From Algorithms to Trust:
Making AI Work for People and Organisations

21 October 2025, Tuesday, 12.30 pm to 1.30 pm SGT

GEORGIOS CHRISTOPOULOS
MODERATOR

Assoc. Prof. and Provost's Chair Georgios Christopoulos employ both traditional and innovative methods, including wearable devices, computerised testing, and brain neuroimaging, to investigate the factors that influence performance, adaptive responses, and decision-making among office workers, entrepreneurs, control room operators, and university students.

His research focuses on three key areas: decision-making processes involving risk and trust in humans and systems; the onset and effects of cognitive fatigue; and how indoor and outdoor architectural design can enhance human performance, well-being, and learning.

SHERIE NG
SPEAKER

Sherie Ng has over 25 years of leadership experience in high-growth technology sectors, spanning BFSI, telecommunications, government, energy, and FMCG. She is currently Executive Director of Singlife Philippines, and was previously Country Director of Google Cloud Singapore, leading revenue, go-to-market strategy, and cross-industry digital transformation. Before Google, she was General Manager for Microsoft Public Sector Asia Pacific, driving government, healthcare, and education partnerships, as well as national initiatives in digital skills, cybersecurity, AI, and sustainability.

Earlier in her career, Sherie held senior roles at NICE Ltd, Invensys, Singtel, Comverse, CSG Systems, and Lucent Technologies. She holds a Business Administration degree from Nanyang Technological University and has completed executive programmes at MIT Sloan and INSEAD. Passionate about mentorship and social impact, she actively supports youth leadership and humanitarian initiatives.

GEORGE SEAH
SPEAKER

George Seah brings nearly 20 years of experience in data and AI consulting, engineering delivery, and leadership across diverse industries, with deep expertise in financial services.

Starting his career as a consultant and developer, he has since led complex data and AI transformation initiatives across the Asia-Pacific region. He has built and led engineering teams of over 100 professionals, driving large-scale delivery across enterprise environments. George also has hands-on experience delivering end-to-end data and AI solutions, and holds certifications in Databricks, Azure, and GCP. He is an IAPP Certified AI Governance Professional.

MANPRIT SINGH

SPEAKER

Manprit Singh is a seasoned AI strategist with 25 years' experience applying AI across industries including energy, fintech, healthcare, and the public sector. At Celebaltech, he partners with leading global energy companies to define and execute enterprise AI strategies, covering value assessments, adoption roadmaps, implementation architectures, and MVP delivery.

His focus is on the "boring but essential" aspects of AI: enterprise readiness, compliance, common AI platforms, responsible AI, and regulatory alignment. By identifying innovation hotspots across value chains, he helps unlock tangible business outcomes. Previously with Accenture/Avanade, IBM, and Siemens Healthcare, he also lectures at SMU and NUS.
