NTU EDUCATION

NURTURING FUTURE-READY GRADUATES
AND LIFELONG LEARNERS

To prepare future-ready students with character, competence and cognitive agility who can adapt to an unpredictable and fast-changing world, NTU Education 2025 places strong emphasis on interdisciplinary skills along with disciplinary and domain expertise. It also offers new pathways for experiential and collaborative learning that cultivate leadership and entrepreneurship.

From the new academic year starting in August 2021, students from CoE will be offered a university-wide Interdisciplinary and Collaborative Core (ICC) curriculum that is curated to focus on key transferable skills and addressing global challenges.

* Refers to the curriculum structure of single-degree Bachelor of Engineering and Bachelor of Science programmes offered by the College of Engineering.
