Course Code	Course Title	Description	Academic Unit
MAE900	Research Methodology in Applied Linguistics	This course focuses on research methodology in applied linguistics and covers a range of theoretical, practical, and ethical issues in applied linguistics research, with an emphasis on language teaching and learning. It examines principles for undertaking empirical research, introduces main quantitative and qualitative methods for conducting small-scale research in the language classroom, and provides hands-on experience with research designs, instruments for data collection, quantitative and qualitative methods of data analysis, evaluation of published research, and research report writing.	4
MAE900	Research Methodology in Applied Linguistics	This course focuses on research methodology in applied linguistics and covers a range of theoretical, practical, and ethical issues in applied linguistics research, with an emphasis on language teaching and learning. It examines principles for undertaking empirical research, introduces main quantitative and qualitative methods for conducting small-scale research in the language classroom, and provides hands-on experience with research designs, instruments for data collection, quantitative and qualitative methods of data analysis, evaluation of published research, and research report writing.	4
MAE901	Discourse Studies	This course will provide both a theoretical and practical introduction to concepts and techniques associated with the analysis of discourse. Students first familiarize themselves with the intellectual history of this interdisciplinary field, before turning to some fundamental issues that underlie the study of discourse. Topics covered include the relationship between language, thought and culture, the notion of context and its relation to linguistic form and function, ways of transcribing spoken discourse, and discourse in the multimodal communicational landscape. Students will read and discuss original research articles that employ various forms of discourse analysis to study how people use language to assert, negotiate, question, or challenge micro and macro social arrangements	4
MAE902	Language Acquisition Studies	This course examines theories of language acquisition (first, second, and bilingual) from psycholinguistic and sociolinguistic perspectives. A range of factors that affect the nature and route of language acquisition will be considered (e.g., age, cross-linguistic influence, linguistic environments, cognition, identity, power, etc.). A solid understanding of the nature of language acquisition is expected to provide good grounds for designing language teaching pedagogy.	4
MAE903	Sociolinguistic Perspectives on the Classroom	This course examines language in its social context, including language use in multilingual communities, social reasons for language change, language planning, pidgin languages, linguistic variation based on geography, social class, and gender, and issues in cross-cultural communication. It also considers the impact these concepts have on Singapore classrooms	4
MAE904	Language Teaching Methodology	In this course, we explore the rationale and principles behind the paradigm shift in language teaching methodologies and evaluate their appropriacy for the local teaching context in Singapore. Participants will learn about the relationship between methodology and syllabus design in planning appropriate programmes for teaching the different language skills	4

Course Code	Course Title	Description	Academic Unit
MAE907	Oracy Development and Research	This course examines the concept of oracy by considering theories about spoken English and its learning and use in first and second language contexts. Through a critical reading of research and scholarly discussions, participants will learn about speaking and listening development from cognitive, social and discourse perspectives. This knowledge will be applied in evaluating and improving current practices in the teaching and assessment of speaking and listening competence in first and second language classrooms as well as in understanding the role of oracy in learning at home and in school.	4
MAE908	Research in Teaching Written Discourse	The purpose of this course is to acquaint students with current theoretical models of writing that have informed recent research in the teaching of first language and second/foreign language writing. Discussion of major issues will include critical evaluation of writing research and instructional practices with reference to the development of writing competencies beyond the level of sentence decoding and production.	4
MAE918	Bilingualism and Biliteracy: Theory and Practice	This course provides an in depth look at the theory, practice, methods of data collection, approaches to data coding, and new directions in the field of bilingualism and biliteracy. The course will focus on both biliteracy in the classroom and biliteracy in society. In terms of the classroom we will discuss how best to teach children who are learning English as a second/third language and how to help emergent bilinguals struggling to acquire reading skills in English. In terms of biliteracy in society, we will look at the way biliteracy is celebrated in advertising, media and creative writing.	4
MAE990	Integrative Project	This capstone course aims to equip participants with the knowledge and skills that they will need to identify a specific language-education or language-related problem or issue, and demonstrate a critical understanding of, for example, causes, consequences, controversies, complexities, etc., of the problem or issue by reviewing relevant scholarly literature and designing a study that will address it.	2
MAE990	Integrative Project	This capstone course aims to equip participants with the knowledge and skills that they will need to identify a specific language-education or language-related problem or issue, and demonstrate a critical understanding of, for example, causes, consequences, controversies, complexities, etc., of the problem or issue by reviewing relevant scholarly literature and designing a study that will address it.	2
MAP810	Psychological Assessment	This core course equips students with the foundational knowledge and skills related to psychological assessment. It provides an introduction to the conceptual and psychometric aspects of psychological testing. The first section of the course covers basic concepts of assessment and psychometric principles that apply to all types of psychological tests. It teaches students how to critically evaluate psychometrically strong assessment tools from weaker ones. The second section provides a brief introduction to cognitive tests. The third section provides a brief overview on personality assessment and covers a few basic skills and assessment tools that could be used in practice (e.g., intake interviews, self-report inventories and behaviour rating scales). The fourth section provides an introduction to behavioural assessment and various observation protocols and behaviour recording tools that could be used on field while assessing a client's behaviour.	3

Course Code	Course Title	Description	Academic Unit
MAP819	Psychological Disorders Across the Life Span	This course provides students with the foundational knowledge of the etiology, assessment and evidence-based treatments for psychological disorders that they are likely to encounter in clinical practice. In the first 10 weeks of the course, all students will be introduced to clinical assessment practices and psychological disorders that psychologists are likely to encounter in many clinical populations. In the final 3 weeks of the course, students will be introduced to psychological disorders that are specific to their specialization, i.e. counselling psychology or educational psychology tracks.	3
MAP901	Ethical and Legal Issues in Psychological Practice and Research in Singapore	The purpose of the course is to provide students with a firm grounding in ethics and practice standards of professional psychology in Singapore. Referencing the Singapore Psychological Society Code of Ethics, students will understand the overall principles guiding work in human services, as well as maintain clinical and research practices that are consistent with the specific guidelines in the Code. Students will acquire skills in systematic ethical decision-making which includes seeking appropriate resources and engaging in peer consultation.	3
MAP902	Research Methods and Statistics in Applied Psychology	This course was designed to provide skills and knowledge for students to understand, evaluate, and design different types of research in psychological and educational areas. The course will mainly focus on the procedures and issues related to quantitative research approach. Students will learn univariate statistical procedures and some multivariate statistical procedures.	4
MCP815	Family and Marital Counselling	This course covers both the theoretical and practical approaches in working with couples and families. The course aims to: 1. Introduce a new epistemology and show how systemic family therapy is different from other forms of therapy. 2. Teach the key characteristics (i.e. basic assumptions and underlying philosophies, processes of psychotherapy, tools and techniques in intervention and therapeutic goal/outcome) of major family therapy models and outline its therapeutic process and goals. 3. Demonstrate the application of the practical elements of each model in local real-life context. 4. Raise awareness of the strengths and limitations of each model.	3
MCP821	Cognitive-Behavioural Management and Interventions	This course aims to provide students with a basic understanding of the theories, principles, procedures and practice of behavioural and cognitive-behavioural management. The basic assumption of the behavioural approach is that both desirable and undesirable behaviour are learned and the best strategy for remediation of problem behaviour is to structure the environment to reward desirable behaviour and extinguish maladaptive behaviour. In the cognitive approach, behaviour and emotions are viewed as resulting from cognitive processes, and maladaptive behaviour and emotions are changed by correcting dysfunctional beliefs and helping clients to develop new cognitive and behavioural patterns. Both approaches can be applied to a range of real life issues and problems of children, adolescents, and adults. Students will be provided opportunities to practice CBT skills in class and to receive feedback.	3

Course Code	Course Title	Description	Academic Unit
MCP822	Introduction to Play Therapy	<p>Introduction to Play Therapy is an experiential and interactive clinical course designed to provide trainee counselors and psychologists with the knowledge and skills to work effectively with children in various clinical and school settings. Working with children requires a specific skill set and expertise that is different than working with adolescents and adults. Play therapy is an evidence-based intervention and research has demonstrated its efficacy for addressing various issues children present with such as low self-esteem and disruptive behaviour.</p> <p>Through the course, participants will be familiar with child-centred play therapy and acquire basic play therapy skills including the logistical set up of a play room and basic play therapy skills. Participants will also be prepared to handle typical issues in play therapy. Participants will get hands-on experience that will prepare them to work competently with children.</p>	3
MCP832	Practicum in Counselling Psychology I	Each course provides for practice in counselling. In addition to seminar participation on campus, students are required to undergo a period of supervised field work of 400 hours to obtain hands-on experiences in counselling. The first practicum may be undertaken in the NIE Psychology Clinic and the second will be undertaken in the field.	6
MCP833	Practicum in Counselling Psychology II	Each course provides for practice in counselling. In addition to seminar participation on campus, students are required to undergo a period of supervised field work of 400 hours to obtain hands-on experiences in counselling. The first practicum may be undertaken in the NIE Psychology Clinic and the second will be undertaken in the field.	6
MCP900	Mental Health Assessment for Counselling Psychologists	This course provides a basic exposure to common mental health assessment tools and integrates the findings of these tools with historical information gathered from the assessment process, i.e., gathering relevant background information during an intake or review session. The course also develops knowledge and skills to summarize and explain diverse clinical information about clients presenting issue(s) in a brief, coherent statement or map that elucidates the clients basic pattern to guide the treatment process. This aims to build a clinician's competency and skills in developing and utilizing case conceptualization to guide the treatment formulation and process.	1
MCP931	Practicum in Counselling Psychology I @ Workplace	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MCP932	Practicum in Counselling Psychology II	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP824	Multi-Tiered System of Support (MTSS) to Build Success in Literacy	The purpose of this course is to equip trainee psychologists with foundational knowledge of a multilevel system of support, which will enable schools to identify and serve students who struggle with reading and require additional support.	3

Course Code	Course Title	Description	Academic Unit
MEP833	Practicum in Educational Psychology II	Each course examines professional relations in schools, models of psychological service delivery, and ethical considerations as well as strategies of applying psychological principles to educational problems in the school. In addition to seminar participation on campus, students are required to undergo a period of supervised field work of 400 hours (over both practica) to obtain hands-on experiences in providing school psychological services.	6
MEP931	Practicum in Educational Psychology I @ Workplace	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP931	Practicum in Educational Psychology I @ Workplace	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP932	Practicum in Educational Psychology II	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP932	Practicum in Educational Psychology II	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MAC811	Multicultural Counselling	When contemporary societies become more culturally diverse due to globalization, counsellors and their clients may not share the same sociocultural values. Counsellors can no longer assume that their counselling approaches are applicable to everyone. Counselling is not value-free but is embedded in worldviews mainly derived from Western and dominant cultures. As such, counsellors must be able to adapt their counselling processes when working with clients across cultural groups and social classes. The aim of this course is to help counsellors become more culturally competent in three main areas: becoming more aware of their own assumptions about human behaviours, values, normality, and wellbeing; becoming more aware of the worldviews of culturally diverse clients; and being able to develop intervention strategies consistent with the worldviews of their clients in Asian contexts.	3
MAC815	Advanced Counselling and Interviewing Skills	This course examines the development of counselling skills through the counselling process involving phases of relationship building, problem exploration and identification, goal-setting, designing intervention strategies, evaluation outcomes and termination. This class is predominantly experiential. An emphasis is placed on the practice and demonstration of skills, development of counselling plans, and strategies for assistance.	3

Course Code	Course Title	Description	Academic Unit
MAC816	Group Process and Counselling	Theory and practice of group counselling will be presented, discussed, and practiced in this course. Students will learn about the principles of group dynamics, process and counselling techniques. Application of groups in community and educational settings for remedial and preventive purposes will be explored.	3
MAC817	Psychopathology and Appraisal	Psychopathology and Appraisal provides an overview of the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) and equips students with the foundational knowledge relating to the etiology, identification, developmental course and treatments of various psychological disorders observed across the life-span (i.e., children and adults). The psychological disorders covered include, anxiety disorders, obsessive compulsive and related disorders, bipolar and related disorders, depressive disorders, personality disorders, somatic symptom and related disorders, dissociative disorders, schizophrenia spectrum and other psychotic disorders, feeding and eating disorders, and neurodevelopmental disorders.	3
MAC819	Programme Evaluation in Counselling and Guidance	This course provides the students with the basic understanding of procedures for counselling programme development and accountability/evaluation. It focuses on the needs assessment, planning, development, design, implementation and evaluation of a comprehensive counselling and guidance programme. The community and school-related issues and management competency of the counsellor will be emphasised.	3
MAC820	Introduction to Family Counselling	This course gives an introduction to family systems theories and investigates family issues that surface in counselling. Critical examination of systemic change, dysfunction, stages of family development, the dynamics of family interaction, problems associated with individual adjustments, adaptations and other reactions within family is included.	3
MAC824	Introduction to Play Therapy	Introduction to Play Therapy is an experiential and interactive clinical course designed to provide trainee counselors and psychologists with the knowledge and skills to work effectively with children in various clinical and school settings. Working with children requires a specific skill set and expertise that is different than working with adolescents and adults. Play therapy is an evidence-based intervention and research has demonstrated its efficacy for addressing various issues children present with such as low self-esteem and disruptive behaviour.  Through the course, participants will be familiar with child-centred play therapy and acquire basic play therapy skills including the logistical set up of a play room and basic play therapy skills. Participants will also be prepared to handle typical issues in play therapy. Participants will get hands-on experience that will prepare them to work competently with children.	3
MAC830	Practicum I	The principal goal of practicum is to provide an opportunity for integration and concrete practice of counselling theories, process and techniques leading to effective individual and group counselling. There will be close supervised counselling practice with clients in approved field sites such as schools or agencies which are consistent with the student's learning needs, career goals and area of interest. Demonstration of appropriate professional quality, social and ethical judgment and being receptive is expected.	3

Course Code	Course Title	Description	Academic Unit
MAC831	Practicum II	The principal goal of practicum is to provide an opportunity for integration and concrete practice of counselling theories, process and techniques leading to effective individual and group counselling. There will be close supervised counselling practice with clients in approved field sites such as schools or agencies which are consistent with the student's learning needs, career goals and area of interest. Demonstration of appropriate professional quality, social and ethical judgment and being receptive is expected.	3
MAEL900	Educational Research: Methods & Applications	This course will provide you with a basic but sound understanding of both qualitative and quantitative research methods in education. The course will focus on the theoretical, methodological, and practical aspects of research methodologies. The aim is to provide the necessary insights on educational research in (i) identifying gaps in current research in a particular area of study, (ii) developing meaningful research questions, and (iii) understanding research designs, and analyses. Discussions on planning and validity of research designs will enable participants to evaluate the validity of research that has been conducted in a particular educational area. These experiences will increase candidates appreciation of the complexities involved in working with data and hence enable them to construct research findings with qualitative and quantitative methods. On one hand, qualitative methodologies offer powerful means of distilling the nuances and essences of learning experiences and interactions beyond purely cognitive and individualistic activities. On the other hand, quantitative methodologies stipulate a systematic empirical investigation of observable phenomena via statistical, mathematical, or computational techniques.	4
MAEL901	Theories & Perspectives of Educational Leadership	In this course you will gain an in-depth understanding of educational leadership as a multifaceted and dynamic concept that can be understood and practised through various theoretical lenses including an overview of key concepts, issues, debates, and controversies in educational leadership. You will engage with various conceptional models of educational leadership such as strategic, transformational, instructional, distributed, teacher, system and ethical leadership. You will also explore the role of educational leadership in emerging contexts where complexity, ambiguity, volatility and anxiety are becoming a norm in everyday life, which are in part due to significant technological advances (e.g., the rise of genAI) that are becoming increasingly transformative and disruptive. These emerging contexts have significant bearing on educational leaders day-to-day decision-making in their respective organizational, institutional, and system contexts. Through critical analysis of literature, you will integrate insights on educational leadership in the intersections between policy and practice within their specific contexts and situations. This course is suitable for professionals actively engaged in leading and managing teams and organizations in education or education-related contexts and emerging scholars who are keen on furthering the research work in educational leadership.	4

Course Code	Course Title	Description	Academic Unit
MAEL910	Ethics & Leadership for Educators	<p>This course examines the complex relationship between ethics and leadership in education, inviting participants to explore how to lead ethically in a world shaped by digital advancements, sustainability challenges, and increasing uncertainty. It introduces participants to various theories on ethical behaviour and models of leadership, engaging them to consider critically whether and how leadership should be guided by ethical principles, as well as the alignment or conflict between contemporary leadership models and ethical thinking. The course also addresses fundamental questions about the purposes of education as the context to understand the relationship between ethics and leadership. It examines the extent to which educational practices and leadership should and can be guided by ethical ideals. It considers if and how unconventional pedagogical practices such as art, literature, and poetry can foster ethical awareness among leaders. Through this course, participants will gain the critical language and practical tools needed to navigate ethical dilemmas, develop defensible views on ethical leadership, and engage stakeholders in meaningful, values-driven decision-making in educational contexts.</p>	4
MAEL941	Leading Professional Learning Communities	<p>Schools are continually compelled to build capacity to cope with increasing demands from key stakeholders such as policymakers, parents and its communities all of which require schools to innovate curricula that bring about a broadened set of learning outcomes in students. Besides investing in teacher quality through appropriate professional development framework and processes to significantly impact classroom teaching practices, building quality leadership is equally essential. It has been argued that leadership is second only to teaching in terms of within school factors impacting student learning outcomes. However, besides raising the quality of leaders traditionally at the senior or middle leadership levels, leadership to support teaching and learning must now extend to teacher leaders. The distribution of instructional or/and curriculum leadership practices would only lead to the development of leaders beyond senior and middle leadership levels. Hence, the need to develop teacher leaders who are equally concerned to improve teaching and learning. As leaders for learning, teacher teachers work in a range of roles beyond the confines of their classrooms. The focus in this course will be leadership for learning within professional learning communities (PLCs), which includes collaborating with teachers within and beyond schools. This course is suitable for professionals actively leading and managing teams, organizations and institutions on the professional development / learning of their staff within the education or education-related contexts, albeit focusing on creating, developing, and sustaining learning communities. This course is also suitable for emerging scholars who are keen on furthering the research work in professional development / learning in the education or education-related contexts, albeit focusing on learning communities.</p>	4
MID901	Instructional Design Models and Practices	<p>In the new information age, many traditional classroom courses or training programmes need to be re-developed and conducted online to meet the needs of adult learners who often have to balance their work demands with their social lives. In this course, the participants will learn how to use web-based tools, e-learning authoring tools and produce videos so that they can easily develop and conduct e-learning sessions for teaching and training in practice.</p>	4
MID906	Training Methods and Strategies	<p>Instructional designers need to have the knowledge of a wide repertoire of instructional theories, methods and strategies in order to address different types of performance gap. This course aims to provide conceptual understanding of the theoretical underpinnings of selected training / instructional methods and strategies. It aims to provide opportunities for students to explore concrete training / instructional design theories and to design appropriate strategies and / or activities to achieve the instructional objectives.</p>	4

Course Code	Course Title	Description	Academic Unit
MID941	Evaluation Models and Methods	<p>This is a core course for MAIDT program. Program evaluation is important for instructional design as it 1) helps determine the merit and worth of an instructional package, and 2) helps identify the strength and area for improvement to assist decision making and program development.</p> <p>This course is intended to provide students with an understanding and awareness of the basic philosophical, procedural, and technical aspects of evaluation. The primary goal is to help students achieve a level of basic knowledge and skills in the application of acceptable and efficient models to the evaluation of programs. Students will systematically design an evaluation plan as the final project for the course.</p>	4
MID942	Multimedia Design	Computer-based instruction allows the possibility of delivering lessons to students that employ multiple information modes (text, graphics, sounds, etc.) within a non-linear structure, which collectively falls under the rubric Multimedia. This subject covers the following areas: screen design, the use of media, learner control, navigation, and metaphor.	4
MID945	Capstone Project for Instructional Design	<p>This is a Core Course for MAIDT students doing the All-coursework option. Instructional designers are involved in training development activities related to one or more areas in the ADDIE (Analyze, Design, Development, Implementation, and Evaluation) process. In this capstone project, students select an area of focus from following options to complete a workplace project. The options are to:</p> <p>1) Conduct a Needs Analysis. The project deliverable will be a Needs Analysis report (6,000 words maximum, excluding references and appendices) summarizing the data collected, its analysis as well as recommendations for training interventions;</p> <p>2) Develop an Instructional Package: The project deliverable will be an implementable instructional package (comprises lesson plan, paper-based and/or online lesson materials, and instructor guide) as well as a Design Document (3,000 words maximum, excluding references and appendices) explaining the rationalization of the package.</p> <p>3) Conduct a Programme Evaluation: The project deliverable will be an Evaluation Report (6,000 words maximum, excluding reference and appendices) summarizing the evaluation instruments used, data collection methods, data analysis as well as the recommendations for programme improvement.</p> <p>The project can be based on performance problems from the students workplace or organizations that students have approved access to. In each option, students need to pinpoint the performance problems and demonstrate how the theories and concepts learnt throughout the MAIDT programme can be used to address these performance problems. Throughout the process, students will be assigned to supervisors who will serve as mentors for the project.</p>	4

Course Code	Course Title	Description	Academic Unit
MTCL901	Language Code: Theory and Practice	As Chinese characters are ideographic in nature, the phonetic functions are weak. Furthermore, the structure of Chinese characters are complex and difficult to recognize, to read as well as to write. Therefore, phonetic system, Hanyu Pinyin was developed to aid in learning Chinese. Chinese characters and Chinese phonics operates with two different set of rules. Chinese characters represent single syllables while Hanyu Pinyin operates with a set of standard basic rules in relation to different forms of Chinese words. As instructors of TCIL, it is important to understand the characteristics of these two codes in order to effectively teach Chinese as an international language.	4

MTCL902	Vocabulary and Grammar: Theory and Practice	The fundamental purpose of learning any language is for communication purpose. Be it in spoken or written communication, vocabulary and grammar are two of the most important components in any language learning, as they play a vital role in building up language proficiency. In teaching Chinese as an international language, instructors must understand the grammatical rules and its effect on vocabulary on the target language to bring about effective teaching. Hence, this course will lay a good foundation in Chinese vocabulary and grammar basics, so as to effectively teach Chinese as an international language.	4

MTCL907	Language Testing & Assessment in TCIL	Testing and assessment is an integral part of the learning process, and must be closely aligned with curricular objectives, content and pedagogy. It serves as the central function of getting the best possible evidence on what the students have learned. Teachers and students can then use this information to decide what to do next in the teaching and learning process. It is important that TCIL instructors be equipped with the necessary assessment competencies, so that quality teaching and learning can be achieved in all TCIL classrooms, bearing in mind the varied language backgrounds and proficiency levels of TCIL learners.	4

MTCL913	Chinese Language Education for International Schools	<p>According to the study by International School Consultancy Research (2017), there is a rapid surge in the growth of international schools globally. With a growth in expatriate families and an increase in enrolment within the schools host country, the increasing trend is expected to continue in the next ten years. This growing demand corresponds to the need to develop professionally-trained Chinese language educators for International schools. Language offerings in international schools are unique and vary over different school programme. However, each aims to provide students with an edge in this competitive and ever-changing world. Hence, this course will broaden participants knowledge of teaching Chinese language in international school settings and provides constructive career development opportunities to participants.</p>	4

MCT902	Crafting the Curriculum	<p>The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. This being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needsThis course is an introduction to curriculum development. The underlying framework for the course is that curriculum building is a process that requires ongoing study and reflection about curriculum and the practice of teaching.</p> <p>Central and perennial curriculum questions explored are: What knowledge is of most value and worth? How is the learner and learning viewed? What is the role of teachers in creating and enacting curriculum?</p> <p>The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. Th is being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needs of learners, the socio-political milieu, and the moral and ethical dimensions of schooling.</p>	4
MCT935	New Media and 21st Century Learning	<p>This hands-on course aims to engage participants in examining the existing new media environment and provide an embodied new media experience for them. It addresses important, current issues in new media studies with in-depth discussion of popular perceptions/myths and implications to learning. Through the self-directed analysis of media content (critical media consumption) and production of media artefacts and participation in online communities (critical media prosumption), participants will gain a sense of new media culture and form their personal critique on the relationship between new media and 21st century learning for their refined practices.</p>	4

Course Code	Course Title	Description	Academic Unit
MEM908	Ethics and Leadership for Educators	This course is aimed at exploring and clarifying the relation between ethics and leadership. Leadership may be seen as the ability to influence human relations for the sake of organisational interests and/or personal gain. From this perspective, ethics does not feature as the core of leadership or it serves only as an instrument to achieve other, non-ethical objectives. On the other hand, even if leadership is ethical in nature, there is the problem arising from the variety of competing conceptions of ethics. How does the leader negotiate among these competing conceptions of ethical thought? These considerations show why it is important to address and examine basic questions about ethics and leadership.	4
MEM919	Understanding and Supporting Teacher Resilience	In this course, learners will approach resilience with a multidisciplinary approach uniting resilience from classic child and positive psychology and understand how educators cope from cognitive appraisal-based coping theory based on trauma psychology and occupational therapy, operationalized by narrative inquiry in teacher education. Using these theoretical models as epistemic tools and practice-validated strategies, learners will analyse educator narratives and make better meaning through their own self-narrative to co-construct meaning, fully appreciate, and more systematically support educator resilience as developmental, transformational and expansive learning. With this module, learners will also be able to help educators strengthen self-understanding, better confront personal and professional vulnerability, strengthen professional identity, and enhance a sense of continuity, coherence and commitment.	4
MEM932	Critical Inquiry	This course is a capstone course for students who are progressing into the last stage of their academic study in the MAEM program. Students taking this course are required to identify an existing problem area in their organization which is critically affecting the effectiveness of the organizational operation, hence they wish to investigate, and write a mini research proposal. The selection of a practical issue should be related to a theoretical area of management, and to the candidates interest and intention to improve the situation. Students should be able to demonstrate 1) research skills that they have learned from the 2 core courses of research methodologies; 2) insightfulness of practical issues in organizational lives from leadership/management perspectives; 3) pertinence in their selection of theories from the literature review to address the issues; and 4) capability to generate approaches/solutions to deal with the issues.	2
MAS919	GIS and Geospatial Learning in Sustainability	Sustainability has become a key theme in higher education globally. It is also by now a core component of the revised MAHE programme. The spatial thinking tools and applications that you will learn in GIS will help you to better comprehend sustainability issues as well as devise solutions for such problems. This course will enable you to apply GIS vis-a-vis cross-disciplinary perspectives in the Humanities with respect to the Southeast Asian context.	4
MAS940	Curriculum Leadership in Social Studies	Many issues and challenges are involved in the implementation of Social Studies, one of the most important subjects for citizenship education. This course prepares you to lead in the development of curriculum and pedagogy for Social Studies. You will be encouraged to explore the multiple meanings of curriculum and the role of curriculum leaders in Social Studies. Opportunities will also be provided for you to engage in discourses on the theory and practice of curriculum leadership.	4

Course Code	Course Title	Description	Academic Unit
MAS951	Global History of Development	Development is the purported goal of every state, whether it seeks to develop, to maintain its level of development, or to change the course or shape of its current level of development. But what do states mean when they talk about development? Why has development become so central to how we view the world? How has the definition of development changed over time? What is the relationship between development and sustainability? This course will help you question conventional assumptions about development, and to critically assess development in different historical contexts, with a particular focus on Asia and Africa. You will sharpen your critical thinking skills, widen your understanding of the global community, and gain tools to analyse present-day events in a historical framework. This course is for students who are interested in globalization, global inequality, the history of empires, the Cold War, geopolitics, and economics.	4
MAS982	Inquiry and Perspective in the Humanities	Recognising that inquiry is a valuable experience for postgraduate students, this 2 AU course offers you a chance to trace lines of inquiry with respect to a humanities related topic of your choice. Given that this is a 2AU course, the course assignment format, expectations, and workload are designed such that they would be manageable for you.	2
MTD901	Professional Practice Inquiry Project	This course aims to provide participants with a capstone experience to apply the theories and concepts learnt in the programme towards a workplace project. Participants will choose one option from the following: Needs Analysis Report, Instructional Package and Programme Evaluation and execute the project with a specific client. For each project, participants need to articulate the performance problems, collect data and articulate solutions using a data-driven and data-supported perspective. Throughout the process, participants work with supervisors who will serve as mentors for the project	4
MTD902	Foundations of Learning and Instruction	This course helps participants to build foundational knowledge of theories and principles of learning to support instructional design, training, and human resource development. Students will be able to critically analyze learning theories from the behaviourist, cognitivist, constructivist, and social constructivist perspectives. Students will also critically evaluate instructional theories from the different perspectives and relate it to their personal teaching practice through individual papers and online discussions.	4
MTD908	Training Methods and Strategies	Instructional designers need to have the knowledge of a wide repertoire of instructional theories, methods and strategies in order to address different types of performance gap. This course aims to provide conceptual understanding of the theoretical underpinnings of selected training/instructional methods and strategies. It aims to provide opportunities for students to explore concrete training/instructional design theories and to design appropriate strategies and/or activities to achieve the instructional objectives. Given a performance problem, the students will be able to apply the instructional theories and approaches to address the needs of the learners and the performance gap.	4
MTD910	Multimedia Design	Computer-based instruction allows the possibility of delivering lessons to students that employ multiple information modes (text, graphics, sounds, etc.) within a non-linear structure, which collectively falls under the rubric Multimedia. This subject covers the following areas: screen design, the use of media, learner control, navigation, and metaphor. At the end of the course, students will be able to * Describe the following medias pros and cons: text, graphics, audio, animations, and videos. * Describe the pros and cons of at least 4 navigation tools. * Apply the various design guidelines to develop a multimedia package	4

Course Code	Course Title	Description	Academic Unit
MTD912	Programme Evaluation Models and Methods	This course is intended to provide participants with an understanding basic theoretical, procedural, and technical aspects of evaluation. The goal is 4 to help participants develop some basic knowledge and skills in the application of evaluation models to various training programmes.	
MTD913	Teaching and Learning in Higher Education	<p>The Teaching and Learning in Higher Education (TLHE) course aims to provide a structured environment for early career faculty, within which they 4 can develop their practical skills and understanding of teaching in higher education. This course begins by exploring learning theories, course design, evidence-based teaching approaches, assessment, and communication with students within the context of their own teaching. Then, learners are provided with opportunities to sharpen their understanding by putting theory into practice. Through this course, they will have opportunities to develop their confidence in the teaching practice through reflection and participation in a community of practice, and as a result, develop a critical mindset that will continue to challenge the way they teach.</p> <p><b>Content Topics:</b></p> <ul style="list-style-type: none"> <li>Teaching in specific higher education contexts, e.g. NTU, Poly, etc.</li> <li>Learning theories</li> <li>Teaching in your discipline</li> <li>Course design</li> <li>Constructive alignment</li> <li>Assessment</li> <li>Designing learning activities</li> <li>Planning a lesson</li> <li>Facilitating Learning</li> <li>Evaluating your teaching</li> <li>Increasing your impact in teaching</li> <li>Showcasing your teaching</li> <li>Blended learning</li> </ul>	
MEA902	Visual Arts and Creativity	* Learners will understand the types of cognition involved in the creative process of art making. * Learners will experience the dynamic role affective responses play in the art making process. * Learners will understand the importance of interdisciplinary knowledge in engendering creative thoughts. * Learners will also acquire foundational knowledge to facilitate creativity in the classroom setting.	4
MEA904	Art Making and Aesthetic Enquiry	* To discover and observe contemporary art practices through artist studio visits * To evaluate and experiment with one's own artistic practice. * To produce a body of work through a personal artistic investigation.	4

Course Code	Course Title	Description	Academic Unit
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MCL901	Language Planning and Language Education	Language planning and language education complement each other. Language planning undergoes a stringent and comprehensive developmental process, providing recommendations to be implemented under language education. Language planning varies in different region in order to meet their respective needs, hence, resulting in the differences in language education. Understanding the relationship between language planning and language education will enable students to analyse, compare and objectively review the local language education.	4
MCL903	The Instructional Use of Children and Young Adults' Literature in Chinese Language Teaching and Learning	As a Chinese language teacher in a primary or secondary school, it is imperative to understand the relationship between children and adults literature and pedagogies. This course will help to enhance the understanding of the applications in children and young adults literature, allowing teachers to hone their teaching pedagogies. This course will examine the instructional use of children and young adults literature in Chinese language teaching and learning.	4
MCL904	Chinese Literature and Culture and Its teaching	As a Chinese literature teacher in a secondary school or junior college, this course is helpful in enhancing understanding the developments in Chinese literature and culture and allowing teachers to hone their teaching pedagogies. This course will examine the historical regularity and characteristics of Chinese literature and culture, and related pedagogical theory and practice based on the development of Chinese literature and culture.	4
MCL906	Chinese Educational Linguistics	Educational Linguistics is one of the major sub-fields of Applied Linguistics. It is an area of study that integrates the research tools of linguistics and other related disciplines of the social sciences in order to investigate holistically the broad range of issues related to language and education. With an in-depth knowledge of the educational linguistics, the teacher is better equipped to plan more effective and meaningful pedagogy. Overseas renowned scholars will be invited to share their forefront ideas, thoughts and experiences which will greatly benefit the students.	4

Course Code	Course Title	Description	Academic Unit
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MCT901	Curriculum: Theories and Issues	<p>The field of curriculum is characterized by a vigorous debate and a plethora of compelling arguments. This introductory course invites participants to examine major issues and debates in the field of curriculum studies, and to bring these ideas to bear on curriculum developments in Singapore. The course is structured around the following fundamental questions: How do we understand curriculum and the work it does? What knowledge is of most worth and what should schools teach? How should this be taught and for what reasons? How does the curriculum reflect a society's understandings of its past as well as visions and aspirations? Participants will be introduced to historical development, socio-economic assumptions, challenges of globalization and the implications of these and other factors on curricular reforms. As participants consider various approaches to exploring these questions, these insights will also guide their study of key curriculum issues in Singapore. The latter include the purposes of education, selection and organization of knowledge, access to knowledge, and methods of delivery in an increasingly global context. These analyses will be done in relation to both theory and practice, and with references to implementation issues in schools and classrooms.</p>	4
MCT902	Crafting the Curriculum	<p>The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. This being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needsThis course is an introduction to curriculum development. The underlying framework for the course is that curriculum building is a process that requires ongoing study and reflection about curriculum and the practice of teaching.</p> <p>Central and perennial curriculum questions explored are: What knowledge is of most value and worth? How is the learner and learning viewed? What is the role of teachers in creating and enacting curriculum?</p> <p>The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. Th is being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needs of learners, the socio-political milieu, and the moral and ethical dimensions of schooling.</p>	4

Course Code	Course Title	Description	Academic Unit
MCT903	Assessment in Education and Learning: Theories, Tensions and Issues	<p>Understand the central and pivotal role of assessment practices in constructing and enacting educational outcomes and experiences.</p> <p>Critically examine how assessment design, judgments and feedback practices construct the process and outcomes of learning.</p> <p>Develop an awareness of assessment as the primary mechanism for determining merit, and an important discourse for addressing social justice issues.</p>	4
MCT904	Understanding Teachers and Teaching: Theory and Practice	<p>This course explores two intertwining themes: (1) Teacher as the curriculum maker, which explores from the interpretive perspective on how teachers acquire the knowledge, skills, and values in forming their identity in situated teaching practices and curriculum making. How do we understand the composition of teachers knowledge, practice, and skills in making curriculum alive? What counts as teacher quality in an era of accountability? How do teachers provide and practice leadership in curriculum making? How do teachers learn at different points in the teachers professional continuum and in different contexts? (2) Teaching as a practice, one that has been historically understood by scholars, practitioners, and policy makers from a range of theoretical perspectives. What does it mean to conceptualize teaching as a practice situated in relation to curriculum, assessment and learning? What are the many ways people have thought about teaching as a practice, and what are the consequences of those perspectives for how we understand teaching? Who can create, evaluate, and critique knowledge about teaching? The course will introduce some major frameworks that have been used to guide research, policy recommendations, and the work of teachers and teaching.</p> <p>We consider the issues of teaching and teachers in an international context, drawing on research from Singapore and other countries. Some of our texts and video materials we will use will give us repeated opportunities to consider education in China, France, Japan, and the U.S. While they dont constitute a central focus of the course, they will give us some chance for shared discussion that draws on multiple and sometimes conflicting descriptions and interpretations of teaching and teacher in a particular setting. Thus, we further pursue the context-related questions when we make the familiar strange in such an international perspective: In what ways is teaching an embedded practice that is shaped by the many contexts in which it is situated? How is learning to teach a process of entering a particular culture? What does it mean to work as a teacher in response to the discourses prevalent in globalization, and the local culture of the students and the community?</p> <p>As participants consider various perspectives to exploring these questions, they will be guided to reflect upon their own teaching practices and professional identity, with references to educational reforms in schools and classrooms.</p>	4
MCT905	Theories and Perspectives on Learning	<p>This is a reflection-intensive, peer-learning course that offers opportunities for students to interpret and discuss some of the established theories and perspectives on how people learn. It will cover ideas from behaviorism, cognitivism, constructivism, and social-constructivism through key topics such as meaning-making, verbal understanding, inquiry learning, representations of knowledge, the process of knowing, situated cognition, and learning in community.</p>	4

Course Code	Course Title	Description	Academic Unit
MCT912	Curriculum and Programme Evaluation	This course offers an introduction to key considerations in interpreting and designing evaluation studies in the educational context. Through considering the purposes of evaluations and exploring the nature of major evaluation approaches, participants will develop understanding of the key aspects of designing evaluation studies. The primary assessment project for all students will be to design (but not conduct) an evaluation for a curricular programme, project or product.	4
MCT925	Assessment in School, for Society: Standards, Fairness, and Inclusiveness	This course seeks to provide a sociological perspective in analysing assessment practices globally and in Singapore, particularly in terms of educational narratives of standards, fairness, and inclusiveness. At the end of the course, students are capable in (a) situating history of assessment within emergence of modern society, (b) exploring social roles and purposes of assessment with case studies in Singapore and elsewhere (c) navigating the tensions and intersections of educational standards, meritocracy, and social justice in assessment, (d) imagining new ways of doing assessment for self-directing learning based on educative plural values. Overall, this course will provide teachers with insights into why they practice assessment in the way they do and prepare them for alternative ways of imagining assessment futures for greater fairness and inclusivity	4
MCT935	New Media and 21st Century Learning	This hands-on course aims to engage participants in examining the existing new media environment and provide an embodied new media experience for them. It addresses important, current issues in new media studies with in-depth discussion of popular perceptions/myths and implications to learning. Through the self-directed analysis of media content (critical media consumption) and production of media artefacts and participation in online communities (critical media prosumption), participants will gain a sense of new media culture and form their personal critique on the relationship between new media and 21st century learning for their refined practices.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MDP901	Social and Emotional Development and Assessment	This course is one of the two core (required specialization) modules in the Master of Education (Developmental Psychology) programme. The course contains major and classic social and emotional development theories that are fundamental to the participants before they take on other more specialized courses in the programme. It also introduces how to assess childrens social and emotional development.	4
MDP902	Children Cognitive Development and Assessment	Childrens cognitive development is the emergence of the ability to process information, think, and understand. Understanding childrens cognitive development is essential for curriculum development, effective teaching, and good policy making.	4

Course Code	Course Title	Description	Academic Unit
MDP903	Counselling Children and Adolescents	Teachers and other helping professionals who might not have the knowledge about basic counselling concepts and skills are often at a loss when faced with children or adolescents who need psycho-social and emotional support. This course provides one with information and skills needed to do basic counselling in settings such as schools and other educational centers.	4
MDP904	Motivation, Volition and Learning-in-Action	This course is designed to empower teachers, coaches, supervisors or parents to motivate their charges and to develop their volition to love, to will, to think and to make personal improvements so that they become happy and well-adjusted members of the community. The course examines biological-psychological research and theories related to enhancing motivation and volition in young and adult learners. It helps participants to understand why some renowned persons drive themselves to success while others seem to remain in mediocrity. Participants will engage in research practices and reflections as they relate their experiences to theories and hypotheses in daily practices based on the framework of Knowledge-Volition-Action.	4
MDP904	Motivation, Volition and Learning-in-Action	This course is designed to empower teachers, coaches, supervisors or parents to motivate their charges and to develop their volition to love, to will, to think and to make personal improvements so that they become happy and well-adjusted members of the community. The course examines biological-psychological research and theories related to enhancing motivation and volition in young and adult learners. It helps participants to understand why some renowned persons drive themselves to success while others seem to remain in mediocrity. Participants will engage in research practices and reflections as they relate their experiences to theories and hypotheses in daily practices based on the framework of Knowledge-Volition-Action.	4
MDP905	Individual Differences and Learning	This course will equip participants with the attitudes and pedagogical skills needed to meet diverse learning needs in a classroom. The objectives of the course include but are not limited to the following:  (1) determine implications of individual differences in personality, ability and well-being for teaching and learning;  (2) provide a rationale for the use of evidence based interventions (EBIs);  (3) contrast the key features of ADHD, ASD, LDs and giftedness;  (4) apply differentiated instructional strategies to collaboratively evaluate and revise a lesson plan to improve learning for those with atypical learning needs.	4
MDP906	Personality and Attitude Assessment	This course covers the non-cognitive aspects of educational assessment. Non-cognitive attributes such as attitudes, interests, and personality are important to education for the 21st century. The course complements those of cognitive assessments, to provide the breadth of knowledge for a MEd (Educational Assessment) specialist.	4

Course Code	Course Title	Description	Academic Unit
MDP907	How to Nurture Creative and Happy Learners	<p>It has been said that we live in the VUCA world Volatile, Uncertain, Complex, and Ambiguous. Creative individuals will cope well in the VUCA world, due to their capacity to think of original solutions to complex and challenging problems. At the same time, via incremental improvement or radical transformation of the VUCA world they live in, creative individuals can live happy, enriched and meaningful lives in society.</p> <p>This module infuses its participants with relevant KSAOs (Knowledge, Skills, Abilities and Others) to nurture creative and happy learners in the Singapore context. It achieves this goal by immersing participants in the theoretical and empirical research on creativity and happiness. By mastering this psychological domain of knowledge, participants will become skillful facilitators of creative and happy learners in the classroom, and thereby prepare their students for living and thriving in the VUCA world.</p>	4
MDP907	How to Nurture Creative and Happy Learners	<p>It has been said that we live in the VUCA world Volatile, Uncertain, Complex, and Ambiguous. Creative individuals will cope well in the VUCA world, due to their capacity to think of original solutions to complex and challenging problems. At the same time, via incremental improvement or radical transformation of the VUCA world they live in, creative individuals can live happy, enriched and meaningful lives in society.</p> <p>This module infuses its participants with relevant KSAOs (Knowledge, Skills, Abilities and Others) to nurture creative and happy learners in the Singapore context. It achieves this goal by immersing participants in the theoretical and empirical research on creativity and happiness. By mastering this psychological domain of knowledge, participants will become skillful facilitators of creative and happy learners in the classroom, and thereby prepare their students for living and thriving in the VUCA world.</p>	4
MDP908	Evaluation of Programs in Schools and Community Organizations	<p>It is important that stakeholders are able to know if current programmes in schools and organisations are effective and are bringing about the intended outcomes as planned. Periodic monitoring is also important to ensure that the standard and quality of the programmes remain robust. This course is therefore designed to help practitioners learn the skills of programme evaluation to enable them to appraise educational, social and community programmes in their organisations in a scientific and systematic manner - one that is grounded in the science of programme evaluation.</p>	4
MDP909	Assessment and Development of 21st Century Competencies	<p>The 21st century is often described as a VUCA world one that is volatile, uncertain, complex, and ambiguous. With new demands coming from the 21st workplace, it is thus imperative for educators in various educational institutions to develop students capacities to match the needs of the students future workplace. This thus indicates an imperative need to change the way educators craft their lessons and learning tasks so as to provide students with ample opportunities to gain authentic learning experiences and enable the transfer of relevant knowledge and skills from their classrooms to solve real world problems.</p>	4
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4

In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MED902	Integrative Project	<p>This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2
MED902	Integrative Project	<p>This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2
MEC901	Child Development (0-8 years)	<p>The MEC901 Course which is the first specialisation course in the MEd (EC) Program, provides the foundation for all the other specialisation courses.</p> <p>This course will help participants conceptualize childrens development across infancy, pre-school and primary school years (birth to 8 years) through the critical review of/reflection on various developmental theories, models, approaches and scholarly works.</p>	4
MEC902	Issues and Trends in Early Childhood Education	<p>This course aims is to empower participants to explore and reflect critically on key current and historical issues and trends underpinning the developments of early childhood education (ECE), and through this, to examine and discuss how ECE in the Singapore context can benefit from developments in the wider field, and yet stay relevant to its contextual demands.</p>	4
MEC903	Research Investigations in Early Childhood Education	<p>This course introduces students to the research design process in early childhood related topics. This course is essential in preparing students for their dissertation and MMM800 (Critical Inquiry) course which would require them to conduct a small research study within a single semester. This course provides the necessary preparation by allowing students to craft a coherent research design gathering literature, sifting through theories, identifying a focused topic and honing in on the studys purpose as well as selecting the specific research methodology for their study which is centered in the early years and commonly used in early childhood education.</p>	4
MEC904	Assessment in Early Childhood Education	<p>Assessment had become an important aspect in the early years as teachers need to document and provide evidence of childrens learning to various stakeholders such as parents and government authorities.</p> <p>In this course, participants will examine discourses and issues in assessment in early childhood (0-8 years old), and critically evaluate and (re-)design the assessment framework and related practices at a particular setting.</p>	4

Course Code	Course Title	Description	Academic Unit
MEC907	Diversity in Early Childhood Education	<p>Early Childhood (EC) classrooms in Singapore are becoming more and more diverse in nature. Teachers need to learn to work with children and families from different cultures and backgrounds.</p> <p>This course will introduce participants to the concepts of diversity and social justice in the early years. Participants will learn the importance of being aware as well as acquiring the necessary knowledge, skills, attitude, experience and dispositions to develop a personal pedagogy which promotes diversity and social justice to work with young children in EC classrooms. They will also learn the importance of promoting childrens voices in research, practice and policy in the field of early childhood care and education (ECCE).</p>	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MAX901	Assessment Principles and Methods	A foundational knowledge of measurement and assessment in education is requisite to the MEd (Educational Assessment) specialization. This course introduces participants to the general process of educational assessment and the key concepts, principles, and techniques of assessment.	4
MAX902	Paradigms and Practices of Assessment	This course seeks to provide strong fundamentals for participants to acquire a critical level of foundational assessment literacy, engage with different paradigms of knowledge, and be proficient in the application of key assessment practices. Assessment is posited as the object of study, and also as the key driver for designing the structure, pacing, and pitching of the course content. Participants are required to grapple with a range of assessment concepts, some of which are not literally nor easily reconcilable, and to distil a conceptual clarity from which they may interrogate their own assessment practice contexts.	4
MAX912	Theory and Assessment of Psychological Constructs	At the end of the course, students will be able to: 1. Understand the principles of affective measurement and assessment, and psychological scaling methods 2. Select published psychological scales, or to adapt or construct relevant affective measures 3. Develop a scale to assess psychological constructs	4

Course Code	Course Title	Description	Academic Unit
MAX913	Programme Evaluation	<p>It is important that stakeholders are able to know if current programmes in schools and organisations are effective and are bringing about the intended outcomes as planned. Periodic monitoring is also important to ensure that the standard and quality of the programmes remain robust. This course is therefore designed to help practitioners learn the skills of programme evaluation to enable them to appraise educational, social and community programmes in their organisations in a scientific and systematic manner - one that is grounded in the science of programme evaluation. As a specialisation elective, the course caters to the interested MED (Educational Assessment) student.</p>	4
MAX923	Rethinking Assessment in School, for Society: Standards, Fairness, and Meritocracy	<p>This course seeks to provide a sociological perspective in analysing assessment practices globally and in Singapore, particularly in terms of educational narratives of standards, fairness, and inclusiveness. At the end of the course, students are capable in (a) situating history of assessment within emergence of modern society, (b) exploring social roles and purposes of assessment with case studies in Singapore and elsewhere (c) navigating the tensions and intersections of educational standards, meritocracy, and social justice in assessment, (d) imagining new ways of doing assessment for self-directing learning based on educative plural values. Overall, this course will provide teachers with insights into why they practice assessment in the way they do and prepare them for alternative ways of imagining assessment futures for greater fairness and inclusivity.</p>	4
MAX933	Assessment in the Generative AI (GAI) Age	<p>This course examines the evolving landscape of educational assessment in the age of generative AI (GAI). Rather than focusing on the technology itself, we will critically analyze how GAI impacts assessment practices while upholding fundamental assessment principles. We will learn to design effective assessments that leverage GAI for personalized learning and feedback, while grounding ourselves in enduring assessment concepts. We will also investigate how GAI can uncover deeper insights from assessment data and facilitate self-directed learning. Using Selwyn's socio-technical framework, we will problematise the context, looking into the limitations, and ethical considerations of GAI in assessment, emphasizing the enduring priorities in this rapidly changing times.</p>	4
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MED902	Integrative Project	<p>This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2

Course Code	Course Title	Description	Academic Unit
MED903	Elementary Statistics for Education	This course provides the MEd (Educational Assessment) graduate student with the skills and understanding of elementary statistics and their applications in the social and behavioural sciences. Basic statistical literacy is required in a critical reading of research literature and in conducting sound research. It is essential knowledge for a MEd(Educational Assessment) graduate working in the field of educational measurement and evaluation	4
MED904	Multivariate Statistics	This course is designed for higher degree students who want to apply different multivariate statistical methods into applied fields such as educational measurement, experimental/quasi-experimental studies and correlational studies. The students will get hands-on experience in running SPSS and AMOS to analyze data.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MEL901	Language and Literature Education	Historically, literature and language have not been dichotomous terms. Literature as a concept emerged in the fourteenth century and its latin root is <i>littera</i> denoting a letter of the alphabet. In this sense literature was tied to literacy or, more specifically, the ability to read. It was only later that literature became connected to the concept of taste involving the ability to read particular kinds of text and the discipline emerged in distinction from fields of language and linguistics. In this course, we seek to examine historically the disciplinary schism between English language and English literature and explore socio-cultural, linguistic and textual theories advocating an integrated approach to English language teaching. In the process, we aim to problematize the dichotomies between reading and writing, literacy and literariness, the functional and the aesthetic.	4

Course Code	Course Title	Description	Academic Unit
MEL902	Analyzing Literature and Language	<p>This course introduces participants to the study and analysis of styles in canonical and non-canonical literary texts, as well as other similarly creative texts such as advertisements, using fundamental linguistic and literary tools. It is an interdisciplinary course spanning the borders of English language and English literature, which are presently framed in the school curriculum as two subjects even though they are mutually constitutive fields of inquiry. As education expands globally and exponentially, it is imperative that both language teachers and literature teachers promote learners who are able to systematically identify and critically evaluate or appreciate the qualities of language used for particular effects in a plethora of creative texts which exist around them. Participants in this course will have opportunities to examine and describe the forms of texts, interpret their communicative functions and offer evaluations of the textual effects created, supported by language-based evidence.</p>	4
MEL913	Materials Design in the Language Curriculum	<p>The course will deal with principles and techniques in the evaluation, adaptation and development of English language teaching-learning materials for school-age learners. It will prepare students to understand the principles of materials design and think about the place of materials in course planning and teachers role in evaluating and adapting published materials, and selecting and designing supplementary materials. Systematic procedures for materials evaluation will be introduced and students will source, analyse and consider how to exploit supplementary materials that fulfill curricular objectives. Finally, since it is essential that teachers know how to design materials, students will be guided to develop their own materials for the teaching of language systems and skills, and for the promotion of higher-order thinking skills. Concepts such as differentiation, interdisciplinarity and learner involvement in materials selection and creation will be discussed.</p>	4
MEL923	Literary Theory and Teaching	<p>Central to this course are questions of power and identity in relation to the aims and outcomes of education. How are different critical approaches to literary criticism implicated in the ethics and politics of schooling? What ideological orientations underpin different modern and postmodern approaches to literary criticism? What kinds of subjectivities are privileged and/or marginalized in each of these approaches? How might critical engagements with the theory and practice of literature education inform and even reform teachers pedagogical practices in the classroom? To what extent might an understanding of critical theory call for a redefinition of the desired outcomes of literature education in Singapore?</p>	4
MEL924	World Literatures	<p>This course examines the emergence of world literature as a concept and field in the new millennium. What does it mean to read and teach world literature in an age of high-speed global interconnections, transborder crossings, intercultural encounters and fears about a planetary environmental crisis? Topics for discussion include questions of world-making and worlding; the international book market; postcolonialism and diaspora; nations and borders; memory and history; the dominance of global English; the importance of translation and circulation; and the Anthropocene. Throughout the course, students will engage with selected poems, short stories, novels and essays from Southeast Asia, South Asia, East Asia, the Middle East and beyond. The class will also engage closely with specific theoretical writings, including work by Johann Wolfgang von Goethe, Mario Siskind, Kwame Anthony Appiah, and Minae Mizumura, among others, to develop various conceptual approaches to interpreting world literature(s). From the pedagogical angle, students will also compare world literary with nation-centric approaches in teaching literature, focusing in particular on the notion of a cosmopolitan approach to education.</p>	4

Course Code	Course Title	Description	Academic Unit
MEL930	Language Assessment and Technology in the Classroom	The primary purpose of this course is to offer students who have an interest in language assessment the opportunity to gain practical knowledge and skills, with a particular focus on the use of technology in the field. As part of the course, students will develop an understanding of how emerging technologies, such as artificial intelligence (AI), are being increasingly employed in language assessment. Upon completion of the course, students will be equipped to apply their knowledge of language assessment and technology to real-world situations. This course is designed for students who possess a genuine interest in language assessment and are committed to investing the necessary time and effort to engage with the course material. The course delves into theoretical discussions and hands-on activities, allowing students to develop their skills in using technology in language assessment. Ideal candidates for this course are those eager to explore the practical applications of technology in language assessment, including the utilization of AI. As new technologies continue to play an ever-growing role in language assessment, understanding the underlying technology and its applications will prove invaluable for future careers or studies in this area. By the end of the course, students will have acquired practical skills and knowledge that can be readily applied to their future work in the field of language assessment.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MHA901	Understanding Learners with High Ability and their Affective and Moral Needs	This course provides an overview to the intellectual, socio-affective and moral needs of learners with high ability. Teachers will be introduced to the historical and philosophical background and current thinking in the education of learners with high ability. The course would also look into the typical personality characteristics of highly intelligent and creative persons. Other issues related to spiritual intelligence, emotional giftedness, moral reasoning, intensities in energy levels and positive maladjustment will be explored. Discussions of motivational and volitional strengths as sources of productive behaviours; underachievement and dual exceptionality will be featured as well to enhance the capacity of professionals in this area to make a difference in their students development and address their affective, moral, as well as cognitive needs.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MLT909	Research Methodologies for the Learning Sciences	1. Concept, purpose and process of conducting research 2. Research and ethics 3. Identifying research problem 4. Conducting critical literature review 5. Writing research questions 6. Designing surveys and interviews 7. Collecting quantitative data 8. Collecting qualitative data 9. Analysing quantitative data 10. Analysing qualitative data 11. Reporting research	4

Course Code	Course Title	Description	Academic Unit
MLT913	Assessment in the Generative AI (GAI) Age	This course examines the evolving landscape of educational assessment in the age of generative AI (GAI). Rather than focusing on the technology itself, we will critically analyze how GAI impacts assessment practices while upholding fundamental assessment principles. We will learn to design effective assessments that leverage GAI for personalized learning and feedback, while grounding ourselves in enduring assessment concepts. We will also investigate how GAI can uncover deeper insights from assessment data and facilitate self-directed learning. Using Selwyns socio-technical framework, we will problematise the context, looking into the limitations, and ethical considerations of GAI in assessment, emphasizing the enduring priorities in this rapidly changing times.	4
MLT917	Artificial Intelligence for Education: A Pedagogical Spectrum	Modern artificially intelligent systems for education (AIED) embody various pedagogical models to scaffold participants learning, each of which holds different implications for how the technology is designed and what kind of data is generated. This seminar-based course will showcase concrete use-cases of AI systems for education that are aligned with pedagogies such as mastery, inquiry learning, collaborative learning, socio-emotional learning, embodied learning, and demonstrate how they work and what their limitations are. By showcasing how these different learning possibilities can be created with AI-enabled technology, the course will enculturate participants into the practice of teaching with technology for active learning to create more participatory, connected and reflective classrooms. Taken together, in strong alignment with MOEs most recent EdTech masterplan 2030, this course will strengthen participants proficiency in e-pedagogies and their know-how of cutting-edge practices for creating and critiquing technology-enabled learning experiences drawing on artificial intelligence for education.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MML915	Assessment for Learning in Malay Language Classroom	This course aims to explore the theoretical understanding, issues and complexities of authentic and alternative assessments within the classroom context and alongside the traditional examinations practices. The course highlights the three principles of Assessment for Learning. Firstly, the principle of Making Learning Explicit focuses on the role of the teacher to make learning and assessment meaningful for the learner. The second principle, Promoting Learner Autonomy focuses on the role of the teacher in developing independent learners. Finally, the third principle, Focusing on Learning (Not Performance) aims to get participants to focus on their roles as teachers to challenge traditional assessment attitudes in favor of assessment that is more formative and focused on the learning process.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4

Course Code	Course Title	Description	Academic Unit
MME913	Algebra and the Teaching of Algebra	<p>This is a specialisation elective course for the MEd (Mathematics) programme.</p> <p>This course contributes to the following programme objectives particularly in the area of algebra and its teaching: (1) build the participants knowledge of the mathematics subject matter; (2) develop the participants competencies in conducting educational research. In addition, the course also addresses teachers and students misconceptions in the learning of algebra in support of another programme objective of providing participants with knowledge related to specific ideas in mathematics education.</p>	4
MME931	Contemporary Issues in Mathematics Education	<p>This is a specialisation elective course for the MEd (Mathematics) programme that offers special topics in mathematics education.</p> <p>It contributes to one or more of the following programme objectives: (1) develop the participants competencies in conducting educational research; (2) provide participants with the knowledge and skills related to specific ideas in mathematics education; (3) develop the participants ability to relate the theoretical ideas in mathematics education to the authentic problems of practice faced by teachers in the classroom; (4) develop the participants ability to relate the theoretical ideas in mathematics education to the authentic problems of practice faced by teachers in the classroom, or (5) develop the participants disposition of inquiry towards issues and topics in mathematics education.</p> <p>This course also serves to enhance the programme by tapping into the knowledge and expertise of researchers who are involved in cutting edge research in this field of study.</p> <p>This course may be structured in such a way that it is offered as an intensive course within a short period of about two weeks. As such, it is suitable for full-time students or students who need to take courses over a shorter period of time.</p>	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MUE901	Issues in Music Education	<p>This course focuses on the historical, psychological and sociological foundations of teaching and learning music. The course also explores in depth current curricular thinking and issues in music education.</p> <p>By the end of the course, students should be able to: i) Articulate the historical underpinnings of music education in Singapore ii) Relate current thinking about the teaching and learning of music from an international perspective to the local context iii) Identify current issues within music education with theoretical and pedagogical understanding.</p>	4

Course Code	Course Title	Description	Academic Unit
MUE903	Popular Culture and ICT in Music Education	<p>This course consists of two main components. Firstly, it examines the development and practice of popular musics through practical sessions and critical review, and explores fundamental concepts and issues on their applications and implications in the music classroom. Secondly, it provides a theoretical basis for developing music curriculum and pedagogy for schools by examining ways in which ICT is used in music and music education.</p> <p>* Popular musics and their significance in music education. * Development of popular musics from its Anglo-American Roots; development of vernacular pop musics in Asia such as J pop, K pop, Bhagra, Mat-Rok and Canto-Mando pop. * Exploring musical genres: Rhythm Blues, Funk, Soul, Blues, Rock Roll, Rock, Fusion Rock, Heavy Metal and standard Top 40s pop and media music charts. * Learning to Perform in a real music setting; practical sessions on the basic techniques of various pop instruments. * Popular music pedagogical practices and their applications in the music classroom. * Theoretical survey of ICT applications and platforms and their practical applications in music teaching and learning.</p>	4
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MSC903	Science as Practice	<p>* To provide more science education courses for participants to choose in the MEd programme * To strengthen the theory and practice nexus of science as practice in science teaching * To enable participants to make connections between the ideas of science as practice to other classroom practices</p>	4
MSC908	STEM Education History, Policies, and Research Trends	<p>This course provides an overview of the history of STEM education, including the emergence of STEM and STEM education in the US and its development in other regions, such as Europe and Asia. STEM education policies in selected countries, including Singapore, will be examined and discussed. Empirical studies will be analyzed and discussed to highlight trends in STEM education research. Differences in interpretation of STEM education will be highlighted in light of the STEM education policies and research discussed.</p>	4
MED900	Educational Inquiry	<p>This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.</p>	4
MED902	Integrative Project	<p>This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2

Course Code	Course Title	Description	Academic Unit
MED902	Integrative Project	<p>This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2
MSE901	Issues and Trends in Special Education	<p>This introductory course is designed to provide an overview of the issues and trends in the field of special education. The challenge for participants is to sift through competing information and arguments to build ones personal opinions or perhaps even question or change ones opinions about the education of children and adolescents with special needs.</p> <p>The course will provide participants with an understanding of special education in both international and local context, and highlight varied viewpoint relating to issues such as inclusion, accommodation of students with special needs, and the application of evidence-bases practices.</p>	4
MSE901	Issues and Trends in Special Education	<p>This introductory course is designed to provide an overview of the issues and trends in the field of special education. The challenge for participants is to sift through competing information and arguments to build ones personal opinions or perhaps even question or change ones opinions about the education of children and adolescents with special needs.</p> <p>The course will provide participants with an understanding of special education in both international and local context, and highlight varied viewpoint relating to issues such as inclusion, accommodation of students with special needs, and the application of evidence-bases practices.</p>	4
MSE911	Learning Disabilities	<p>This course introduces students to the nature and cause of learning disabilities, and their assessment and intervention. Students will also have the opportunity to examine the research literature on the effectiveness of various practices as well as learn about the issues and debates in the field. This course provides an in-depth study on learning disabilities to equip students with relevant content knowledge and selected intervention skills to work with learners with learning challenges.</p>	4
MSE912	Early Intervention	<p>This course features a multi-disciplinary nature, which is crucial to transdisciplinary collaboration, a fundamental tenet within the early intervention of young children with disabilities as well as those at risk. A primary focus is the theoretical tenets, contextual elements in the practice of early intervention, and evidence-based intervention approaches. Participants will be guided through various formats of learning to be able to understand the history and theories of early intervention in the global literature, as well as to apply their understanding in the investigation of the contemporary early intervention programs, practices, policies, and future trends for development.</p>	4

Course Code	Course Title	Description	Academic Unit
MSE916	Multi-Tiered Systems of Support (MTSS) to Build Success in Literacy for Educators	Multi-Tiered System of Supports (MTSS) is a framework that helps educators provide academic and behavioural interventions for students. The goal of MTSS is to systematically provide every child with the additional time and support to learn at high level by improving the match between instructional provisions and students learning needs through a continuum of learning support. This course will look specifically at identifying literacy and meeting these needs. Participants in the course will learn how to address literacy problems for all students through increasingly differentiated and intensified literacy assessment and instruction. As this framework takes a systemic approach, it is relevant to school personnel at different levels: school leaders, Heads of Department, Allied Educators (Learning and Behavioural Support), Learning Support Coordinators and classroom teachers. Educators in mainstream as well as special schools will benefit from this course. In order to benefit from this course, participants are required to have basic knowledge of reading instruction.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MTL902	Tamil Literature in Education	The course aims to provide a comprehensive coverage to develop various theories and theoretical approaches through the study of Tamil literature. Introduction and history and components of new poems and drama in Tamil Language. An in-depth study of selected topics on Tamil history and culture in Sangam poems, medieval and modern literature will be taught. By studying Singapore Tamil literature, teachers would be able to comprehend the educational, historical and social changes in Tamil culture and its relevance in today's society. For example, teachers would be able to perform a critical analysis on the readings of curriculum literary texts.	4
MTL908	An Introduction to Sociolinguistics and Bilingualism for Tamil	This module aims to widen students' knowledge on Language acquisition theories and background theories on monolingual, bilingual and multilingual contexts. This module also covers the key concepts of Sociolinguistics and bilingualism policy in Singapore. This module will provide additional understanding on student profiling and learning strategies for effective learning acquisition. Creating content and language development lessons to students. The module elaborates on the importance of Standard Spoken Tamil and its development in Singapore.	4

Course Code	Course Title	Description	Academic Unit
MES900	Research Methods in Exercise and Sport Studies	<p>This course will equip students with an overview of research methods relevant for exercise and sport studies. Topics covered include: approaches/perspectives in research methodologies, critical thinking, communication of research, ethics in research, quantitative methods, qualitative approaches, and advances in research methodologies.</p> <p>Primarily, students will learn about the implications of research methods through multiple mini-research projects. A mix of face-to-face interactions, online learning and group work is implemented in this module.</p> <p>By the end of the module, the student will be able to:</p> <ul style="list-style-type: none"> <li>Articulate what research methods is about comprehensively.</li> <li>Demonstrate critical thinking necessary for producing and consuming research.</li> <li>Produce prototypes of qualitative and quantitative research.</li> <li>Make an ethics application (IRB)</li> <li>Demonstrate grasp of contemporary issues in research methods.</li> </ul>	4
MES901	Integrative Project	<p>This course will equip students with an advanced level understanding on research methods and critical inquiry. Topics covered include: science knowledge, scientific research an inquiry, scientific writing, and scientific presentation.</p> <p>Students will carry out a small research project, integrating skills and knowledge gathered over the MSc ESS programme. The deliverables are a research paper and a presentation.</p>	2
MES906	Exercise Physiology	<p>This course explores how the human body responds to acute and chronic physiological demands of sports and exercise.</p> <p>The module will cover energy systems, cardiovascular and respiratory regulation, skeletal muscle physiology and aspects of environmental effects on sports and exercise performance. An integrative approach is adopted to link between basic theories and applied concepts in real life situations. A key focus will be on how research and the underlying exercise physiology principles are relevant to the practitioner. Common assessment techniques with practical applications in sports and exercise physiology will be discussed.</p> <p>Students will perform laboratory work using state-of-the-art equipment, alongside lectures and tutorials. A mix of face-to-face interactions, online learning and group work is implemented in this module. It is intended that students be guided to holistically integrate the knowledge presented throughout the module.</p>	4

Course Code	Course Title	Description	Academic Unit
MES907	Managing Sport Organisations in Singapore	<p>This module examines fundamental organisational theories in sport organisations. The topics include organisational structure and design, problem solving/decision making, power/conflict and organisational culture. At the end of the module, graduate students will develop a broad understanding of management issues in sport organisations.</p> <p>Graduate students will be involved in assignments that provide an opportunity to examine the latest research in organisational behaviour. In addition, they will be given projects that are both practical and applied including case studies.</p>	4
MES909	Motor Behaviour	<p>This course will equip students with an advanced level understanding of motor behaviour. Topics covered include: Theoretical paradigms in motor behaviour, Motor control mechanisms and explanations, Dynamics and process of skills acquisition, Critical milestones and issues in motor development</p> <p>Applications in PE and sport settings, and research approaches in motor behaviour. Students will get an opportunity to work on a practical problem as part of the research experience. A mix of face-to-face interactions, online learning and group work is implemented in this module. It is intended that students be guided to holistically integrate the knowledge presented throughout the module.</p>	4
MLS941	Critical Inquiry (Clean Energy Physics)	<p>This is a compulsory course offered to participants of Clean Energy Physics who are enrolled in the complete coursework route. Participants in this course will acquire experimental skills/techniques which are specific to Clean Energy Physics Specialisation. This course will enable participants to enhance their higher order thinking skills like critical thinking, problem solving, and application of knowledge through the use of the science Inquiry approach to solve clean energy related problems.</p>	2
MLS944	Nuclear Physics and Fission Energy	<p>Nuclear Energy presently contributes about 15% of the Worlds supply of electricity with minimal production of CO2 and other greenhouse gases. This course provides in-depth coverage of the physics related to nuclear energy (basic nuclear physics, fission reactions, neutron physics, reactor physics, radiation interactions) together with a general overview of some important aspects of nuclear energy systems, including: reactor technologies, the nuclear fuel cycle, uranium and thorium resources, nuclear safety, and the human health effects of radiation. The contribution that nuclear energy can make to the security and sustainability of energy supplies is highlighted.</p>	4
MLS948	Molecular Spectroscopy	<p>The course on Molecular Spectroscopy will provide the students with the theoretical knowledge and the experimental tools in understanding the properties of many different materials especially those used in clean energy technologies e.g. the materials used in solar cells and biofuels. In this course, the students will learn and use the techniques applied in molecular spectroscopy, and they are microwave, infrared, and Raman spectroscopies.</p>	4
MLS952	Nanotechnology	<p>This is an elective course that is designed for students to understand the physics, technology and applications of nanoscaled materials and devices. These include quantum confinements in 0, 1, 2 and 3 D systems, assembly and characterization of nanostructures, nanofabrication and application of various functional devices.</p>	4

Course Code	Course Title	Description	Academic Unit
MLS962	Environmental Health and Toxicology	<p>The study of the effect of pollution on natural ecosystems by examining biological responses at all organismal levels (molecular to whole organism) using biomarkers is an increasingly popular tool for managing environmental health by various governmental bodies.</p> <p>MSc (LS) Environmental Science candidates who take this course will have an opportunity to run laboratory experiments using known pollutants. Field sampling will be conducted to examine possible correlations with environmental contamination, allowing candidates to experience a direct application of ecotoxicology techniques as an environmental management tool. This experimental extension allows for a more rigorous assessment of a research-based course.</p>	4
MLS964	Global Environmental Change and Vulnerable Ecosystems	Accelerated change in the environment on a global scale has been observed in the Anthropocene. The drivers of these global scale changes are attributed to human activities that relate to an unsustainable rate of development. Natural ecosystems (both terrestrial and aquatic) are impacted by environmental change, particularly when the scale and intensity of change exceeds the natural resilience and tolerance states of these ecosystems. It is important to be able to monitor and understand the impacts of environmental change to whole systems, especially vulnerable tropical ecosystems which largely support more than half of the earths human populations. This course aims to look at global environmental change and their impacts on vulnerable ecosystems from a scientific perspective, utilising state of the science technologies and newly developing knowledge. The course will be delivered as a practice-based field-orientated programme, which will have an overseas field component.	4
MLS971	Critical Inquiry (Environmental Biology)	<p>This is a compulsory course offered to participants who are enrolled in the Critical Inquiry (CI) route.</p> <p>Participants in this course will acquire experimental skills/techniques specific to the Environmental Biology specialisation of the Life Science Programme. This field and lab-based course introduces current research approaches and methods employed by scientists in gathering data pertaining to plant and animal physiology, biochemistry and molecular biology, adaptations and behaviours. Participants will have the opportunity to conduct field experiments under the guidance of experts using field instrumentation and laboratory analyses. Techniques include plant physiology, ecotoxicology, chemical ecology, microbiology, molecular biology and pharmacognosy. Participants will also conduct field experiments and analyses of research data.</p>	2
MLS985	Chemical Ecology	This course explores the role and function of chemistry in mediating interactions among a variety of organisms, including intraspecific and interspecific interactions. The course will cover the range of compound classes involved in chemical ecology. In addition, we will discuss the diversity of species interactions and chemical compounds in terrestrial and aquatic systems, and methods (e.g. analytical and molecular techniques) used to detect these compounds. We will cover defensive and offensive chemistry mediating antagonistic interactions; the evolution of defenses; chemicals mediating mutualisms, competition, and sociality; the physiology of chemical production and recognition; and how chemical ecology affects humans. The biotechnological applications of chemical ecology will also be discussed. This course will include paper discussions of relevant recent literature.	4

Course Code	Course Title	Description	Academic Unit
MSM901	Fundamentals of Postgraduate Mathematics	This course aims to bring you up to speed with regard to the fundamentals of postgraduate mathematics. It involves process skills such as reading mathematics texts and writing mathematics reports, mathematical problem solving, and computational thinking via coding. It is anchored in advanced mathematics content that will allow you, as Felix Klein proposed, to view school mathematics from a higher standpoint. Content includes proof techniques, set theory and logic, and various aspects of infinity. This course is intended for educators, especially secondary and post-secondary school teachers, to help them to have an in-depth conceptual understanding of some topics in school mathematics such as number systems, calculus, and computational thinking from an advanced perspective of mathematical theory building and processes. This course will also lay a foundation for students in the Master of Science(Mathematics for Educators) programme.	3
MSM902	Selected Topics in Mathematics	This course aims to expose you to some selected contemporary topics in mathematics.	3
MSM903	Algebra	This course in abstract algebra aims to introduce you to rings, groups, and possibly other algebraic structures such as modules, and to present a range of examples to facilitate the understanding of the abstract theory so that you have a good grasp of the fundamental concepts in abstract algebra. This course is intended for educators, especially secondary and post-secondary school teachers, to help them to have an in-depth conceptual understanding of some topics in school mathematics such as number systems, polynomials, from an advanced and structural perspective of abstract algebraic systems. This course will also lay a foundation for students who plan to pursue a PhD in areas related to abstract algebra.	4
MSM906	Discrete Mathematics	This course aims to expose mathematics educators to counting principles which will enhance their content knowledge of teaching permutations and combinations, as well as elementary probability. Additionally, this course introduces a useful branch of discrete mathematics called graph theory which has many applications in modelling real-life contexts. This course also lays a foundation for students who plan to pursue a PhD in the area of discrete mathematics.	4
MSM908	Number Theory	This course in number theory aims to introduce you to fundamental concepts in elementary number theory, including divisibility and primes, unique factorization, congruences and quadratic reciprocity. This course is intended for educators, especially secondary and post-secondary school teachers, to help them to develop an in-depth conceptual understanding of some topics in school mathematics such as number systems, greatest common divisor, and the Fundamental Theorem of Arithmetic. Real world applications of number theory will also be discussed. Examples include the use of check digits for error detection in our National Registration Identity Card (NRIC) numbers and the RSA encryption system for secure online transactions. This course will also lay a foundation for students who plan to learn more advanced mathematics in areas related to algebra and number theory.	4

Course Code	Course Title	Description	Academic Unit
MSL901	Foundations in Science of Learning	<p>The Science of Learning (SoL) frontier draws upon a science-based understanding of the effectiveness of education methods as well as develop new teaching and learning strategies that can lead to actionable and scalable interventions for enhanced learning outcomes. Rapid developments in neural and physiological imaging technologies afford opportunities for a science-based understanding of the effectiveness of education methods as well as develop innovative pedagogies and classroom practices to realise better learning outcomes of learners.</p> <p>With an evolving education landscape, there exists a need to contribute to the understanding of the principles and practices that optimally support teaching and learning across the life-long learning trajectory - from infant to adulthood, with a focus on enhancing learning across diverse learner profiles e.g. (at-risk, mainstream) in Singapore's classroom learning environment.</p> <p>This proposed course aims to address a key gap that exists in the translation of scientific research evidence into pedagogical practice. Specifically, the course will provide participants with the necessary foundational, broad-based understanding in philosophies and theories of the science of learning that draws upon educational neuroscience work. Strong grounding of the theoretical basis for science of learning will facilitate translation pathways of scientific research findings towards innovative learning designs and technological tools that are relevant and useful in current learning contexts.</p>	4
MSL902	Science of Learning: Research Methods	<p>As the name implies, the Science of Learning is reliant on the scientific method in studying how humans learn. In turn, the scientific method is the manifestation of modern science as we know it from Karl Popper, Thomas Kuhn and Paul Feyerabend. As a consequence, if one intends to practise the Science of Learning, one has to know how modern science is conceptualised in the form of research methods and operationalised by means of data-analytical techniques.</p> <p>In addition, since the Science of Learning is frequently associated with the application of neuroscientific methods, it seems appropriate to incorporate some educational neuroimaging techniques, such as functional near-infrared spectroscopy, in the standard repertoire of research methods.</p> <p>Finally, it is not sufficient to be only proficient in the application of research methods and statistical data analyses, but one should also be able to effectively communicate the procedures involved and the results obtained. Thus, academic report-writing is a vital skill every educational researcher should master.</p>	4

Course Code	Course Title	Description	Academic Unit
MSL903	Learning Analytics for Science of Learning	<p>Learning analytics is an emerging field of study that has been gathering broad interests in educational research and practices; recent research has harnessed the power of learning analytics to enhance understanding of learning processes.</p> <p>Learning analytics can be a game-changer that creates more effective learning environments by providing useful insights that help us to understand, visualize and predict learners performance, provide learners with personalized learning, and increase retention and success rates.</p> <p>As a relatively new field of study, there is no such course offered in NIE. Learning analytics can bolster the scientific bases of learning through making visible empirical evidences of learning. Hence it is timely to introduce this course as a new and relevant specialized elective for the MSc (Science of Learning) programme.</p>	4
MSL904	Educational Neuroscience: Principles, Perspectives, Advances in imaging techniques, behavioural and psychological research enable the integration of disciplines that investigate human learning, Practices	<p>opening up possibilities for the enhancement, update and eventually the reform of educational theories and practices. The field of educational neuroscience and its potential contributions to educational research is now more pronounced than before. Apart from shedding light on brain mechanisms that underpin cognitive and social learning development, research on brain science is also contributing towards neurobiological evidence-based interventions that are addressing educational concerns. These include issues such as i) early learning struggles and early intervention, ii) challenges that individual differences pose, iii) effectiveness of educational and treatment approaches to cognitive struggles and deficits, iv) widening possibilities that brain plasticity brings to normal (e.g. life-long learning) and more. Such a neuroscience and education convergence not only carry multiple implications for educational policy but at the same time, foregrounds the mutual benefits of the interaction between neurobiology and education, as education may also conceivably offer a naturalistic framework for research on the brain.</p> <p>This course is designed to follow the Foundations in Science of Learning course, and although it is not necessary to have taken this course previously, students will be expected to undertake some specified pre-reading.</p>	4
MSL909	Integrative Project	<p>This research-based course consolidates students overall learning from the programme. It requires students to identify a Science of Learning education related issue, which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.</p>	2

Course Code	Course Title	Description	Academic Unit
MTC905	Understanding and Developing Pedagogical Content Knowledge	<p>Among the various aspects of teacher knowledge (e.g., content or subject matter knowledge, pedagogical knowledge, knowledge of students, instructional knowledge, knowledge on assessment, curriculum knowledge), pedagogical content knowledge (PCK) has been proposed to pull together these knowledges. Hence, its relevance to educators, especially teachers (or pedagogues) is of high importance. The need to be highly skilled in PCK become very salient in the context of the demands placed on professionals to bring about effective learning in learners in order to nurture competencies required for the future society and economy.</p> <p>In the context of the programme, this course will bring together the interconnections of learning of the four courses: curriculum designing, assessment for learning, and learning using technology. This course allows participants to understand the concepts of PCK, and identify and explore a topic within the curriculum that are of key interest and relevance in their respective subject disciplines. For each created topic, the constituent knowledge domains of curricular knowledge, knowledge of representations i.e. teaching strategies for teaching the topic, and knowledge of student conceptions and assessment will be included.</p>	4
MTC906	Educational Inquiry into Teaching and Learning	A strong foundational knowledge of research methods is generally essential for all masters students doing research work even inquiring into specific areas such as teaching and learning. This course will sensitize and familiarize participants with the understanding of the research process and the key concepts, principles and techniques of both quantitative and qualitative research paradigms. Specifically, course participants will be introduced to the fundamental processes of research work (e.g. formulating research questions, literature review, designs and approaches, data collection, data analysis, and interpreting research data).	4
EDCT901	Inquiry into Curriculum and Teaching	The course aims at assisting doctoral students in developing a critical, broad, and well-informed understanding of the complexity and dynamic nature of curriculum, curriculum making, and classroom teaching and a capacity for conducting inquiry into complex curricular and pedagogical issues. At the end of the course, students are expected to: (1) become familiar with the major works, ideas, and terms in curriculum studies and related fields; (2) be able to relate research on curriculum and teaching to broad social, cultural, institutional, and political contexts, issues and concerns; (3) apply theories to critically analyze specific curricular and pedagogical issues and formulate defensible solutions; (4) develop abilities to read, analyze, and critique scholarly texts and ideas; and (5) develop abilities to produce academic writing.	4
EDEL901	Sociolinguistic Perspectives on the Classroom	This course seeks to examine language in its social context, including language use in multilingual communities, social reasons for language change, language planning, pidgin languages, linguistic variation based on geography, social class, and gender, and issues in cross-cultural communication. It also considers the impact these concepts have on classrooms. Students who are interested in how language impacts and in turn is influenced by society should take this course. Sociolinguistic concepts and issues discussed in the course will broaden perspectives on the critical role language plays in various domains of society, like education.	4
EDEL903	Bilingualism and Biliteracy: Theory and Practice	* To provide a lens through which biliteracy and bilingualism can be documented and critically examined * To take up both broad questions and specific issues about becoming biliterate in a variety of classrooms and socio-cultural-linguistic domains * To locate biliteracy within a range of theoretical perspectives and approaches * The course is for MA students in the broad field of language acquisition and the more specific field of bilingualism and biliteracy. It can also benefit students of second language acquisition. * Students who take this course will find it useful for future teaching careers at both the school and college level.	4

Course Code	Course Title	Description	Academic Unit
EDEL906	Language Teaching Methodology	<p>This course aims to examine the rationale and principles behind teacher- and learner-centred methodologies and critically assess their appropriateness for the local as well as international English language teaching contexts. In addition, the course aims to examine the influence of numerous factors (e.g., cognitive, affective, social and technological) that affect the way language teachers plan, deliver and evaluate language learning.</p> <p><b>Aims</b></p> <ol style="list-style-type: none"> <li>1. Familiarize course participants with current thinking and scholarship in ELT and its related disciplines (e.g., SLA, Applied Linguistics), and also insights from cognitive psychology and general education theories and research.</li> <li>2. Develop a critical understanding of approaches and methods in language teaching and explore their potential applications in the classroom</li> <li>3. Demonstrate understanding of the various factors that affect the effectiveness of classroom</li> <li>4. Explore the impact of technology in the design, delivery and assessment of learning</li> </ol>	4
EDHS902	Inquiry into Curriculum and Curriculum Leadership in Social Studies	<p>Many issues and challenges are involved in the implementation of Social Studies, one of the most important subjects for citizenship education. This course prepares you to lead in the development of curriculum and pedagogy for Social Studies. You will be encouraged to explore the multiple meanings of curriculum and the role of curriculum leaders in Social Studies. You will also engage in discourses on the theory and practice of curriculum leadership and examine the academic literature in the field.</p>	4
EDLC901	Current and Emerging Theories and Practices in Leadership and Management	<p>The course aims to enable learners to understand educational reforms and implications for educational leadership; explore current theories of educational leadership; examine critically existing practices and policies in teaching and learning and explore emerging practices of educational leadership and its implication for teaching and learning. This course is open to EdD students. The course provides foundational understanding of educational leadership theories and management that are relevant for their doctoral study.</p>	4
EDLM901	Theory, Research and Practice in Teaching and Learning	<p>This course on advanced educational psychology provides a detailed analysis of modern learning theories and practices as they relate to education. Historically, the field of educational psychology gained from a series of learning theories, including behaviorism, social cognitive theory, information processing, and constructivism. In this course, these theories are examined in depth and explored for their application to a variety of educational settings. The question, how do humans learn (best)? is at the heart of such theories, and participants are invited to construct and reconstruct their personal theories of learning throughout the course. However, modern day educational psychologists face questions that are considerably more varied and diverse than simply, what constitutes learning? Increasingly, they are concerned with a variety of topics, including knowledge building, the role of working memory, the importance of emotions and student well-being, encouraging innovation and critical thinking, incorporating learners with special needs, as well as engaging adult learners. In considering these topics, a common theme continues to be how psychological principles can illuminate processes of learning and This course thus considers how theory, research, and practice inform each other in order to improve the efforts of educators.</p>	4

Course Code	Course Title	Description	Academic Unit
EDLM903	Advances in Early Childhood Education: Issues and Trends	This course will introduce participants to key current and historical issues and trends underpinning the developments of early childhood education (ECE). Participants will examine, discuss and reflect on on-going discourses, debates and controversies surrounding quality care and practices for young children from international as well as local perspectives. In particular, there will be opportunities to explore how ECE in the Singapore context can benefit from developments in the wider field, and yet stay relevant to its contextual demands. Participants will acquire deeper understanding and appreciation of these issues and trends through both instructor-directed and learner-centred investigation and activities. The course adopts a constructivist pedagogy in which learning takes place primarily through participation in critical discourses pertaining to the various topics, and through the process, to develop greater insights into how ECE has taken shape over the years and in different sociocultural contexts. Participants are expected to select readings, lead discussions, develop their own viewpoints, frame arguments, and guide their own and the class learning experiences.	4
EDLM904	Advances in Special Education: Issues and Trends	Disability and special education come with topics that bring with it ambiguities, debates, controversies and emotions. In seeking to navigate through these topics, this introductory course is designed to provide an overview of the issues and trends in the field of special education. The challenge for participants is to sift through competing information and arguments to build one's personal opinions or perhaps even question or change one's opinions about the education of children and adolescents with special needs. The course will provide participants with an understanding of special education in both international and local contexts and highlight varied viewpoints relating to issues such as inclusion, accommodation of students with special needs, and the application of evidence-based practices.	4
EDTM903	Learning Analytics for Science of Learning	The deluge of data and technological advancements has allowed new insights into learning. For instance, eye trackers and emotion detection tools not only enable us to examine learners' attentional patterns, emotions, and engagement, but also support us in studying their collaborative interaction patterns more holistically. This course will discuss how learning analytics (LA) can be applied in the Science of Learning (SoL) and review cutting-edge embodied technologies (e.g., physiological sensors and wearables) and relevant theories (e.g., emotions, cognitive load theory). Furthermore, this course will explore how to use various analysis techniques and visualizations to interpret sample datasets. Students will learn about theoretical constructs in LA and the SoL as well as their connection with measurement, various sources of data, data analysis techniques, and LA applications. They will also learn to think critically about data and its use, such as what data can inform us, and how it can help to enhance learning processes and outcomes.	4
EDVP921	Issues in Music Education	This course introduces a study on the historical, sociological and philosophical foundations of teaching and learning music from Singapore and global perspectives. The course also explores in-depth current curricular thinking and issues in music education.	4

Course Code	Course Title	Description	Academic Unit
NEDD901	Literature Review Methods	This course is designed to help beginning doctoral students participants retrieve, analyse and synthesise the literature for their respective research, thereby establishing the significance of their research proposal. Advanced library skills and referencing system will also be introduced. Other than gaining research literacy skills, students will have a chance to develop their scholarly identities and dispositions as well as build a community of learners in preparation for their research journey. Thus, the outcomes of this course include understanding of the concepts, skills, dispositions, and ethics necessary to conduct a literature review, and, consequently, research. These outcomes will lay the foundation for the literature review chapter for their respective proposals, in addition to completing literature reviews to develop different sections of their dissertations.	4
NEDD902	Quantitative Research Methods	This course will provide you with a sound understanding of quantitative research methods in education. The course will focus on the theoretical, methodological, and practical aspects of research methodologies. The aim is to provide you with the necessary insights on educational research in (i) identifying gaps in current research in a particular area of study, (ii) developing meaningful research questions, and (iii) understanding research designs, and analyses. Discussions on planning and validity of research designs will enable you to evaluate the validity of research that has been conducted in a particular educational area. These experiences will increase your appreciation of the complexities involved in working with data, and hence enable you to develop a meaningful research study. Quantitative methodologies stipulate a systematic empirical investigation of observable phenomena via statistical, mathematical, or computational techniques which will develop into the concept of hypothesis testing.	4
NEDD903	Qualitative Research Methods	This course aims to equip students with skills to: (1) analyze the basic assumptions of research traditions and specify the interrelationships among them; (2) select the appropriate qualitative research approach and method(s) to answer their specific research questions; (3) reflect on issues to consider when selecting participants; (4) consider the rigour and ethics of qualitative research; and (5) consider operational, ethical and logistical details when collecting qualitative data, analyzing the data, and aligning theories, data and practice to construct a coherent and powerful thesis.	4
NEDD904	Academic Reading and Writing for Education	The aim of this course in academic reading and writing for education is to help you to develop your reading and writing of English to meet the discourse demands of doctoral study. Another crucial aim is to encourage you to self-evaluate and reflect on the processes of your learning to assist you in adopting an ethical standpoint as researcher, reader, and writer. As a writer on the course, you will learn how to write coherently, clearly, and precisely in an academic register suited to research in education. You will become aware of how choices you make in grammar and vocabulary are significant not only in terms of accuracy but also in contributing to the logic of argumentation and in positioning your opinions and the research of others in paragraphs and complete texts. As a reader on the course, you will learn how to read to survey large quantities of materials to gather and process information. Through focused reading you will become aware of the genre and linguistic conventions of academic discourse and have the opportunity to reflect on how writers achieve their aims and address their readers. Additionally, you will develop deep reading capacities which will allow you to read critically to judge the credibility and worth of data. You will also learn how to apply digital and media technologies to assist you in researching and presenting evidence and data in appropriate and accessible forms. In sum, the course aims to increase your knowledge and awareness of the academic register of education and offer opportunities for you to develop fluency and flexibility in handling it. Thus, this course provides you with the linguistic foundation for your doctoral studies, useful for your research, your coursework, and your dissertation.	4
