

INTERNATIONAL SCHOOL EXPERIENCE AT THE UNIVERSITY OF HONG KONG

I recently had the privilege of participating in a transformative 2-week international exchange programme at a local primary school in Hong Kong. This invaluable experience, organised by NIE, has allowed me to immerse myself in the rich and vibrant tapestry of Hong Kong's education system. Over the course of two weeks, I engaged with eager primary school Hong Kong students and collaborated with fellow educators – sharing teaching methodologies and gaining a profound understanding and valuable perspectives of the Hong Kong educational landscape.

This international opportunity was a testament to the global reach of NIE's commitment to providing enriching and authentic experiences for its aspiring educators. I am grateful for this opportunity to contribute to and learn from the vibrant educational setting in Hong Kong, an experience that has undoubtedly shaped my vision as an aspiring educator and a beginning teacher.
