Discover

how innovation is shaping teaching and learning this month, from the launch of the FacTEL professional development series to boosting student engagement and transforming classroom experiences with educational technologies like EdTech@NIE, Genially, and Insta360 Link 2.

Be inspired by fellow educators and share your own stories in [Let's Talk@IN-Learning](#). Let's keep learning, creating, and inspiring together!

FacTEL Commences

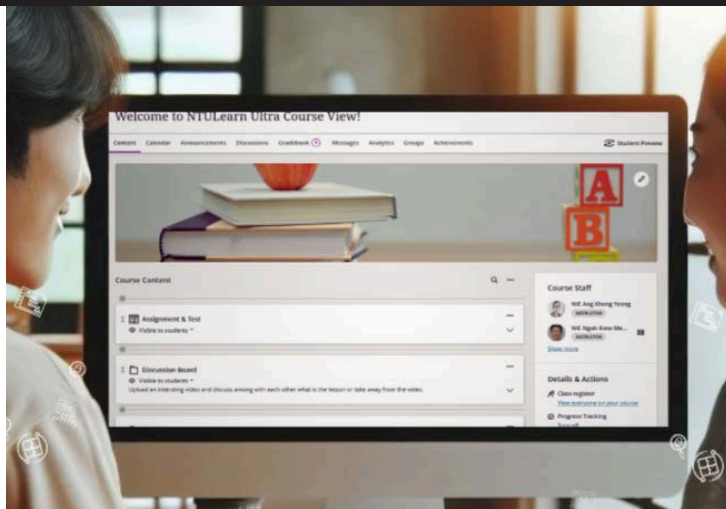

The first run of the FacTEL professional development series commenced in March 2025 and has seen strong participation. As of 17 April 2025, 47 faculty members from ELL, MME, VPA, and NSSE have attended the FacTEL modules. The series has been well-received, with positive engagement and feedback.

Enhancing Teaching & Learning with Blackboard Ultra Course View

NIE is moving to the new Blackboard Ultra Course View (UCV), a future-ready platform built to simplify course management. With AI-powered features and a clean, modern interface, UCV helps you create more intuitive, engaging, and inclusive learning experiences with your students. We will make your transition smooth and stress-free with training and support.

Unveiling the new face of EdTech@NIE

Specially curated by the Centre for Innovation in Learning (IN-Learning) EdTech@NIE is a one-stop resource platform for faculty and educators alike to get inspired. From tool recommendations to up-to-date news about the latest trends in AI in Education, EdTech@NIE aims to help users reach out to a repertoire of EdTech resources as they navigate their journeys in innovative teaching.

Gamify Learning with Genially

Create interactive quizzes and digital escape rooms and in minutes with no coding knowledge. Our NIE faculty Tay Choon Hong and Dr. Tan Kar Chun are already transforming revision into self-directed adventures with Genially to boost student engagements and deepen learning.

How the Insta360 Link 2 WebCam is transforming classrooms at NIE

Want to create polished, engaging teaching videos without fuss? The Insta360 Link 2 is a webcam that follows your movements, auto-frames your whiteboard, and responds to simple gestures. Whether you are recording lectures or running hybrid classes, it is like having a production team in your pocket.
