

# SEMESTER EXCHANGE AT NORWEGIAN UNIVERSITY OF SCIENCE AND TECHNOLOGY, NORWAY

The 5 months in Norway was simply phenomenal. On this exchange, I was able to enjoy not only the great sights and foods but the precious journeys and lives of the Norwegians themselves. I had the privilege of journeying with many locals that I am proud to call newfound friends and even mentors for my journey ahead. I too was fortunate to have the opportunity to relish in the Singaporean experience as we had regular local hotpot sessions with fellow exchange mates, I even had the chance to cook for some of my beloved Norwegian locals which was an experience in itself! I give my sincere thanks to NTNU for providing such lovely memories: from the engaging lessons in Introduction to Christianity to physical hands-on field work with animals in Animal Ecophysiology and Ecotoxicology. They have provided much insight as a student, as a teacher, and as a human as well. I am deeply grateful to NIE for blessing me with this excellent experience, I highly recommend this as a great broadener of one's perspectives.
