STUDENT LIFE

LKCMEDSOC

The LKC Medicine Students' Medical Society (LKCMedSoc) is a student-led organisation devoted to enhancing your university experience at LKC Medicine, and representing your needs and interests to LKC Medicine and NTU. For students with an aspiration to serve, LKCMedSoc is an excellent opportunity to give back to the broader LKC Medicine student community to make student life more enriching and enjoyable.

COMMUNITY INVOLVEMENT

With sixteen local and ten overseas Community Involvement Programmes (CIPs), there is no shortage of opportunities for students with the heart to serve. The CIPs at LKC Medicine target a range of beneficiaries from migrant workers and people with special needs, to the elderly, while our overseas projects reach up to eight countries.

HOUSE SYSTEM

The House System is a comprehensive support system, where House Tutors, often senior scientists, medical practitioners, or administrators, guide and mentor students throughout their medical studies. It facilitates relationship building amongst students, and between students and tutors, ensuring that students develop a sense of belonging and identity.

STUDENT-LED CCAs

Student-led CCA activities are a large part of the vibrant student life at LKCMedicine. We have our very own student-led dance group, LKCrew, and acapella group, MedLee, which set out to create platforms for interested students to meet like-minded people and develop their shared interests.

HALL LIVING

As an NTU student, you will be able to enjoy the full experience of campus life, which is vibrant with activities organised by various clubs, sports and societies, accompanied with the unique experience of campus living. While living on campus, you will be able to participate in a plethora of hall CCAs, meet people outside LKCMedicine, and create memories that you will look back on fondly.
