malonitrile on the excited state dynamic of tetraphenylbenzene-fluorene based donor-acceptor systems	Spectroscopy of donor-acceptor system	<a href="#">Abstract</a>   <a href="#">Video</a>	Joshua Sutton
ASC20-P-20	Plasmonic Enhancement Enabled by Silver Nanotriangles in Raman Spectra of Methylene Blue	Spectroscopy of donor-acceptor system	<a href="#">Abstract</a>   <a href="#">Video</a>	Haritha Joseph
ASC20-P-21	Broadband dielectric spectroscopy from sub-GHz to THz frequency region on hydrated bentonite	THz Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Lou Serafin Lozada
ASC20-P-22	Determination of the Fine Structure of a Halide Perovskite using THz Spectroscopy	THz Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Feng Zhang
ASC20-P-23	Ultrafast Charge Transfer and Recombination Dynamics at the Monolayer-Multilayer WSe <sub>2</sub> Homojunction Revealed by Time-Resolved Photoemission Electron Microscopy	Time-resolved photoemission electron microscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Ce Xu
ASC20-P-24	Charge Transfer Dynamics of 9-Arylcarbazole Studied by Femtosecond Transient Absorption Spectroscopy	Transient absorption spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Kazuya Takamoto
ASC20-P-25	Ultrafast Dynamics of Ionized Biomolecules in Aqueous Solution Observed via Few-Femtosecond Transient Absorption Spectroscopy	Transient absorption spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Muhammad Shafiq Bin Mohd Yusof

<b>Presentation ID</b>	<b>Title</b>	<b>Theme</b>	<b>Abstract / Video Presentation</b>	<b>Presenter</b>
ASC20-P-26	Ultrafast Deep-Ultraviolet Spectroscopy of Ionised liquid Water	Ultrafast Deep-UV Spectroscopy	<a href="#">Abstract</a>   <a href="#">Video</a>	Zixuan Ng
ASC20-P-27	Role of vibrational spectroscopy in characterization of drug-ligand interaction	Vibrational Spectroscopy and DFT Analysis	<a href="#">Abstract</a>   <a href="#">Video</a>	Th.Gomti Devi
