GRADUATE PROGRAMMES AUGUST 2026 SEMESTER

Last Update: 08 September 2026

Timetable is subject to changes. Students are required to check the timetable again one week before the commencement of lessons.

^ Please refer to the "Aug 2026 Course Synopses" on the following page after the timetable.

Course Registration Period:
Current Students
06 July 2026 (9am) to 08 Jul 2026 (5pm)

New Students
07 July 2026 (9am) to 08 Jul 2026 (5pm)

Add/Drop Period:
07 Aug 2026 (9am) to 21 Aug 2026 (5pm)

Course Code	Course Title	Description	Academic Unit
MAE900	Research Methodology in Applied Linguistics	This course focuses on research methodology in applied linguistics and covers a range of theoretical, practical, and ethical issues in applied linguistics research, with an emphasis on language teaching and learning. It examines principles for undertaking empirical research, introduces main quantitative and qualitative methods for conducting small-scale research in the language classroom, and provides hands-on experience with research designs, instruments for data collection, quantitative and qualitative methods of data analysis, evaluation of published research, and research report writing.	4
MAE902	Language Acquisition Studies	This course examines theories of language acquisition (first, second, and bilingual) from psycholinguistic and sociolinguistic perspectives. A range of factors that affect the nature and route of language acquisition will be considered (e.g., age, cross-linguistic influence, linguistic environments, cognition, identity, power, etc.). A solid understanding of the nature of language acquisition is expected to provide good grounds for designing language teaching pedagogy.	4
MAE903	Sociolinguistic Perspectives on the Classroom	This course examines language in its social context, including language use in multilingual communities, social reasons for language change, language planning, pidgin languages, linguistic variation based on geography, social class, and gender, and issues in cross-cultural communication. It also considers the impact these concepts have on Singapore classrooms	4
MAE904	Language Teaching Methodology	In this course, we explore the rationale and principles behind the paradigm shift in language teaching methodologies and evaluate their appropriacy for the local teaching context in Singapore. Participants will learn about the relationship between methodology and syllabus design in planning appropriate programmes for teaching the different language skills	4
MAE909	The Culture and Conventions of Academic Writing	In this course, we explore the linguistic and cultural conventions of academic writing, drawing on examples from postgraduate theses / dissertations, research papers, and published journal articles. Participants will learn about different traditions in the field of academic writing research, read and discuss research on the complex issues surrounding academic literacy, examine the socially-situated nature of academic discourse conventions, and be guided to critically analyse genuine academic texts to observe the discourse practices valued by the academic discourse community, for example, in terms of reviewing literature, organising arguments, supporting claims, citing sources, and projecting a credible authorial persona. In essence, the course provides a sound theoretical introduction to the field of academic writing research, offers insights into the kinds of writing that are valued at postgraduate level, and constructs a space in which participants can unpack, problematise, and question academic conventions.	4
MAE912	Literacies in Society	Reading and discussion focus on the diverse nature of literacy across time and space and different communities, the social, cognitive and linguistic aspects of becoming literate, the nature of, and differences between, school and out-of-school literacy, the variable access groups within societies often have to school literacy, and the dramatic shifts in the character of literacy, particularly with the impact of various late twentieth century technologies. In each area, the concepts and findings of the readings will be connected to literacy practices in the multiracial and multilingual Singapore context.	4
MAE919	Second Language Phonology	The course will give students the ability to formulate informed opinions about the rules and features of L2 phonology, how they differ from L1 phonology, and whether or not there are universal patterns and processes regardless of the languages involved. Further they will be able to determine to what extent it is possible to alter ones phonology and whether this is a desirable or advisable path to follow for language learners. These outcomes will be achieved by a process of student analysis of their own speech via close phonetic transcription in IPA assisted by the use of phonetic analysis software, and further by students engaging in a process of attempting to alter their own speech habits in order to adopt a target L1 phonological feature.	4

Course Code	Course Title	Description	Academic Unit
MAE923	Language Assessment in the Digital Age	This course aims to provide students with a well-rounded understanding of language assessment within the context of the digital age. A key component of this understanding includes exploring the role of emerging technologies, such as artificial intelligence (AI). Additionally, the course will focus on developing students skills in designing, developing, and evaluating language assessments that effectively incorporate digital technologies, with an emphasis on ensuring fairness and accuracy in the process. Students will also be empowered to critically evaluate current issues and trends in language assessment as they relate to the digital age. By applying this knowledge, students will be able to make informed decisions about the use of digital technologies in their future careers or studies related to language assessment. Overall, the course provides a comprehensive foundation in understanding and applying digital advancements within the field of language assessment.	4
MAE990	Integrative Project	This capstone course aims to equip participants with the knowledge and skills that they will need to identify a specific language-education or language-related problem or issue, and demonstrate a critical understanding of, for example, causes, consequences, controversies, complexities, etc., of the problem or issue by reviewing relevant scholarly literature and designing a study that will address it.	2
MCP812	Group Dynamics and Counselling	This course examines the psychological processes underlying human interactions in groups. Current theories applicable to group work in counselling are considered. Students will be expected to develop a repertoire of skills and ideas and to develop communication skills essential to group counselling in both face-to-face and on-line environments.	3
MCP817	Vocational Assessment and Career Counselling	This course aims at preparing the counsellor for an expanded role in career guidance. Topics include: social and economic contexts, theories of career development, the role of information, assessment of career development, career guidance programme in schools, models in career counselling and current issues in career counselling.	3
MCP823	Complex Traumatic Stress in Children and Adolescents	This course will introduce students to a range of psychological interventions for youth who have experienced complex traumatic stress and often requires services in the child welfare system. This advanced psychotherapy course is suitable for students who aspire to work with at-risk youth and families and those coping with mental health challenges. The Skills Practice component of the course will help participants clarify and improve therapeutic skills needed for working with children and adolescents.	3
MCP832	Practicum in Counselling Psychology I	Each course provides for practice in counselling. In addition to seminar participation on campus, students are required to undergo a period of supervised field work of 400 hours to obtain hands-on experiences in counselling. The first practicum may be undertaken in the NIE Psychology Clinic and the second will be undertaken in the field.	6
MCP833	Practicum in Counselling Psychology II	Each course provides for practice in counselling. In addition to seminar participation on campus, students are required to undergo a period of supervised field work of 400 hours to obtain hands-on experiences in counselling. The first practicum may be undertaken in the NIE Psychology Clinic and the second will be undertaken in the field.	6
MCP909	Theories of Counselling and Advanced Counselling Skills	This course aims to introduce fundamental theories and techniques of counselling to trainee counselling psychologists. It explores the role of the counselling psychologist, the nature of the counselling relationship, and different approaches to counselling.	4
MCP931	Practicum in Counselling Psychology I @ Workplace	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MCP932	Practicum in Counselling Psychology II	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9

Course Code	Course Title	Description	Academic Unit
MCP933	Practicum in Counselling Psychology III	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP820	Behavioural Interventions for Special Needs	This module aims to follow a scientist-practitioner model to develop skills in constructing and implementing various behavioral interventions within applied settings such as schools, community centers, clinics, and homes. It intends to follow a hands-on approach towards providing students with essential background knowledge and tools to conduct effective evidence-based interventions for the most common reasons for referrals to educational psychologists within applied settings. This module is divided into 3 main areas, a.) The need for evidence-based practice and interventions within applied setting and linking assessment with intervention. b.) Basic behavioral principles, interventions, data collection systems and single case research designs to monitor the progress of various interventions. c.) Behavioral Interventions used in applied settings for children with ADHD, ASD, ODD and Conduct problems.	3
MEP900	Basic Counselling Skills for Educational Psychologists	This course is designed to meet the foundational skills needs of students from the Educational (EP) Psychology track, so that they are able to use basic counselling skills to give negative news sensitively to clients and manage their distress appropriately.	1
MEP913	Psychoeducational Assessment for Educational Psychologists	The course aims to provide trainee Educational Psychologists with psychological testing skills in the administration, scoring and interpretation of selected standardized cognitive, language and literacy tests, and writing of psychological reports.	4
MEP926	Identifying Disabilities and Cognitive-Behavioural Interventions in Educational Psychology	This course provides an introduction to identifying Special Educational Needs (SEN) students with socio-emotional difficulties such as in students with language and/or social difficulties. This course also seeks to equip EP trainees with the knowledge and skills to implement certain strategies used as part of Cognitive Behavioural Intervention for this population of SEN students. Trainees will be provided opportunities to practice the skills in class and to receive feedback.	3
MEP931	Practicum in Educational Psychology I @ Workplace	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP932	Practicum in Educational Psychology II	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MEP933	Practicum in Educational Psychology III	To bridge the theory-practice gap through the provision of supervised field work experiences for students in different environments and with different populations. In doing so, students will be able to clock hours towards registration with the Singapore Register of Psychologists.	9
MAC810	Ethical, Legal and Professional Issues in Counselling	The topics covered include professional roles and function, codes of ethics and standards of practice, legal matters and potential liabilities, safeguarding confidentiality, duty to warn, boundaries in therapeutic relationships, client rights, and value differences with clients in the Singapore context.	3
MAC812	Life-Span Developmental Psychology	This course gives an overview of the development and disorders of child and adolescent. It discusses the main features of physical and psychosocial development of children and adolescents. Topics which will be covered include the role of self-concept and self-esteem, parent-child relationships, asperger, autism, ADHD, anger management and prevention of violence, creativity and emotional intelligence.	3
MAC813	Career Development and Counselling	This course provides an understanding of the theories of career development and career counselling / guidance; acquire knowledge and skills in career guidance, assessment counselling; know the development of career guidance counselling in Singapore schools community; know the trends and issues in workforce development in Singapore and beyond; mobilise / organise resources in and out of the school to facilitate the implementation of the programme; and design research to review / evaluate the programme for improvement.	3

Course Code	Course Title	Description	Academic Unit
MAC814	Theories of Counselling and Psychotherapy	This course aims to help students develop an in-depth understanding of major current affective, cognitive, and behavioural models and skills in using these approaches in counselling. Specific orientations discussed include psychoanalytic therapy, Person-centered therapy, Reality therapy, Gestalt therapy, Rational-emotive-behavioural therapy and Cognitive-behavioural therapy.	3
MAC818	Research Methodology and Statistical Analysis in Counselling	This course covers the research designs and basic statistics. For research designs, topics covered include research problems and hypothesis formulation, the sampling and instrumentation, writing research reports, and evaluating research. For research statistics, students are exposed to the understanding of basic statistics and using statistical software (SPSS) in data analysis. Topics included are preliminary data analysis, descriptive and inferential analysis, parametric and non-parametric tests, univariate and multivariate tests.	3
MAC820	Introduction to Family Counselling	This course gives an introduction to family systems theories and investigates family issues that surface in counselling. Critical examination of systemic change, dysfunction, stages of family development, the dynamics of family interaction, problems associated with individual adjustments, adaptations and other reactions within family is included.	3
MAC821	Mental Health and Community Counselling	This course introduces the students to the field of community mental health counselling. Topics covered include the roles of the community mental health counsellor, professional ethics, managed care, various contexts of practice and organisational structures, outreach, advocacy, mandated clients, crisis intervention services, prevention, consultation, and an understanding of how diversity influences the practice of mental health/community counselling.	3
MAC830	Practicum I	The principal goal of practicum is to provide an opportunity for integration and concrete practice of counselling theories, process and techniques leading to effective individual and group counselling. There will be close supervised counselling practice with clients in approved field sites such as schools or agencies which are consistent with the student's learning needs, career goals and area of interest. Demonstration of appropriate professional quality, social and ethical judgment and being receptive is expected.	3
MAC831	Practicum II	The principal goal of practicum is to provide an opportunity for integration and concrete practice of counselling theories, process and techniques leading to effective individual and group counselling. There will be close supervised counselling practice with clients in approved field sites such as schools or agencies which are consistent with the student's learning needs, career goals and area of interest. Demonstration of appropriate professional quality, social and ethical judgment and being receptive is expected.	3
MID905	Foundation of Learning and Instruction	This course explores issues related to: How do people learn? How do I teach to help learners acquire knowledge and skills? Various learning theories will be discussed to show how learning takes place. We will also discuss various foundations of instruction that could help tutors and trainers design solutions to instructional problems.	4
MID915	Training Needs Assessment and Solutions	TNA is a basic process in instructional design that determines the needs of organisations prior to the development of training. It is one of the fundamental instructional design skills that students need to master.	4
MID922	e-Learning Tools for Training	In the new information age, many traditional classroom courses or training programmes need to be re-developed and conducted online to meet the needs of adult learners who often have to balance their work demands with their work demands with their social lives. In this course, the participants will learn how to use web-based tools, e-learning authoring tools and produce videos so that they can easily develop and conduct e-learning sessions for teaching and training in practice.	4
MID944	Methods for Data Collection and Analysis for Instructional Design Projects	This course equips students with the methodological skills to conduct professional practice inquiry in the training, workplace learning and adult learning contexts. It also helps students to start preliminary work for their professional practice inquiry project.	2

Course Code	Course Title	Description	Academic Unit
MID945	Capstone Project for Instructional Design	This is a Core Course for MAIDT students doing the All-coursework option. Instructional designers are involved in training development activities related to one or more areas in the ADDIE (Analyze, Design, Development, Implementation, and Evaluation) process. In this capstone project, students select an area of focus from following options to complete a workplace project. The options are to: 1) Conduct a Needs Analysis. The project deliverable will be a Needs Analysis report (6,000 words maximum, excluding references and appendices) summarizing the data collected, its analysis as well as recommendations for training interventions; 2) Develop an Instructional Package: The project deliverable will be an implementable instructional package (comprises lesson plan, paper-based and/or online lesson materials, and instructor guide) as well as a Design Document (3,000 words maximum, excluding references and appendices) explaining the rationalization of the package. 3) Conduct a Programme Evaluation: The project deliverable will be an Evaluation Report (6,000 words maximum, excluding reference and appendices) summarizing the evaluation instruments used, data collection methods, data analysis as well as the recommendations for programme improvement.	4
MTCL901	Language Code: Theory and Practice	As Chinese characters are ideographic in nature, the phonetic functions are weak. Furthermore, the structure of Chinese characters are complex and difficult to recognize, to read as well as to write. Therefore, phonetic system, Hanyu Pinyin was developed to aid in learning Chinese. Chinese characters and Chinese phonics operates with two different set of rules. Chinese characters represent single syllables while Hanyu Pinyin operates with a set of standard basic rules in relation to different forms of Chinese words. As instructors of TCIL, it is important to understand the characteristics of these two codes in order to effectively teach Chinese as an international language.	4
MTCL902	Vocabulary and Grammar: Theory and Practice	The fundamental purpose of learning any language is for communication purpose. Be it in spoken or written communication, vocabulary and grammar are two of the most important components in any language learning, as they play a vital role in building up language proficiency. In teaching Chinese as an international language, instructors must understand the grammatical rules and its effect on vocabulary on the target language to bring about effective teaching. Hence, this course will lay a good foundation in Chinese vocabulary and grammar basics, so as to effectively teach Chinese as an international language.	4
MTCL903	Chinese-English Contrastive Analysis & Its Application	The use of translation in learning a foreign language is widely used as a teaching and learning strategy to help students remember, comprehend and acquire the use of the target language. The influence of the learners first language, however, will have substantial impact in the language acquisition process. Hence understanding the major difference between Chinese-English through contrastive analysis in theories and practice of translation and its application in TCIL is necessary to equip TCIL instructor with the fundamental understanding to implement the bilingual model in TCIL.	4
MTCL904	Teaching of Listening & Speaking Skills in TCIL	Listening and speaking are two important skills required in any language learning. They are complex skills that need to be developed consciously. In any interaction, comprehending the language used is necessary for effective communication. Hence, as instructors for TCIL, it is important to acquire the various communicative language teaching pedagogical approaches in order to teach effective communication skills. Besides acquiring pedagogical approaches in teaching non-native learners, keeping abreast with recent developments and research on the teaching of Chinese language listening and speaking content and skills are also essential to build the competencies to effectively TCIL to the 21st century learners.	4

Course Code	Course Title	Description	Academic Unit
MTCL905	Teaching of Reading And Writing Skills In TCIL	Reading and writing are two important literacy skills one requires to function effectively in everyday life. These two skills are interconnected and can be developed together. With global economies and emerging new technologies, new literacies are already becoming part of the educational landscape. Hence, as instructors for TCIL, it is important to understand the various teaching pedagogical approaches to engage learners of this new age. Besides acquiring pedagogical approaches in teaching non-native learners, keeping abreast with recent developments and research on the teaching of Chinese language reading and writing content and skills are also essential to build the competencies to effectively TCIL to the 21st century learners.	4
MTCL906	Application of Information Technology in TCIL	In today's 21st century education, the use of ICT for teaching and learning had infiltrated schools at a rapid pace. To ensure that today's digital learners are future-ready for the workforce of tomorrow, educators must understand and embrace the need to employ the use of ICT to create a 21st century learning environment. A 21st century educator must be competent to use technology with ease in teaching and learning, be it in the classroom or out of classroom where learning takes place anytime, anywhere. Hence, as TCIL instructors, it is important to understand the application of technological tools with content and pedagogical approaches, and appreciate how ICT can create an effective learning environment for TCIL.	4
MTCL907	Language Testing & Assessment in TCIL	Testing and assessment is an integral part of the learning process, and must be closely aligned with curricular objectives, content and pedagogy. It serves as the central function of getting the best possible evidence on what the students have learned. Teachers and students can then use this information to decide what to do next in the teaching and learning process. It is important that TCIL instructors be equipped with the necessary assessment competencies, so that quality teaching and learning can be achieved in all TCIL classrooms, bearing in mind the varied language backgrounds and proficiency levels of TCIL learners.	4
MTCL908	Analysis & Development of Instructional Materials for TCIL	Over the last three decades, there are many TCIL curriculums and instructional materials developed for non-native learners globally. However, TCIL instructors find it challenging to identify proper instructional materials for learners of differing abilities. This course aims to enhance the knowledge and skills of TCIL instructors in analysing the instructional materials developed by different editors and publishers. In addition, through better understanding of principles of the curriculum design and instructional materials development for TCIL, instructors will be well equipped in developing instructional materials for different learners.	4
MTCL909	Global Chinese and Contemporary China	The rapid rise of China as a global economy has driven an increase to the educational and pragmatic value of learning Chinese language globally. Understanding the history and development of China's rise and economic globalization is essential to TCIL instructors as they tread beyond the grounds of China in TCIL to non-native learners.	4
MTCL910	Critical Inquiry in TCIL	Educational research is an important element to educators as it provides fresh perspectives and new ideas to enhance and enliven teaching and learning outcomes. Not only can educational research findings contribute to knowledge development, practical improvement, and policy information, educators can also use these research findings to improve their competences in the teaching and learning process. This course equips participants with the ability to incorporate what they have learned from the programme coursework in their respective specialisation into a proposal report that addresses a specific education issue.	4
MTCL911	Professional English for TCIL Instructors	All teachers need to possess skills that enable them to communicate effectively with a range of stakeholders in the educational settings. Being able to apply these skills in a second language is all the more critical for Chinese language teachers who will need to fulfill school related tasks and communicate with other members of staff, students and their parents in the English medium. This course helps to prepare participants who will be working in international settings as they move through their careers.	4

Course Code	Course Title	Description	Academic Unit
MTCL912	Early Childhood Education in TCIL: Theory and Practice	Early childhood education is crucial as it has direct impact on the development of learning skills, social and emotional abilities of a child. It is during the early childhood years that we should accentuate the development of language, speech and literacy, as it will significantly enhance the child's learning in the later years. Educators should leverage on the varied learning styles and characteristics of early childhood learners, from infancy to the age of eight, apply corresponding learning theories into practice, to bring about effective teaching and learning of Chinese as an international language.	4
MTCL913	Chinese Language Education for International Schools	According to the study by International School Consultancy Research (2017), there is a rapid surge in the growth of international schools globally. With a growth in expatriate families and an increase in enrolment within the schools host country, the increasing trend is expected to continue in the next ten years. This growing demand corresponds to the need to develop professionally-trained Chinese language educators for International schools. Language offerings in international schools are unique and vary over different school programmes. However, each aims to provide students with an edge in this competitive and ever-changing world. Hence, this course will broaden participants' knowledge of teaching Chinese language in international school settings and provides constructive career development opportunities to participants.	4
MAEL902	Critical Inquiry	This course is an application of participants' knowledge and skills in educational research methods. Participants taking this course are required to identify an existing problem area in their organisation which is critically affecting the effectiveness of the organisational operation they wish to investigate and write a mini research proposal on the issue identified. The selection of a practical issue should be related to a theoretical area of management, and to the participants' interest and intention to improve the situation. Participants should be able to demonstrate 1) research skills that they have learned from the core course on research methodologies; 2) insightfulness of practical issues in organisational lives from leadership/management perspectives; 3) pertinence in their selection of theories from the literature review to address the issues; and 4) capability to generate approaches/solutions to deal with the issues.	2
MAEL911	Interdisciplinary Thinking for Educational Leaders	This course provides participants with an overview of the current state of thought surrounding interdisciplinarity. There is growing realisation that many of the problems societies encounter today do not show up pre-packaged as a specific disciplinary problem. In schools, this has led to an interest in multi-, inter-, or even trans-disciplinary approaches to teaching and learning. This course will introduce the education leader to the pertinent issues surrounding disciplinarity and associated combinations through an investigation of knowledge forms in Science Technology Studies (STS), and Design, as exemplars. Many of the contemporary issues we encounter today require expertise in diverse disciplines in order to understand and resolve; most single disciplinary approaches will be inadequate. Through an exploration of several topics pertinent to schooling, participants will appreciate the complexities of disciplinarity, power relations, epistemology, and the wisdom dimension in managing these complexities. Disciplinary issues, as with leadership, is not to be governed by an excessively rule-based form of thinking. Rather, it must be approached with discernment and wisdom, and this course will benefit leaders who seek it.	4
MAEL920	Key Issues in Education Policies and Reforms	This course introduces educators in various fields of work to several key issues in education policies and reforms. These issues include the financing and control of education, language-in-education policies and curriculum contestation. The course adopts an international perspective in order that educators will understand how these key issues are common to education systems around the world. The political, cultural and social contexts of education may differ, but nevertheless these issues confront schools, teachers and students. The course will examine how the education policies and reform efforts are intricately linked to the wider contexts within which education systems are situated. Examples and readings used will cover a variety of national settings. Educators will be able better to understand the complexity involved in policy decision making and implementation.	4

Course Code	Course Title	Description	Academic Unit
MAEL930	Strategic Leadership and Educational Transformation	The course is designed to provide participants with a deep understanding of the critical role that leadership plays in driving transformative change and innovation within educational institutions. It explores the role of strategic leadership in shaping educational transformation, addressing contemporary challenges, and driving institutional growth (including student learning development and growth) in response to evolving societal, environmental, economic, technological, and policy demands. The course will cover key aspects of educational leadership such as leadership theories, education reforms, strategic management frameworks and planning, and change management.	4
MAEL940	Theory and Practice of Teachers' Professional Learning	Considering the demands for continual improvements in the school curriculum to achieve diverse, holistic and equitable learning outcomes, the importance of teacher professional development is now in a greater position to make impactful transformations in teaching. This is consistent with the increasing importance placed on learning and lifelong learning especially in view of the knowledge and digital economy. Current literature on teacher professional development, or professional learning, suggests the need to go beyond the usual models of professional development, which regard learning as special events that are restricted to three or four days during the school year, graduate courses and qualifications, and accumulation of time-based activities even though their importance remains to be relevant in certain contexts and situations. New conceptions of teacher professional development / learning, along with their theoretical and philosophical justifications, are now being considered. These include notions of lifelong learning, job-embedded learning, inquiry-based learning, reflective-based learning, community-based learning, and with the recent pandemic crisis, learning via digital environments (e.g., more extensive usage of genAI). Concomitantly, certain models of teacher professional development / learning have been proposed. These include reflective practice, professional learning communities, communities of practice, lesson study, and action research among others. This course will provide the learning space for you to consider, contextualise and critique the theory and practice of teacher professional development / learning. You will also become familiar with the current developments pertaining to teacher professional development, and appreciate the relationship between professional development / learning, leadership and school improvement. This course is suitable for professionals actively leading and managing teams, organizations and institutions on the professional development / learning of their staff within the education or education-related contexts. This course is also suitable for emerging scholars who are keen on furthering the research work in professional development / learning in the education or education-related contexts.	4
MEM909	Contemporary Issues in Strategic Educational Management	This course reviews the evolution of strategic management. The course will also be explored through the ten schools of strategic management. Planning and traditional strategic management assumes that detail plans and structure determines strategy, which leads to performance consequences. Issues with traditional strategic management will be explored through the changing educational landscape in Singapore. As the educational landscape in Singapore continues to change rapidly, a new type of strategic school leader is needed. The new strategic leader is one who can cope proactively with a dynamic, complex, increasingly competitive and sometimes uncertain context. Because defining success for schools will also change with the changing educational landscape, the strategic leader must review assumptions that lead to school practices and challenge these assumptions in view of the changing educational landscape. This view of educational success will require relevant strategies to develop staff, incorporate relevant learning programmes and structures and promote learning opportunities for students that will future-ready them in the changing landscape. The strategic choices for schools are to pursue goals beyond the school and include global, local and individual goals. Hence, strategy must be multi-dimensional and future oriented.	4
MEM913	Interdisciplinary Thinking for Educational Leaders	The course aims to introduce to participants the key concepts of interdisciplinary thinking for them to be innovative and effective educational leaders in the 21st century. The focus is on how knowledge and methods in two or more disciplines can be integrated to produce a cognitive advancement such as explaining a phenomenon, solving a problem and creating a product.	4

Course Code	Course Title	Description	Academic Unit
MEM932	Critical Inquiry	This course is a capstone course for students who are progressing into the last stage of their academic study in the MAEM program. Students taking this course are required to identify an existing problem area in their organization which is critically affecting the effectiveness of the organizational operation, hence they wish to investigate, and write a mini research proposal. The selection of a practical issue should be related to a theoretical area of management, and to the candidates interest and intention to improve the situation. Students should be able to demonstrate 1) research skills that they have learned from the 2 core courses of research methodologies; 2) insightfulness of practical issues in organizational lives from leadership/management perspectives; 3) pertinence in their selection of theories from the literature review to address the issues; and 4) capability to generate approaches/solutions to deal with the issues.	2
MAS901	Issues and Research in Humanities Education	This course provides an introduction to issues and research in humanities education using the core themes of the programme - in globalization, citizenship, sustainability and heritage. You will be introduced to key issues in humanities education through an engagement with the academic literature. As the core module in a HD programme, you will also learn about research epistemologies and methodologies relevant to humanities education and learn how to write a research proposal relevant to the area of study.	4
MAS912	Heritage, History and Culture	This course aims to intellectually equip you with the methods and practices that would enable you to make your own assessments about various aspects of (in) tangible heritage. This course intends to engage students in making practical assessments of the tangible built heritage and the intangible heritage of cultural practices and traditions. In the course, students examine the heritage value of historical sites and landmarks as well as cultural traditions. Students do a major case study of a place or a cultural practice that they consider to be of heritage value. The significance and meaning of what constitute heritage is covered. Students consider why some historical sites and cultural traditions and not others are regarded as essential for school field trips and tourism. The question of how the public perceives the past as it is presented in museums is also analysed.	4
MAS937	Ancient Civilizations of the East	The course will provide a survey of the ancient civilizations of the East, namely China, India, and Southeast Asia. Through a close reading and examination of (translated) primary sources, you will be inducted in a critical discourse of not only issues (polity, society, culture and economy) in classical period societies. An examination of exhibits/artefacts from the museum will also allow you to make specific linkages to issues in heritage and (ancient) globalization.	4
MAS945	Travel and Tourism in Asia and Beyond	Tourism is arguably the largest and most important industry in Asia. New and emerging trends in the region such as increasing mobility of ordinary people, rise in ageing population, rapid urbanisation, and growing emphasis on health and wellness coupled with the rapidly evolving nature of travel call for a serious examination of the subject matter. Yet, it is important to recognise that Asian Tourism does not exist in a vacuum; it is part and parcel of a global tourism system and is in a symbiotic relationship with the rest of the globalised world. In this course, you will examine major trends in travel and tourism, focusing specifically on Southeast and East Asia, but also drawing on case studies worldwide. Further, you will learn about the political geographies of tourism spaces and landscapes, and the changing relationships between state, civil society, and market as well as their influence on power relations in tourism.	4
MTD900	Professional Practice Inquiry Skills	This course equips students with the methodological skills to conduct professional practice inquiry in the training, workplace learning and adult learning contexts. It also helps students to start preliminary work for their professional practice inquiry project. ● Design survey instruments, interview protocols, and observation protocols for an instructional design project. ● Analyze quantitative and qualitative data associated with common data collection methods required in the field of instructional design for an instructional design project. ● Draft an IRB application for an instructional design project.	2
MTD901	Professional Practice Inquiry Project	This course aims to provide participants with a capstone experience to apply the theories and concepts learnt in the programme towards a workplace project. Participants will choose one option from the following: Needs Analysis Report, Instructional Package and Programme Evaluation and execute the project with a specific client. For each project, participants need to articulate the performance problems, collect data and articulate solutions using a data-driven and data-supported perspective. Throughout the process, participants work with supervisors who will serve as mentors for the project	4

Course Code	Course Title	Description	Academic Unit
MTD903	Instructional Design Models and Practices	This course provides participants with an understanding of the process of systematic instructional design and how it can be executed in practice. Participants will explore the pros and cons of different instructional design models. Using an experiential learning approach, participants will execute instructional design projects to analyze, design, develop, implement, and evaluate training they have designed. Students will also examine the instructional design models versus their own workplace practices through online discussions.	4
MTD907	Training Needs Assessment and Solutions	Training needs analysis (TNA) is a basic process in instructional design that determines the needs of organizations prior to the development of training. It is one of the fundamental instructional design skills that students need to master. Given a performance problem, students should be able to conceptualize a training needs assessment by appropriately applying goal analysis, performance analysis, learner analysis, needs and wants analysis, task analysis, contextual analysis, and feasibility analysis.	4
MTD909	E-learning tools for Training	In the new information age, many traditional classroom courses or training programs need to be re-developed and conducted online to meet the needs of adult learners who often have to balance their work demands with their social lives. In this course, the participants will learn how to use web-based tools, e-learning authoring tools and produce videos so that they can easily develop and conduct e-learning sessions for teaching and training in practice. Through readings, online learning, discussions, and hands-on activities, participants will be able to: * Compare the pros and cons of various web-based tools for training * Compare the pros and cons of various e-learning authoring tools; * Design and develop e-learning lessons by using appropriate tools. * Identify key features of a learning management system and to use a web-based LMS * Apply techniques in digital video production from pre-production, production to post-production to produce an interview video and a training video	4
MTD913	Teaching and Learning in Higher Education	The Teaching and Learning in Higher Education (TLHE) course aims to provide a structured environment for early career faculty, within which they can develop their practical skills and understanding of teaching in higher education. This course begins by exploring learning theories, course design, evidence-based teaching approaches, assessment, and communication with students within the context of their own teaching. Then, learners are provided with opportunities to sharpen their understanding by putting theory into practice. Through this course, they will have opportunities to develop their confidence in the teaching practice through reflection and participation in a community of practice, and as a result, develop a critical mindset that will continue to challenge the way they teach.	4
MEA901	Research and Issues in Art Education	This course examines the history of the discipline and explores various methodologies, critical theory, and resource material for art educational research. This involves techniques of scholarly and critical writing and evaluation of bibliographic sources. The intention is to assist candidates locate their own approaches to art education within the context of ideas and to understand the orientation and significance of contemporary art education theory and practice.	4
MEA903	Arts Education and Technology	In today's connected world, teaching and learning in the Arts classroom has changed. Through both theoretical, practical and research informed work, participants will consider the different ways technology has shaped the classroom practices in the arts today. Participants will also learn to integrate theories, technologies, learning designs and assessment modes to achieve the intended outcomes for students. This course would appeal to graduate students interested in the arts, education and technology who want to further their knowledge and skills in these areas whilst potentially widening their future career opportunities.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2

Course Code	Course Title	Description	Academic Unit
MCL902	Topics on Chinese Language and Its Teaching	Global developments in the teaching of Chinese require educators working in this area to further their understanding on the latest trends in of the teaching of Chinese as a second language. In addition, Chinese teachers should possess the ability to apply the latest methodologies and theories in the innovation of their pedagogy, on top of having a strong foundation in their knowledge of the Chinese language and its linguistics. This course focuses on the theories and methodologies in the teaching of Chinese as second language. The syllabus includes the teaching of Chinese phonics, characters, lexicon, grammar, rhetoric and other related knowledge. The course consists primarily of project-based learning. Depending on the needs of the class, the course instructor has the flexibility and discretion to plan and customize the teaching materials in order to underscore important learning points and to reinforce difficult concepts.	4
MCL907	Chinese Language Curriculum Design and Instructional Materials Development	Language curriculum design and the development of instructional materials should cater to the differing learning needs of individuals in different regions. The Chinese language curriculum in Singapore uses a uniform set of syllabus and instructional materials for all students. Hence, during the teaching process, many teachers find that they need to adapt these to suit the varying abilities of their students.	4
MCL910	Chinese Language Testing and Assessment	Testing and assessment forms a critical component of language learning and Chinese language curriculum. It is not only closely related to the teachers pedagogy and students learning strategy, but also determines and impacts learning outcomes for both short and long terms.	4
MCL911	Application of Information and Communication Technologies in Teaching and Learning of Chinese Language	Immersing Information and Communication Technologies (ICT) into Chinese Language classroom is not just about employing digital learning materials or references to aid traditional teaching. More in-depth professional development is required to improve teachers design capacity in engendering different forms of teaching enabled or enhanced by ICT, especially communicative approaches, socio-constructivist learning, and extending language learning beyond the classroom. Moreover, in the context of globalisation in the 21st century, the usage of languages in our daily lives and work environments differs from the past centuries. It is crucial to nurture the students new literacies in utilising Chinese Language for effective communication in the cyberspace, particularly in the new media environments. We need to have a closer link to the 21st century teaching and learning with ICT, providing the natural context for the development of the new literacies.	4
MCT901	Curriculum: Theories and Issues	The field of curriculum is characterized by a vigorous debate and a plethora of compelling arguments. This introductory course invites participants to 4 examine major issues and debates in the field of curriculum studies, and to bring these ideas to bear on curriculum developments in Singapore. The course is structured around the following fundamental questions: How do we understand curriculum and the work it does? What knowledge is of most worth and what should schools teach? How should this be taught and for what reasons? How does the curriculum reflect a societys understandings of its past as well as visions and aspirations? Participants will be introduced to historical development, socio-economic assumptions, challenges of globalization and the implications of these and other factors on curricular reforms. As participants consider various approaches to exploring these questions, these insights will also guide their study of key curriculum issues in Singapore. The latter include the purposes of education, selection and organization of knowledge, access to knowledge, and methods of delivery in an increasingly global context. These analyses will be done in relation to both theory and practice, and with references to implementation issues in schools and classrooms.	4

Course Code	Course Title	Description	Academic Unit
MCT902	Crafting the Curriculum	The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. This being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needsThis course is an introduction to curriculum development. The underlying framework for the course is that curriculum building is a process that requires ongoing study and reflection about curriculum and the practice of teaching. Central and perennial curriculum questions explored are: What knowledge is of most value and worth? How is the learner and learning viewed? What is the role of teachers in creating and enacting curriculum? The process of analysis will reveal that curricula are by necessity always incomplete and imperfect-everything that is included (topic, activity, question, component, material, assessment, etc.) means that something else has been excluded. Th is being the case, students will suggest refinements to the curriculum they have analysed, based on their understanding of the needs of learners, the socio-political milieu, and the moral and ethical dimensions of schooling.	4
MCT903	Assessment in Education and Learning: Theories, Tensions and Issues	Understand the central and pivotal role of assessment practices in constructing and enacting educational outcomes and experiences. Critically examine how assessment design, judgments and feedback practices construct the process and outcomes of learning. Develop an awareness of assessment as the primary mechanism for determining merit, and an important discourse for addressing social justice issues.	4
MCT904	Understanding Teachers and Teaching: Theory and Practice	This course explores two intertwining themes: (1) Teacher as the curriculum maker, which explores from the interpretive perspective on how teachers acquire the knowledge, skills, and values in forming their identity in situated teaching practices and curriculum making. How do we understand the composition of teachers knowledge, practice, and skills in making curriculum alive? What counts as teacher quality in an era of accountability? How do teachers provide and practice leadership in curriculum making? How do teachers learn at different points in the teachers professional continuum and in different contexts? (2) Teaching as a practice, one that has been historically understood by scholars, practitioners, and policy makers from a range of theoretical perspectives. What does it mean to conceptualize teaching as a practice situated in relation to curriculum, assessment and learning? What are the many ways people have thought about teaching as a practice, and what are the consequences of those perspectives for how we understand teaching? Who can create, evaluate, and critique knowledge about teaching? The course will introduce some major frameworks that have been used to guide research, policy recommendations, and the work of teachers and teaching. We consider the issues of teaching and teachers in an international context, drawing on research from Singapore and other countries. Some of our texts and video materials we will use will give us repeated opportunities to consider education in China, France, Japan, and the U.S. While they dont constitute a central focus of the course, they will give us some chance for shared discussion that draws on multiple and sometimes conflicting descriptions and interpretations of teaching and teacher in a particular setting. Thus, we further pursue the context-related questions when we make the familiar strange in such an international perspective: In what ways is teaching an embedded practice that is shaped by the many contexts in which it is situated? How is learning to teach a process of entering a particular culture? What does it mean to work as a teacher in response to the discourses prevalent in globalization, and the local culture of the students and the community? As participants consider various perspectives to exploring these questions, they will be guided to reflect upon their own teaching practices and professional identity, with references to educational reforms in schools and classrooms.	4
MCT905	Theories and Perspectives on Learning	This is a reflection-intensive, peer-learning course that offers opportunities for students to interpret and discuss some of the established theories and perspectives on how people learn. It will cover ideas from behaviorism, cognitivism, constructivism, and social-constructivism through key topics such as meaning-making, verbal understanding, inquiry learning, representations of knowledge, the process of knowing, situated cognition, and learning in community.	4

Course Code	Course Title	Description	Academic Unit
MCT913	Differentiating Curriculum and Teaching for Diverse Learners	Contemporary deliberations about the school curriculum have tended to privilege other stakeholders and marginalize students. Unless teachers are able to take seriously what students already know and believe, any innovation in curriculum or pedagogy becomes futile. All students deserve rich learning experiences. This course is designed to encourage teachers and school leaders to examine their assumptions about curriculum, teaching and learning, and to develop a critical understanding of different student learning needs in the regular classroom. Participants will gain an understanding of the reasons and assumptions underlying differentiation. Through the readings and discussion, participants will develop an appreciation of the diverse characteristics of students who learn at different pace as well as study a variety of curriculum options such as those of content and implementation of differentiated units and lessons that optimize learning for students. This course will examine ways that classrooms can effectively differentiate curriculum and teaching to address the complex challenges of meeting the diverse learning needs of students. These will include notions of culturally responsive pedagogy, and the use of technology. Participants will learn to use research-based tools to uncover students experiences and challenges with the curriculum and use curriculum design models in planning appropriate and defensible differentiated curriculum units	4
MCT915	Considerations for the Interdisciplinary Curriculum	This course provides participants with an overview of the current state of thought surrounding interdisciplinarity. There is growing realisation that many of the problems societies encounter today do not show up pre-packaged as a specific disciplinary problem. In schools, this has led to an interest in multi-, inter-, or even trans- disciplinary approaches to teaching and learning. This course will introduce educators to the pertinent issues surrounding disciplinarity and associated combinations through an investigation of knowledge forms in Science Technology Studies (STS), and Design, as exemplars. Many of the contemporary issues we encounter today require expertise in diverse disciplines to order to understand and resolve; most single disciplinary approaches will be inadequate. Through an exploration of several topics pertinent to schooling, participants will appreciate the complexities of disciplinaritypower relations, epistemology, and the wisdom dimension in managing these complexities. Disciplinary issues, as with leadership, is not to be governed by an excessively rule-based form of thinking. Rather, it must be approached with discernment and wisdom, and this course will benefit educators who seek it.	4
MCT921	Theory and Practice of Authentic Assessment	This course aims to provide participants with a sound grasp of the theoretical underpinnings of authentic assessments as well as practical skills needed for designing authentic assessments. More specifically, it aims to provide participants with 1) conceptual clarity on authenticity 2) principles for designing quality authentic assessments; 3) a critical perspective of the role of authentic assessment within Singapore's educational system. The course will be conducted through discussions, group presentations, online forums, and hands-on activities. Participants are expected to critically appraise literature on authentic assessments and to develop an authentic assessment that will enhance the learning of their students.	4

Course Code	Course Title	Description	Academic Unit
MCT931	The Power of Narrative: Inquiry into Curriculum, Teaching, and Professional Learning in the Age of AI	This elective course purposefully reworks narrative inquiry as a mode of engaging with lived experience—to invite you, as an educator or other education professional, to explore your professional life through narratives as a form of inquiry. You will examine how identity, emotion, and context shape curriculum, teaching, and learning, and will make visible how meaning is constructed over time. Course readings are engaged as epistemic tools to support systematic inquiry, enabling you to interpret and critically examine your experiences. Pedagogically, the course is structured around cycles of telling, retelling, and re-authoring, supported by dialogic listenership, where you learn to engage with one another's narratives through attentive listening and probing questions. You will also explore multimodal forms of narrative representation, including performative and visual approaches, as ways of expressing and examining meaning. AI is carefully positioned in this course to play important, distinctive roles in each core component: as a co-designer of epistemic tools and tasks, a reflective partner to extend your questioning and perspective-taking; a co-developer of multimodal narrative group project and an organizer of narrative working archive. AI also promotes analytical and critical thinking across these roles through anonymized or re-represented narratives to ensure your confidentiality and professional integrity, while supporting deeper inquiry rather than replacing your thinking. By the end of the course, you will develop deeper insight into your career pathways, strengthen your capacity for critical and ethical inquiry in your professional practice, and construct forward-looking narratives of who you are becoming as an educator. These capabilities will support your ongoing professional development, including advancing your practice, undertaking leadership roles, and engaging in further study or research, particularly as you navigate uncertainties in a changing educational landscape.	4
MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MDP901	Social and Emotional Development and Assessment	This course is one of the two core (required specialization) modules in the Master of Education (Developmental Psychology) programme. The course contains major and classic social and emotional development theories that are fundamental to the participants before they take on other more specialized courses in the programme. It also introduces how to assess childrens social and emotional development.	4
MDP902	Children Cognitive Development and Assessment	Childrens cognitive development is the emergence of the ability to process information, think, and understand. Understanding childrens cognitive development is essential for curriculum development, effective teaching, and good policy making.	4
MDP903	Counselling Children and Adolescents	Teachers and other helping professionals who might not have the knowledge about basic counselling concepts and skills are often at a loss when faced with children or adolescents who need psycho-social and emotional support. This course provides one with information and skills needed to do basic counselling in settings such as schools and other educational centers.	4
MDP904	Motivation, Volition and Learning-in-Action	This course is designed to empower teachers, coaches, supervisors or parents to motivate their charges and to develop their volition to love, to will, to think and to make personal improvements so that they become happy and well-adjusted members of the community. The course examines biological-psychological research and theories related to enhancing motivation and volition in young and adult learners. It helps participants to understand why some renowned persons drive themselves to success while others seem to remain in mediocrity. Participants will engage in research practices and reflections as they relate their experiences to theories and hypotheses in daily practices based on the framework of Knowledge-Volition-Action.	4

Course Code	Course Title	Description	Academic Unit
MDP907	How to Nurture Creative and Happy Learners	It has been said that we live in the VUCA world Volatile, Uncertain, Complex, and Ambiguous. Creative individuals will cope well in the VUCA world, due to their capacity to think of original solutions to complex and challenging problems. At the same time, via incremental improvement or radical transformation of the VUCA world they live in, creative individuals can live happy, enriched and meaningful lives in society. This module infuses its participants with relevant KSAOs (Knowledge, Skills, Abilities and Others) to nurture creative and happy learners in the Singapore context. It achieves this goal by immersing participants in the theoretical and empirical research on creativity and happiness. By mastering this psychological domain of knowledge, participants will become skillful facilitators of creative and happy learners in the classroom, and thereby prepare their students for living and thriving in the VUCA world.	4
MDP909	Assessment and Development of 21st Century Competencies	The 21st century is often described as a VUCA world one that is volatile, uncertain, complex, and ambiguous. With new demands coming from the 21st workplace, it is thus imperative for educators in various educational institutions to develop students capacities to match the needs of the students future workplace. This thus indicates an imperative need to change the way educators craft their lessons and learning tasks so as to provide students with ample opportunities to gain authentic learning experiences and enable the transfer of relevant knowledge and skills from their classrooms to solve real world problems.	4
MDP912	Gestures in learning and development: theory, research, practice	In recent decades, there has been a growing interest in the role of hand gestures (e.g., pointing, creating a shape with the hands) in learning and development. This course examines the research on hand gestures across a variety of educational contexts for children and adolescents, looking at when a teachers gestures can affect learning and what students gestures are telling us. This course introduces methods of classifying gestures and provides a broad overview of how gestures can help learning. This course will help you to make sense of students gestures from an intentional, theory-based perspective and provide you with knowledge on evidence-based practices. The course is for all students who are interested in non-verbal communication, body language and learning.	4
MEC901	Child Development (0-8 years)	The MEC901 Course which is the first specialisation course in the MEd (EC) Program, provides the foundation for all the other specialisation courses. This course will help participants conceptualize childrens development across infancy, pre-school and primary school years (birth to 8 years) through the critical review of/reflection on various developmental theories, models, approaches and scholarly works.	4
MEC902	Issues and Trends in Early Childhood Education	This course aims is to empower participants to explore and reflect critically on key current and historical issues and trends underpinning the developments of early childhood education (ECE), and through this, to examine and discuss how ECE in the Singapore context can benefit from developments in the wider field, and yet stay relevant to its contextual demands.	4
MEC903	Research Investigations in Early Childhood Education	This course introduces students to the research design process in early childhood related topics. This course is essential in preparing students for their dissertation and MMM800 (Critical Inquiry) course which would require them to conduct a small research study within a single semester. This course provides the necessary preparation by allowing students to craft a coherent research design gathering literature, sifting through theories, identifying a focused topic and honing in on the studys purpose as well as selecting the specific research methodology for their study which is centered in the early years and commonly used in early childhood education.	4
MEC906	Curriculum Design and Development in Early Childhood Education	The course explores the theoretical and practical nature of various early childhood curriculum approaches across time and context. The discussion will closely examine the wide array of paradigms with the underlying conceptions about children and education in light of a range of practical implications. In order to be able to prepare to be curriculum developer, theorizer, and advocator, the course enhances participants capacity to utilize multiple critical lens to rethinking and doing of educational complexity, equity, and diversity.	4

Course Code	Course Title	Description	Academic Unit
MEC909	Professionalism in Early Childhood Education	This course is designed to review and reflect on current understandings of professionalism in the EC field both globally and locally. It explores the twin concepts of leadership and professionalism with reference to early childhood education in the Singapore context. It also explores how leaders can create avenues for professionals to innovate, enriching optimal learning and meeting the needs of children and their families.	4
MEC910	Pedagogy in Early Childhood Education	This course is designed to equip early childhood educators who are in teaching and mentoring roles to effectively design the curriculum and content to instruct adult learners who are preparing to enter the early childhood workforce. It will introduce participants to adult learning theories and scaffold their skills in teaching and instructing adult learners. The course enables participants to understand what motivates adult learners and be equipped with the needed skills to create content and instructional design that is conducive for the adult learner who is teaching young children. Hence, the course leverages on the participants existing knowledge on how young children think and learn. Participants will draw information from the various courses that they have previously undertaken, (e.g. child development, curriculum, assessment, diversity, etc.) for this course on Pedagogy in ECE. This course also has a practical element, which seeks to improve the participants instructional design and delivery in the context of teaching an early childhood course to adult learners.	4
MAX902	Paradigms and Practices of Assessment	This course seeks to provide strong fundamentals for participants to acquire a critical level of foundational assessment literacy, engage with different paradigms of knowledge, and be proficient in the application of key assessment practices. Assessment is posited as the object of study, and also as the key driver for designing the structure, pacing, and pitching of the course content. Participants are required to grapple with a range of assessment concepts, some of which are not literally nor easily reconcilable, and to distil a conceptual clarity from which they may interrogate their own assessment practice contexts.	4
MAX911	Item Response Theory	The student will learn the theoretical foundation for the construction of tests and analyses of test scores. It introduces the concepts and techniques of classical test theory and item response theory. The student will: 1. Examine the use and the impact of these theories in achievement testing, large-scale testing, and comparison of student achievement across different educational and social settings. 2. Learn to use computer programmes to analyse test data. 3. Discuss applications of these theories including objective measures, detection of item- or test-bias, differential item functioning, and computerised adaptive testing.	4
MAX914	Assessment and Development of 21st Century Competencies	The 21st century is often described as a VUCA world – one that is volatile, uncertain, complex, and ambiguous. With new demands coming from the 21st workplace, it is thus imperative for educators in various educational institutions to develop students capacities to match the needs of the students future workplace. This thus indicates an imperative need to change the way educators craft their lessons and learning tasks so as to provide students with ample opportunities to gain authentic learning experiences and enable the transfer of relevant knowledge and skills from their classrooms to solve real world problems.	4
MAX922	Assessment Feedback for Improvement and Learning	This course seeks to provide strong fundamentals for participants to acquire critical awareness of key issues and core tenets of instructional feedback as a key assessment practice. Feedback is discourses as integral to pedagogy and curriculum, and posited as the primary and pervasive dialogue in which learners can identify and address their learning gaps with teachers and peers. The multi-faceted dimensions and purposes of feedback practice are presented, including feedback as pedagogy and/or partnership, and feedback for performance, receptivity, and resilience.	4
MAX924	Theory and Practice of Authentic Assessment	This course aims to provide participants with 1) conceptual clarity on authenticity 2) principles for designing quality authentic assessments that yield valid information of a learners ability; 3) a critical perspective of the role of authentic assessment within Singapore's educational system.	4

Course Code	Course Title	Description	Academic Unit
MED903	Elementary Statistics for Education	This course provides the MEd (Educational Assessment) graduate student with the skills and understanding of elementary statistics and their applications in the social and behavioural sciences. Basic statistical literacy is required in a critical reading of research literature and in conducting sound research. It is essential knowledge for a MEd(Educational Assessment) graduate working in the field of educational measurement and evaluation	4
MED905	Applied Regression Analysis	This course is designed to equip higher degree students as well as teachers with the basic concepts and methods of regression analysis. The course will cover how regression analysis can be applied to answering research questions, in particular, in the educational context. The students will get hands-on experience in running relevant statistical software to run regression analyses to analyze data.	4
MEL901	Language and Literature Education	Historically, literature and language have not been dichotomous terms. Literature as a concept emerged in the fourteenth century and its latin root is littera denoting a letter of the alphabet. In this sense literature was tied to literacy or, more specifically, the ability to read. It was only later that literature became connected to the concept of taste involving the ability to read particular kinds of text and the discipline emerged in distinction from fields of language and linguistics. In this course, we seek to examine historically the disciplinary schism between English language and English literature and explore socio-cultural, linguistic and textual theories advocating an integrated approach to English language teaching. In the process, we aim to problematize the dichotomies between reading and writing, literacy and literariness, the functional and the aesthetic.	4
MEL902	Analyzing Literature and Language	This course introduces participants to the study and analysis of styles in canonical and non-canonical literary texts, as well as other similarly creative texts such as advertisements, using fundamental linguistic and literary tools. It is an interdisciplinary course spanning the borders of English language and English literature, which are presently framed in the school curriculum as two subjects even though they are mutually constitutive fields of inquiry. As education expands globally and exponentially, it is imperative that both language teachers and literature teachers promote learners who are able to systematically identify and critically evaluate or appreciate the qualities of language used for particular effects in a plethora of creative texts which exist around them. Participants in this course will have opportunities to examine and describe the forms of texts, interpret their communicative functions and offer evaluations of the textual effects created, supported by language-based evidence.	4
MEL914	Teaching Oral Communication: Current Theories and Approaches	The aim of the course is to introduce contemporary theoretical notions and pedagogical frameworks and approaches related to teaching listening and speaking such as the metacognitive, cognitive and social processes involved in oral communication, the principles and procedures for evaluating listening and oral competence, and the incorporation of multimodal and literary texts. You will explore how to apply the ideas covered and discussed in this course in your own teaching context, which are also relevant to, and can be adapted for, the teaching of other languages in both first and second language contexts.	4
MEL920	Creative Writing in the Classroom	Creative writing, whether in fiction or non-fiction, is part and parcel of the English language curriculum in Singapore and around the world. The course will engage teachers of English language and literature in the very processes of creative writing that they would have their own students engage in. Practical experience in, along with theoretical and research knowledge of, the craft of writing, can help teachers reflect critically on their own pedagogical approaches in the composition classroom.	4
MEL921	Literature, Culture and Education	This course attends to the theory and practice of English education in relation to literary studies, raising questions that resist simple answers: How are the aims and objectives of English studies bound up with the processes and practices of a given culture? How are English Literature curricula and pedagogy implicated in the ideological structures of formal schooling? To what extent should traditional notions of literature education change amid the realities of globalization in the digital age? How do English curricula valorize and/or marginalize students and teachers cultural identities on the basis of language, race, ethnicity, class, gender, and sexuality? Are English teachers complicit in privileging the cultural paradigms of a western literary education? How can literature education become a vehicle of cultural and political critique? These questions will be addressed in relation to the challenges of critically performing and conforming to the Literature Education curricula in Singapore schools.	4

Course Code	Course Title	Description	Academic Unit
MEL922	Teaching Shakespeare	This is a graduate course on acquiring knowledge and understanding of as well as how to teach the works attributed to the poet and dramatist William Shakespeare and a number of his contemporaries. Students will be introduced to a representative but also canon challenging range of Shakespeare texts complemented by a range of scholarly and pedagogical texts with the goals of making teachers more informed, better readers and teachers of Shakespeare texts. Each week each Shakespeare text will be taught through the lens of a particular literary theory. Upon completion of this course, students should be able to choose appropriate texts to teach their students, as well as choosing and planning appropriate strategies for introducing local students of any level to Shakespeare. Teaching involves teacher guided but active student lead seminars, each week by a different student, culminating in a symposium concerning new ideas for teaching Shakespeare in new and inspiring ways in the local context. Students will have a range of opportunities to think critically, share and debate ideas, and pedagogical strategies, through class discussion, group work, pair work and online activities.	4
MEL928	Children's Literature for the English Classroom	This course offers an exploration into the world of childrens literature from different theoretical perspectives. It situates childrens literature as sites where issues of class, race, gender, ethnicity, nationality and identity are constructed. Through applications of literary theory, the course offers opportunities to engage critically with texts in relation to readers and contexts. The course will also introduce scholarship from critical discourse and cultural studies revealing childrens stories as not only a means of enculturation but also as a platform to develop the critical and creative imagination.	4
MHA902	Identification of Potential and Administration of Interventions for High Ability Learners	This course presents guiding principles for the identification and administration of programmes designed for High Ability Learners and Talent Development. Identification methods, criteria and procedures, tests used to identify the gifted and assessment issues will be discussed in view of programming provisions and intervention possibilities. Alternative identification tools and forms of intervention will be introduced with regard to culturally deprived gifted population and invisible underachievers. Standards for systematically developing, implementing and managing appropriate programmes to meet the needs of High Ability Learners at primary and secondary school levels will be examined. Issues relating to the integration of such programmes into general education programming; professional development and resources to support such programmes will be discussed.	4
MLT901	Foundations of the Learning Sciences	This course considers present day discourses on learning/learning sciences in the broader context of education and how people learn. Students will deepen their understanding of constructivist learning approaches and learn to be cognizant of the vital roles of language and inquiry in human learning. Specific learning sciences topics include: * Conceptual change * Knowledge building * Cognitive apprenticeship * Learning in activity * Computer-supported collaborative learning * Learning in virtual worlds * Teacher education from the perspective of learning sciences * Design-based research	4
MLT902	Orchestrating and scaffolding knowledge building with learning analytics, artificial intelligence and collaborative technologies	This course is relevant to school teachers or professional educators working in organizations. Knowledge building (KB) is a future-oriented pedagogy that aims to develop learners knowledge building capacity through collaborative idea improvement in schools or organizations. It is especially critical for the development of knowledge creation societies. An important supportive socio-cognitive and technological environment is critical. Technologies such as computer-supported collaborative learning (CSCL) have been used to support knowledge building. Emerging technologies such as learning analytics and artificial intelligence are also gaining traction. In this course, you will participate as a member of a knowledge building community to explore and debate various issues related to fostering knowledge building in schools or your organizations. You will learn to craft inquiry-based learning activities, design thinking prompts to support intentional learning, facilitate social negotiation of ideas among learners and design both the face-to-face and online environments to help learners deepen their learning. You will also learn to leverage learning analytics and artificial intelligence to support learners in knowledge building.	4

Course Code	Course Title	Description	Academic Unit
MLT908	Design of Interactive Learning Environments	Topics include: * ILEs and Key findings from the Learning Sciences * Critical Perspectives on Educational Technologies * Design of Learning Environments * Design of Scaffolding for Learning * Design of Learning Experiences with New Media * Design of Learning with Collaborative Technologies * Design of Learning with Mobility * Educational Games * Design of Learning Spaces * Assessment of Collaborative Learning * Scaling educational innovations	4
MML902	Critical and Creative Thinking to Enhance Learning	Critical and creative thinking skills are important components of education. Singapore education places these skills as prerequisites which must be acquired by learners in order to prepare them to face the challenges of the 21st century and beyond. This course invites teachers/the participants to revisit and update themselves with the latest development in critical and creative thinking theories, to plan and apply creative teaching pedagogies that will enhance pupils learning.	4
MME901	Theoretical Perspectives and Issues in Mathematics Education Research	This is a required specialisation course for the MEd (Mathematics) programme. It equips participants with foundational knowledge in mathematics education as preparation for specialisation elective courses in the programme. This course contributes to one of the programme objectives of providing the participants with a range of the big ideas in mathematics education theories and related research. This serves as an introductory course to induct participants into an inquiry disposition suitable to the disciplinary emphasis in mathematics education.	4
MME903	Using Technology in Mathematics Education	This is a specialisation elective course for the MEd (Mathematics) programme. The course contributes to the following programme objectives particularly in the area of using technology in mathematics education: (1) provide participants with the knowledge and skills related to specific ideas in mathematics education; (2) develop the participants ability to relate the theoretical ideas in mathematics education to the authentic problems of practice faced by teachers in the classroom.	4
MME917	Problem Solving and the Teaching of Problem Solving	This is a specialisation elective course for the MEd (Mathematics) programme. This course contributes to the following programme objectives particularly in the area of mathematical problem solving and its teaching: (1) provide participants with the knowledge and skills related to specific ideas in mathematics education; (2) develop the participants ability to relate the theoretical ideas in mathematics education to the authentic problems of practice faced by teachers in the classroom. In addition, the course also serves to develop the participants critical, reflective, and creative thinking when solving mathematics problems.	4
MME922	Numbers and the Teaching of Numbers	This is a specialisation elective course for the MEd (Mathematics) programme. This course contributes to the following programme objectives particularly in the area of numbers and its teaching: (1) build the participants knowledge of the mathematics subject matter; (2) develop the participants ability to relate the theoretical ideas in mathematics education to the authentic problems of practice faced by teachers in the classroom. In addition, the course also covers students misconceptions in the learning of numbers in support of another programme objective of providing participants with knowledge related to specific ideas in mathematics education.	4
MUE902	Philosophy of Music Education	This course centres on the philosophical foundations of music education. In particular, it seeks to address the big questions that confront contemporary music education. Course readings range from ancient to living scholars and philosophers, and cut across cultural borders in its inclusion of Asian and comparative philosophical writings. (a) Philosophy of music education in the ancient world (b) Utilitarian philosophy of music education (c) Aesthetic philosophy of music education (d) Praxial philosophy of music education (e) Music education through postmodern lenses (f) Asian philosophies of music education and comparative approaches	4

Course Code	Course Title	Description	Academic Unit
MUE904	Studies in Musical Behaviours	This course involves a study of musical practices around the world with special emphasis on interdisciplinary perspectives such as philosophy, music education, analysis and sociology. An important corollary will be the ramifications for the teaching and learning of the various musical traditions. i) Deconstruction of Music/al and Behaviour ii) Music as human-constituted activity; aspects of disciplinarity iii) Music and discourses of behaviour iv) Means, methods, media/tion/Systemic and Systematic practices v) Cap/abilities in Music-making vi) Consequences involving music and behaviour vii) What does musical behaviour mean? viii) Musical practices - exemplars ix) Seminar Presentations	4
MSC905	Science Discourse: Learning through Talk and Texts in the Classroom	This course aims to deepen participants understanding of the complex interplays between language, identity, and learning in general as well as gain knowledge about scientific reasoning, explanation, and argumentation for science teaching. Through theoretical exploration of key readings in the field and practical application with local data, participants will develop the basic skills to analyze classroom talk and text and relate these to issues of learning and identity. Moreover, participants will enhance knowledge-building of reasoning, explanation, and argumentation for the science classroom.	4
MSC911	AI and Emerging Technologies in Science Education	This course aims to provide you with an in-depth understanding of how artificial intelligence (AI) and emerging technologies are transforming science education. You will explore the latest trends, tools, and techniques that can be applied to enhance teaching and learning in science. By the end of the course, you'll be equipped with the knowledge and skills to integrate AI-driven solutions and technological innovations into educational practices, improving both classroom experiences and student outcomes. This course is designed for educators, curriculum designers, and anyone passionate about advancing the role of technology in education. Taking this course will provide you with the tools to stay at the forefront of educational technology. You will also gain valuable insights that can inspire new ideas for your own classroom or research endeavours, ensuring you remain forward-thinking in an ever-evolving landscape.	4
MSE902	Human Development	This course examines the major dimensions of typical and atypical physical, cognitive, moral, emotional and social developments in relation to the patterns of growth, stability and change, which occur across the lifespan. The impact of biological, psychological, and social challenges on human development will be explored. An ecological perspective will be utilized to understand the individual, family, community, and society issues related to these challenges. A range of developmental learning theories will be introduced to help explain different outcomes in terms of learning, personality, behaviour, mental capacities and processes, and the influences of culture and language. Alongside the general theories of human development, disability will be introduced through a life course approach to offer an alternative framework for thinking about disability as it affects people of all generations and at all points of life course transition. This perspective is important, because it highlights how disabling societies and practices affect the population under consideration i.e. children, young people and adults, helping us to understand life course transitions in a collective way, and how this shapes our understanding of disability in the social world. Participants will be encouraged to link theoretical perspectives and empirical studies with their roles as educators in order to help them develop the necessary understanding and skills to assist others in navigating lives present and future challenges.	4
MSE913	Curriculum Design and Development	This course introduces curriculum design and development models and practices pertinent to the field of special education. Students will demonstrate the why, what and how of curriculum design and development. Effective teaching and learning requires a renewed focus on the unique needs of individual learners and an understanding of differentiated curricula and pedagogies to meet the needs of these learners. This course aims to offer the knowledge and skills to develop appropriate curricula and instructional approaches to accommodate learners with diverse needs ranging from those with high support needs to those who are gifted and talented.	4

Course Code	Course Title	Description	Academic Unit
MSE914	Evidence-based Practices in Special Education	This course provides an in-depth view of evidence-based practices in the field of special education. Participants will review the evidence-based practices across various domains (e.g., academic, behavioural, social emotional) in special education. Participants will also be introduced to the single-case research designs that are commonly used to evaluate the effectiveness of interventions with individuals with disabilities. Participants will be equipped to understand journal articles that examined intervention effectiveness in special education, and learn to translate this knowledge to impact their support of individuals with disabilities.	4
MSE915	Assessment of Children and Youth with Special Needs	The increased identification of children with special needs entails a more nuanced approach towards educational programming. The diverse profile that students with special needs requires a detailed assessment of their individual strengths and needs. This course offers an introduction to assessment and testing of children with special needs. It combines the introduction of the theories and concepts in assessment, with evidence-based practices when assessing children. Participants in this course will have direct experiences with screening, standardized, criterion-referenced, and behavioral assessment. Through these experiences, they will link the theories and concepts in measurement and child development with the practical guidelines, procedures, and applications.	4
MTL903	Tamil Language in Education	This module aims to strengthen students' knowledge on teaching Tamil as a second language in Singapore. The bilingual policy in Singapore will also be covered in the course. The module will elaborate on Language Acquisition, Language Learning theories. Strategies and approaches on teaching Tamil language and developing the four language skills of students effectively will also be elaborated in this module.	4
MTL904	Functional Tamil Syntax	This module aims to widen students' knowledge on the theories of Functional Tamil syntax. The module will mainly focus on Tamil syntax and its various components. In-depth, students will study Tamil phonology and morphology. Students will analyse the formation and division of words, phrases and its structure, sentence structures and types of sentences, immediate constituent (IC), phonetics and phonemics in Tamil Language. The module will also cover the relationship between words, phrases and sentences using the insight gained. Ultimately, the knowledge gained should be applied in daily life and made relevance to authentic examples such as Short stories, conversational Tamil, radio conversations etc.	4
MES901	Integrative Project	This course will equip students with an advanced level understanding on research methods and critical inquiry. Topics covered include: science knowledge, scientific research an inquiry, scientific writing, and scientific presentation. Students will carry out a small research project, integrating skills and knowledge gathered over the MSc ESS programme. The deliverables are a research paper and a presentation.	2
MES902	Adapted Physical Activity & Sports	Individuals with special needs, like everyone else, need to be involved in regular physical and sporting activities. They can, and should, be equipped with the necessary skills and knowledge to participate in modified and/or regular games and sporting events. This course introduces students to the area of adapted physical activity/education and to the diverse disability conditions affecting individuals. There will be opportunities for hands-on practical sessions to explore different adaptations (equipment, rules, and instructions) and types of adapted physical activities sports that can cater to the needs of individuals with special needs.	4

Course Code	Course Title	Description	Academic Unit
MES904	Biomechanics of Sport and Exercise	This course will equip students with an advanced level understanding of biomechanics. Topics covered include: kinematics, kinetics, biomechanical instrumentation, data acquisition, data processing and interpretation, and research approaches in biomechanics. Students will perform laboratory work using state-of-the-art equipment, alongside lectures and tutorials. Students will also get an opportunity on a practical problem as part of the research experience. A mix of face-to-face interactions, online learning and group work is implemented in this module. It is intended that students be guided to holistically integrate the knowledge presented throughout the module.	4
MES910	Physical Activity, Nutrition & Health	This course will equip students with an understanding of the role of physical activity and nutrition in preventing chronic non-communicable lifestyle diseases. Issues related to measurement are covered before examining the evidence that physical activity and good nutrition can be used to prevent and treat a range of chronic lifestyle diseases. Physical activity prescription and nutritional recommendations for the prevention of each disease will be examined. The course will use a range of methods to explore the evidence including lectures, laboratory work, tutorials, online learning, group work and presentations.	4
MES911	Psychology of Physical Activity	This course will equip students with an advanced level understanding of psychological knowledge about physical activity for health. Topics covered include: physical activity correlates and theories, physical activity behavioural change, benefits of physical activity to health, measurements of physical activity, data acquisition, data processing and interpretation, and research approaches in physical activity psychology.	4
MES914	Trends & Issues in Physical Education & Sport	This is an advanced subject where readings and discussions of current problems in physical education and sport are expected of the students. The focus will be on critically analyzing issues and trends in the field of physical education and sport, with an emphasis on understanding the impact of the field to education and society. Implications for the future are also explored. Students will get an opportunity to undertake a mini-action research on a related topic in PE and sport and share their findings with the class. A mix of face-to-face interactions, online learning and reflections, and group work is used in this module. It is intended that students be guided to holistically integrate the knowledge presented throughout the module.	4
MES916	Strategic Management for Sport	This course aims to provide students with an insight into strategic management and planning, the concepts, the frameworks and the techniques. It is essential for students to understand strategy because in the contemporary competitive sport environment, direction and funding are directly related to a strategic plan. This course will also enable students to be more capable of mastering other courses most notably sport facility management and sport event management where they will be projected to be involved in the application of strategic components (e.g., long-term event planning, legacy leveraging including facility sustainability, and event portfolio management). The assessment will focus on real life strategic plans giving authenticity and application to sports organisations. Students will benefit from delivering a group/pair presentation to develop key skills for future, combined with an internal and external audit of the chosen sport organisation (i.e., an individual essay using the same strategic document underpinning the group/pair presentation).	4
MLS900	Science Communication	It is important for Science to be communicated effectively across all levels, given its large impact on society and vice versa. All science professionals, whether they are in education, research or industry, will need to engage different audiences in science communication at various points in their work. It is therefore essential for them to be equipped with the knowledge and skills to evaluate scientific information and communicate it using audience-appropriate styles and platforms. Given its high relevance and wide applicability in the science-rich workplaces for graduates from the MSc (Life Sciences) programme, Science Communication is proposed as a core course for all students in the programme.	4

Course Code	Course Title	Description	Academic Unit
MLS921	Critical Inquiry (Chemistry)	This is a compulsory experimental course offered to MLS (Chemistry) participants to enable them to solve real life problems. This course will enable participants to enhance their higher order thinking skills like critical thinking and problem solving; and apply chemistry knowledge through the use of the scientific inquiry approach to solve related chemical problems. Experimental techniques and relevant instrumentation related to different areas of chemistry will be introduced. This course will be taught by a team of chemists with different backgrounds and participants will benefit from the diverse range of topics and ideas presented.	2
MLS926	Bioactive Natural Products and their Derivatives	The purpose of the course on Bioactive Natural Products and their Derivatives is to provide participants with fundamental knowledge of natural product chemistry and the role natural products play in drug discovery and development. Topics such as the distribution and biosynthesis of natural products and their ecological function within biological systems, as well as knowledge of drugs, drug extracts and bioactive natural products from plants and microbes that are used for production of medicine and herbal remedies, will be covered. In addition, innovative analytical techniques used in natural products research will be emphasized.	4
MLS929	Medicinal Chemistry	Medicinal chemistry is a chemistry-based course and it involves the application of chemical research to the development of new pharmaceuticals. A wide range of topics will be included in the discussion of medicinal chemistry. These topics include drug targets, drug optimization, structure activity relationship studies, synthetic organic chemistry, pharmacology, as well as drug discovery and development. Novel chemical and biological techniques will be highlighted in this course and are introduced in the context of the drug development process. Interdisciplinary aspects of medicinal chemistry will be emphasized by linking other scientific disciplines, such as biochemistry and molecular biology. This course will be taught by a team of chemists with different backgrounds and participants will benefit from the diverse range of topics and ideas presented.	4
MLS942	Global Energy Systems	This is an introductory course that is designed for students to understand the global energy sources available for mankind. It provides both theoretical and practical understanding of how energy and climate policies are distributed and connected across a multitude of cases drawn from global to local arenas. This is the first course in this Master programme and is intended for those engaged with or planning a career in professional contexts relating to energy management, education, RD and marketing.	4
MLS943	Photovoltaic Physics and Solar Cells	Today the traditional energy sources based on fossil fuels are depleting at an ever fast rate and will be exhausted in the next centuries. Photovoltaic solar energy becomes one of the most feasible alternative energy sources that will provide energy demand for mankind in the future. This course deals with the issues of an alternative sustainable energy source that relies on the direct conversion of sunlight into electrical energy in solar cells based on the photovoltaic effect.	4
MLS950	Applied Quantum Mechanics	Quantum mechanics is widely recognized as the basic law that governs all of nature, including all materials and devices. It has always been essential to the understanding of material properties, and as devices become smaller it is also essential for studying their behavior. This is an introductory course on quantum theory designed for students to understand the rudiments of the physics governing the atoms and molecules. There is an increasing need for professionals in clean energy to delve deeper and deeper into the laws of microscopic regime.	4
MLS963	Conservation and Management	In a rapidly changing world where the utilisation of resources is inextricably linked to development, the challenge of ensuring the sustainable use of natural resources has global consequences. This course will deal with issues relating to the sustainable use, protection, conservation and management of the earth's natural resources through relevant case studies. Local, regional and international initiatives, which address the issue of sustainable development and natural resource management, and the role of science in environmental management will be studied.	4

Course Code	Course Title	Description	Academic Unit
MLS972	Advances in Ecology	Besides introducing the various concepts in ecology, the course focuses on the complexity and interplay of ecology at the different levels of biological organisation (e.g., individual <-> populations <-> communities). In today's highly altered environments, knowledge about ecology has immense value in real-world applications to ensure a sustainable Earth for future generations. Singaporean issues are central, but are set in a global context. For example, the construction of the EcoLink@BKE in Singapore is an attempt to address habitat fragmentation, an issue also faced by many developing countries due to deforestation and habitat degradation. Topics include population growth models, competition, niche partitioning, trophic interactions, succession, and island biogeography.	4
MLS973	Physiological and Molecular Responses of Plants and Animals to Environmental Stress I	Environmental stress can be caused by both abiotic (physical and chemical) and biotic (effects of other organisms) factors. How plants and animals sense and respond to environmental stress have fascinated scientists. Due to both anthropogenic-driven and nature-driven environmental changes like changing solar radiation (both visible and UV radiation), global warming or increasing temperatures, increasing periods of freezing temperatures and droughts, ocean acidification, and increasing pollutants, determining the ability of plants and animals to sense and respond to different environmental stress becomes increasingly important. Participants in this course will learn about the molecular and physiological mechanisms used by both plants and animals to cope with environmental stress in the different environments.	4
MSM901	Fundamentals of Postgraduate Mathematics	This course aims to bring you up to speed with regard to the fundamentals of postgraduate mathematics. It involves process skills such as reading mathematics texts and writing mathematics reports, mathematical problem solving, and computational thinking via coding. It is anchored in advanced mathematics content that will allow you, as Felix Klein proposed, to view school mathematics from a higher standpoint. Content includes proof techniques, set theory and logic, and various aspects of infinity. This course is intended for educators, especially secondary and post-secondary school teachers, to help them to have an in-depth conceptual understanding of some topics in school mathematics such as number systems, calculus, and computational thinking from an advanced perspective of mathematical theory building and processes. This course will also lay a foundation for students in the Master of Science (Mathematics for Educators) programme.	3
MSM902	Selected Topics in Mathematics	This course aims to expose you to some selected contemporary topics in mathematics.	3
MSM904	Analysis	This course in real analysis aims to introduce you to the order-theoretic, algebraic and geometrical structures of the real line, and the relationships between them. In particular, you will be introduced to the concepts of sequences and convergence first, for real number sequences, and next, for sequences of real-valued functions. This course is intended for educators, especially secondary and post-secondary school teachers, to help them gain an in-depth understanding of some topics in school mathematics such as limits of sequences, continuous functions such as polynomials, exponential function, trigonometric functions, the link between differential and integral calculi, through the lens of real analysis. This course will provide the foundation for students who read analysis at the postgraduate level.	4
MSM905	Data Science	This course is designed to introduce you the basics of data science methodology and let you be able to apply such methodology to real problems. This course is intended for educators, to empower them to perform data visualization, data preparation and prediction tasks. This course will also lay a foundation for students who plan to pursue a PhD in areas related to data science/statistics.	4
MSM907	Geometry	Geometry is one of the foundational topics in mathematics. This course presents a complete axiomatic system for Euclidean geometry and related geometry topics. By completing this course, you will gain a clear picture of the whole hierarchical structure of geometry. You will learn the rigorous definitions of the fundamental geometry concepts, such as angles, triangles, rays, congruent/similar triangles. You will also learn the formal proofs of the fundamental results in geometry, such as the equivalence of various different triangle congruency (similarity) tests, Angle Sum Theorem and Exterior Angle Theorem as well as the Midpoint theorem. The course will also cover some advanced topics in geometry such as the non-Euclidean geometries, projective geometry or differential geometry. These advanced topics will widen and deepen students' knowledge in geometry and help those who want to pursue higher degree study.	4

Course Code	Course Title	Description	Academic Unit
MSL907	Translating Educational Neuroscience	Efficacious translation from science of learning research to the education practice and policy making continues to have challenges. Educational professionals need to have up to date knowledge of the ethics, feasibility, and challenges of translation to make informed decisions for their students.	4
MSL908	Brain, Behaviour, Cognition	Rapid changes in the milieu of 21st century learning culture and environments foregrounds the criticality to be cognizant of the multidimensional aspects of human cognition. This course entails an in-depth understanding of the nature of human learning focusing on neurobiological tenets. Having a grasp of the interfacing dimensions between brain, behavior and cognition can provide insights and a deep understanding of how learning occurs, particularly in the current milieu. This course will provide the biological foundation for students pursuing the Science of Learning program with its niche focus on neuroscientific bases of learning.	4
MSL909	Integrative Project	This research-based course consolidates students' overall learning from the programme. It requires students to identify a Science of Learning education related issue, which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MSL910	Assessment Feedback for Improvement and Learning	This course seeks to provide strong fundamentals for participants to acquire critical awareness of key issues and core tenets of instructional feedback as a key assessment practice. Feedback is discoursed as integral to pedagogy and curriculum, and posited as the primary and pervasive dialogue in which learners can identify and address their learning gaps with teachers and peers. The multi-faceted dimensions and purposes of feedback practice are presented, including feedback as pedagogy and/or partnership, and feedback for performance, receptivity, and resilience.	4
MTC907	Integrative Project	The Integrative Project is a capstone course which provides the learning opportunity for participants to tie together and culminate what they have learned in the courses offered in the programme into a proposal report that addresses a specific problem or issue in education through the process of rigorous inquiry.	2
EDEL901	Sociolinguistic Perspectives on the Classroom	This course seeks to examine language in its social context, including language use in multilingual communities, social reasons for language change, language planning, pidgin languages, linguistic variation based on geography, social class, and gender, and issues in cross-cultural communication. It also considers the impact these concepts have on classrooms. Students who are interested in how language impacts and in turn is influenced by society should take this course. Sociolinguistic concepts and issues discussed in the course will broaden perspectives on the critical role language plays in various domains of society, like education.	4
EDEL902	Language and Literature Education	In this course, we seek to examine historically the disciplinary schism between English language and English literature and explore socio-cultural, linguistic and textual theories advocating an integrated approach to English language teaching. In the process, we aim to problematize the dichotomies between reading and writing, literacy and literariness, the functional and the aesthetic. Aims 1. To provide students with a macro understanding of English in relation to historical and global developments. 2. To consider some of the key principles that have grounded English and how the discipline of literary studies diverged from other fields in English. 3. To consider the potentialities of English as a global language and the ways in which engagements with literary and rich texts can facilitate the development of global consciousness, the empowerment of students to critique social and global injustices, and the cultivation of empathetic dispositions in response to increasing transnational interconnectivity. 4. To give students opportunity to critique different curricula models, particularly world and cosmopolitan paradigms.	4
EDEL906	Language Teaching Methodology	This course aims to examine the rationale and principles behind teacher- and learner-centred methodologies and critically assess their appropriateness for the local as well as international English language teaching contexts. In addition, the course aims to examine the influence of numerous factors (e.g., cognitive, affective, social and technological) that affect the way language teachers plan, deliver and evaluate language learning.	4

Course Code	Course Title	Description	Academic Unit
EDEL907	Literature, Education and Culture	This course attends to the theory and practice of English education in relation to literary studies, raising questions that resist simple answers. It examines the aims and objectives of English studies as these are bound up with the processes and practices of a given culture. How are English Literature curricula and pedagogy implicated in the ideological structures of formal schooling? To what extent should traditional notions of literature education change amid the realities of globalization in the digital age? How do English curricula valorize and/or marginalize students and teachers cultural identities on the basis of language, race, ethnicity, class, gender, and sexuality? Are English teachers complicit in privileging the cultural paradigms of a western literary education? How can literature education become a vehicle of cultural and political critique? These questions will be addressed mainly in relation to the challenges of critically performing and conforming to the Literature Education curricula in Singapore schools. This course is ideal for educators, Literature teachers, English Language teachers and anyone interested in literature and culture. It will give you a firmer understanding of what is at stake in Literature education in order for you to make informed curricular and pedagogical decisions	4
EDHS901	Critical Reading and Writing in Humanities Education	This course provides an introduction to issues and research in humanities education using the core themes of the programme - in globalization, citizenship, sustainability and heritage. You will be introduced to key issues in humanities education through a critical engagement with the academic literature. You will also learn about research epistemologies and methodologies relevant to humanities education and write a literature review relevant to the area of study.	4
EDLC902	Ethics for Leaders	This course equips students with knowledge of concepts and principles that will enable them to think and act ethically as leaders in their professional contexts in education. It is targeted at advanced students engaged in educational leadership and management. Ethical leadership matters in education as the very act of educating is ethical work. That is, leaders not only have the duty and responsibility to be clear about their personal and professional values. They also have the further responsibility of creating an ethical environment that contributes to the moral development of their students, staff and/or other educational stakeholders. But what does it mean to develop a good person as well as a good citizen? How should educational leaders respond to various ethical dilemmas that arise from clashes of values in terms of their obligations to self, the profession, the organization and various stakeholders? This course addresses these and other questions, and invite students to critically engage with the scholarly literature in ethics, leadership and education. It prepares them to become leaders engaged with the complexities of ethical decision making in education.	4
EDLM902	Understanding Learner Motivation: Theory, Research and Practice	This course provides participants with an in-depth understanding of the theoretical underpinnings of learner motivation. It is intended for PhD/EdD students who intend or are currently working on a research proposal in the area of motivation. The course covers an overview of the central theories of motivation, with a focus on how these can be applied in the classroom context to foster learning. In doing so, participants will be invited to explore issues related to the motivation of learners, the factors affecting learner motivation, and the strategies that could be employed to promote motivation. Participants will be required to carry out a critical review of existing literature on motivational constructs of their interest, which leads to the development of a research proposal relevant to their anticipated PhD/EdD research.	4
EDTM902	Theoretical Foundations of Technology-Mediated Learning Environments	The pervasiveness of technology is taken for granted in the new information age. Technology-mediated learning, whether using the Internet, using social media, or via mobile devices, are increasingly adopted. However, uninformed, and uncritical uses of emerging technologies are often observed. Therefore, this course aims to equip participants with solid theoretical bases for making compelling design decisions with respect to technology-mediated learning environments to increase students cognitive engagement, positive learning experiences, and increased learning outcomes. The participants of the course are EdD candidates who are specialized in technologies and technology-mediated learning environments. They can be school teachers, e-learning designers, or corporate trainers.	4

Course Code	Course Title	Description	Academic Unit
EDVP922	Philosophy of Music Education	This course centres on the philosophical foundations of music education. In particular, it seeks to address the big questions that confront contemporary music education. Course readings range from ancient to living scholars and philosophers, and cut across cultural borders in its inclusion of Asian and comparative philosophical writings. The course aims to ground music educators with an understanding of the underlying philosophies and assumptions of music education.	4
NEDD901	Literature Review Methods	This course is designed to help beginning doctoral students participants retrieve, analyse and synthesise the literature for their respective research, thereby establishing the significance of their research proposal. Advanced library skills and referencing system will also be introduced. Other than gaining research literacy skills, students will have a chance to develop their scholarly identities and dispositions as well as build a community of learners in preparation for their research journey. Thus, the outcomes of this course include understanding of the concepts, skills, dispositions, and ethics necessary to conduct a literature review, and, consequently, research. These outcomes will lay the foundation for the literature review chapter for their respective proposals, in addition to completing literature reviews to develop different sections of their dissertations.	4
NEDD902	Quantitative Research Methods	This course will provide you with a sound understanding of quantitative research methods in education. The course will focus on the theoretical, methodological, and practical aspects of research methodologies. The aim is to provide you with the necessary insights on educational research in (i) identifying gaps in current research in a particular area of study, (ii) developing meaningful research questions, and (iii) understanding research designs, and analyses. Discussions on planning and validity of research designs will enable you to evaluate the validity of research that has been conducted in a particular educational area. These experiences will increase your appreciation of the complexities involved in working with data, and hence enable you to develop a meaningful research study. Quantitative methodologies stipulate a systematic empirical investigation of observable phenomena via statistical, mathematical, or computational techniques which will develop into the concept of hypothesis testing.	4
NEDD903	Qualitative Research Methods	This course aims to equip students with skills to: (1) analyze the basic assumptions of research traditions and specify the interrelationships among them; (2) select the appropriate qualitative research approach and method(s) to answer their specific research questions; (3) reflect on issues to consider when selecting participants; (4) consider the rigour and ethics of qualitative research; and (5) consider operational, ethical and logistical details when collecting qualitative data, analyzing the data, and aligning theories, data and practice to construct a coherent and powerful thesis.	4
NEDD905	Research Proposal and Preparation	The aim of this course is to support students in preparing and confirming their research proposal for the EdD dissertation in a timely fashion. All EdD students must take this course after completing their Research Methodology, Literature Review, Academic Reading and Writing for Education and specialization courses. They must also complete this course by the 5th semester of their candidature. In completing this course, the students would achieve the important milestone of finalising their research proposal with the endorsement of an expert review panel.	3
