Small Shift
BIG IMPACT

Sometimes innovation begins not with a big overhaul, but with a simple nudge. This month, IN-Scape celebrates the small but powerful steps our faculty are taking to reshape teaching and learning at NIE. Whether you're experimenting with AI, exploring bite-sized content through TikTok, or trying out new edtech tools, these small shifts make a big difference.

Let us honour the little wins, one nudge at a time.

FACULTY DEVELOPMENT

Faculty Voices from Their FacTEL Journey: Empowered to Innovate

Our faculty from NSSE and ELL shared how FacTEL and AI-EdTech positively transformed their teaching journeys, empowering them to create personalised learning experiences, streamline assessments, and unlock innovative, time-efficient strategies that boost student engagement and success. Through thoughtful AI integration, they feel more confident and inspired to innovate, making teaching both more effective and rewarding.

PEDAGOGICAL INNOVATIONS

Digital Portfolio Meets AI: A Smarter Way to Reflect

The Digital Portfolio is a vehicle for student teachers to aggregate and integrate their learning, helping them to make meaningful connections between the courses they undergo in NIE. With the fresh integration of an AI-powered chatbot, student teachers of the Pedagogical Practices course can now seek immediate feedback on their written reflections. This development represents an important step in our continued refinement of teacher preparation practices, and leveraging technology to enhance teaching and learning.
