

# How to be Autonomy – Supportive?

## 1. Nurture inner motivational resources

- ✿ Find ways to coordinate the instructional activities with students' preference, interests, sense of enjoyment, sense of challenge, competencies, and choice-making
- ✿ Avoid external regulators such as incentives, rewards, directives, deadlines, assignments, and compliance requests

## 2. Rely on informational, non-controlling language

- ✿ Addresses motivational problems of listlessness, poor performance, or inappropriate behaviors
- ✿ Treat students poor performances as problems to be solved
- ✿ Non-informational
  - E.g. "Please improve your comprehension skills."
  - E.g. "Hit the shuttle further."
- ✿ Informational (information-rich, competence-affirming utterances to identify and explain why students are doing well or making progress)
  - E.g. "You can improve your comprehension skills by highlighting the key words and topic sentences to have a better understanding of the text."
  - E.g. "Turn your shoulder more to hit further."
- ✿ Controlling
  - E.g. "Keep quiet!"/ "Stop talking."/ "Pay attention."
  - E.g. "Do your work! If you don't finish in time, you have to stay back after school to do it."
  - E.g. "Why are you not doing your work?"
- ✿ Non-controlling
  - E.g. "Do you have something to share with the class?" (in address to students talking)
  - E.g. "Do you have any problems with your work?" (in address to students not doing their work)

## 3. Communicate value and provide rationale

- ✿ When doing tasks that students do not enjoy or value, explain the importance of the task

## 4. Acknowledge and accept students' expressions of negative affect

- ✿ Show that you understand from their perspective
- ✿ Addresses motivational problems
