

I got a chance to collaborate with PhD students from other countries such as South Korea, Arabic. It was of great fun to join their party and learn about their culture,

Really consider your research interest and be sure that the research journey that you are going to undertake furthers the skills needed for your intended future career, seize the numerous (Optional but recommended) training opportunities, they will really help

*Zeus*  
4th Year PhD Student

Good Credentials and trade record in technology

*Izzat*  
3rd Year PhD Student

Intellectual freedom, deeper interactions and mentorships with faculty advisors and staff, and overseas conferences and workshops to network and broaden my perspectives.

*Alvin*  
4th Year PhD Student

More independent than I was in my UG. I've learnt & gained expertise in topics that aren't learnt during my UG. It gave me a new perspective on my favourite topic-Environmental Engg.

*Gopi*  
4th Year PhD Student

As a kid, I used to spend most of my weekends in the field of marigolds and chrysanthemums where my father used to take data for his research. Being a kid curious with lots of questions, my interest in 'research' started in those days. With time, that interest grew and I decided to follow in my father's footsteps to pursue a PhD.
