EVENTS WITH NISTH FELLOWS

22-26 February 2021
TNOC Festival is a virtual festival that pushes boundaries to radically imagine our cities for the future. Spanning over 5 days, across 5 regional time zones & in multiple languages, the festival focuses on facilitating transdisciplinary dialogue, small group workshops, arts engagement, and fostering a collaborative spirit around solutions for our urban futures. It is produced by The Nature of Cities and curated for ASIA, by Devansh Jain (ASE's Liveable Cities Lab) and headed by Asst Prof Perrine Hamel (NISTH Fellow).
More Information: www.tnoc-festival.com; Session submission (Proposals accepted until Feb 5th): https://tnocfestival2021cfp.hubb.me/ **Register here:** https://cvent.me/bO1nm5

OTHER EVENTS

2 February 2021; 10:00 AM – 11:00 AM
ASEAN Deep Tech Economy: For a Resilient and Sustainable Future is presented by SGInnovate in partnership with Temasek, in support of Deep Tech for Good. This session is the second edition exploring the ASEAN Deep Tech Economy. It will discuss the economic drivers in Southeast Asia, and how innovation, particularly in frontier technologies such as AI and data analytics, could help the region grow sustainably, advance the Southeast Asia economy, and be more resilient.

GRANT CALLS

NTU-Alliance ACE Thematic Grant Call on Ending Plastic Waste–1 Feb 2021;5PM
NTU through its Global Alliance of Industries (GAIN) initiative has collaborated with one of the leading non-profit organisation – Alliance to End Plastic Waste (AEPW) to work on solutions to the widespread problem of eradicating global plastic waste pollution.
More details at: http://n4ap0112:6022/Research/Programmes/Pages/Ending-Plastic-Waste---Call.aspx

Healthy Longevity Global Grand Challenge - 08 Mar 2021
This is a National Medical Research Council (NMRC), Singapore's Competitive Research Grant. It was founded by the United States National Academy of Medicine (NAM), and offers opportunities for innovators, scientists, and entrepreneurs to catalyse breakthrough discoveries and innovations that could leapfrog existing barriers and jumpstart new solutions, thereby propelling the field of ageing research and improving the health of persons as they age.

AIR-NISTH AI for Social Good Research Grant - 15 March 2020, 5:00 PM
This grant is co-funded by Artificial Intelligence Research Institute (AI.R), NISTH and CoHASS at NTU. It seeks interdisciplinary teams to work on AI applied for "social good". This includes (but not limited to) novel applications of AI tools to new domains of humanitarian or social importance, investigations that promote the ethical, fair, accountable or responsible, or research that aims to better understand how AI systems may be regulated, governed, or deployed in "socially responsible" ways.
