

THE SINGAPORE SCREEN TIME AND SOCIAL MEDIA INTERVENTION

STATEMENT OF RESEARCH PROJECT

Will a reduction in social media usage and screen time intervention work to improve children's Primary School Leaving Exam (PSLE) results, and their behavioral and emotional development?

SCOPE OF WORK FOR SELECTED PHD STUDENT

PhD student will be involved in all levels of the projects, including conducting studies with children and parents at schools, recruiting and supervising undergraduates, manuscript preparation, presentation of findings in national and international conferences, and providing general support to researchers in the lab. This will be an excellent position for someone who loves working with children, wants to gain expertise in child development research, intervention designs, while being part of a supportive lab environment that prioritizes professional development.
